What is this product?

Type:

This product is a type of collective investment scheme, specifically, a sub-fund of an Irish authorised undertaking for collective investment in transferable securities (or "UCITS") constituted as an investment company under Irish company law. Your investment will take the form of shares in the Fund.

Term:

The Fund, unless dissolved pursuant to any specific cause set forth in a mandatory law or in accordance with the prospectus of the Fund, is established for an unlimited duration.

Objectives:

The Fund aims to provide investors with exposure to a diversified portfolio of listed property securities.

The Fund seeks to generate capital appreciation and income on your investment by investing at least two-thirds of its assets worldwide in the equities of mid to large sized commercial and rental residential real estate property and/or property trusts including, but not limited to, Real Estate Investment Trusts (REITs) and equities in companies that invest in income-producing property or property-related assets (e.g. office buildings, apartments, shopping centres and warehouses) which are listed in countries included in the FTSE EPRA/NAREIT Developed Real Estate Index (USD) - Net Returns (the "Index").

The Fund will invest up to 5% of its assets in convertible bonds, being a type of bond which can be converted to common stock or cash.

The Fund may gain market exposure indirectly through the use of specialist financial techniques (known as derivatives). Derivatives may also be used to reduce the Fund's exposures to currency, market and / or interest rate risk, or to manage the Fund more efficiently.

In order to construct the Fund's portfolio, Russell Investments Limited (the "Principal Money Manager" will appoint one or more Investment Advisers who will provide model portfolios comprised of the securities referenced above. The Principal Money Manager will construct the portfolio based on an aggregation of these model portfolios and may adjust the aggregated model portfolios, using proprietary investment strategies, as required, to enable the

management of exposures at a total portfolio level for risk management and/or return enhancement purposes.

The Fund is actively managed with reference to the Index. The Fund's performance will be measured against the Index which it seeks to outperform by 1.75% over the medium to long term. The Principal Money Manager has full discretion to select investments for the Fund and in doing so will take into consideration the Index, but it is not constrained by it.

As your shares are in Euro and the Fund is in US Dollars, fluctuating currency exchange rates may affect the value of your investment. Income of the Fund will be paid out in the form of a dividend.

You may sell your shares in the Fund on any day on which banks are normally open for business in Ireland. For further information please refer to the "Repurchases of Shares" section of the prospectus.

The Fund may be terminated at the discretion of the directors of the Company, provided that a minimum of twenty-one days' written notice has been provided to Shareholders. The Fund may also be terminated by the Shareholders in the Fund, if voted for by at least 75% of the Shareholders in the Fund.

The Fund's depositary is State Street Custodial Services (Ireland) Limited (the "Depositary").

The share price is published on each business day and is available online at www.bloomberg.com.

Further information about the Fund, copies of the English, German, French and Italian prospectus and the latest annual and semi-annual reports in English may be obtained free of charge by writing to Russell Investments, Rex House, 10 Regent Street, London SW1Y 4PE, England. They are also available online at <https://microsite.fundassist.com/RussellEMEA/Home/RegulatorView>.

Intended retail investor:

The Fund is designed primarily for investors seeking to generate capital growth and income. It should form part of a broader portfolio of investments but may also be suitable as a significant component of an investor's overall portfolio. The Fund is intended for investors with a long term investment horizon, who are prepared to take on a relatively high level of risk of loss to their original capital. For a basic investor, the Fund should be purchased with advice or on an execution only basis.

What are the risks and what could I get in return?

Risk Indicator

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level and poor market conditions could impact the value of your investment.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The summary risk indicator only takes market and credit risk into account. For a full list of the risks materially relevant to the Fund, please see the Prospectus at: <https://microsite.fundassist.com/RussellEMEA/Home/RegulatorView>.

This product does not include any protection from future market performance so you could lose some or all of your investment, however, your liability will be limited to the amount invested and you will not be liable for any additional financial commitments beyond the amount you have invested.
