

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Dynamic Bond Fund

a sub-fund of PIMCO Funds: Global Investors Series plc
PIMCO Global Advisors (Ireland) Limited, part of Allianz, manages this fund.

ISIN: IE00B63F6492
Share class: Administrative SEK (Hedged) Accumulation

Objectives and Investment Policy

Objective The fund aims to maximise long-term return, consistent with preservation of capital through investing in a diversified portfolio of fixed income instruments and securities, using prudent investment management principles.

Investment Policy The fund aims to achieve this objective by investing primarily in a range of fixed income instruments and securities (which are loans that pay a fixed or variable rate of interest) issued by companies or governments from around the world. Securities will be priced in a range of global currencies.

The average portfolio duration of this fund will normally vary from negative 3 years to positive 8 years based on the investment advisor's forecast for interest rates. Duration measures the sensitivity of the assets to interest rate risk. The longer the duration the higher the sensitivity to changes in interest rates.

The fund invests primarily in investment grade securities but may also invest up to 40% of its assets in "non-investment grade" securities. Non-investment grade securities are considered to be more risky, but typically produce a higher level of income.

The fund may invest substantially in emerging markets, which in investment terms are those economies that are not as developed.

The fund intends to measure its performance against the ICE BofA SOFR Overnight Rate Index (the "Benchmark"). The fund is considered to be actively managed in reference to the Benchmark by virtue of the fact that it uses the Benchmark for performance comparison purposes. However the Benchmark is not used to define the portfolio composition of the fund or as a performance target.

The fund may invest in derivative instruments (such as futures, options and swaps) rather than directly in the underlying securities themselves. The derivatives return is linked to movements in the underlying assets.

The assets held by the fund may be denominated in a wide variety of currencies. Non-USD denominated currency exposure is limited to 35% of assets. The investment advisor may use foreign exchange and related derivative instruments to hedge or implement currency positions.

For full investment objectives and policy details please refer to the fund's prospectus.

Distribution Policy This share class does not pay out a distribution. Any investment income generated will be reinvested.

Share Class Currency Hedging This share class seeks to limit the

shareholder's currency risk by reducing the effect of exchange rate fluctuations between the share class currency and any non-active currency exposures of the fund.

Dealing Day You can buy and sell shares on most working days in Dublin, exceptions to this are more fully described in the fund holiday calendar available from the Administrator.

Risk and Reward Profile

The indicator above is not a measure of the risk of capital loss, but a measure of the fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".
- The risk indicator is based on the volatility of the fund's performance over the last 5 years. Where 5 years' performance history is not available the data is supplemented by benchmark data or simulated historical series as appropriate.
- The fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

In addition to the risk captured by the indicator, the overall fund value may be considerably affected by:

Credit and Default Risk A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay

a loan or meet a contractual obligation. This could cause the value of its bonds to fall or become worthless. Funds with high exposures to non-investment grade securities have a higher exposure to this risk.

Currency Risk Changes in exchange rates may cause the value of investments to decrease or increase.

Derivatives and Counterparty Risk The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations.

Emerging Markets Risk Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk. Investments in these markets may expose the fund to larger gains or losses.

Equity Risk The value of equity or equity related securities may be affected by stock market movements. Drivers of price fluctuations include general economic and political factors as well as industry or company specific factors.

Liquidity Risk Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price.

Interest Rate Risk Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices).

Mortgage Related and Other Asset Backed Securities Risks Mortgage or asset backed securities are subject to similar risks as other fixed income securities, and may also be subject to prepayment risk and higher levels of credit and liquidity risk.

Charges

The charges you pay are used to pay for the costs of running the fund, which include the marketing and distributing costs. These charges reduce the potential growth of your investment.

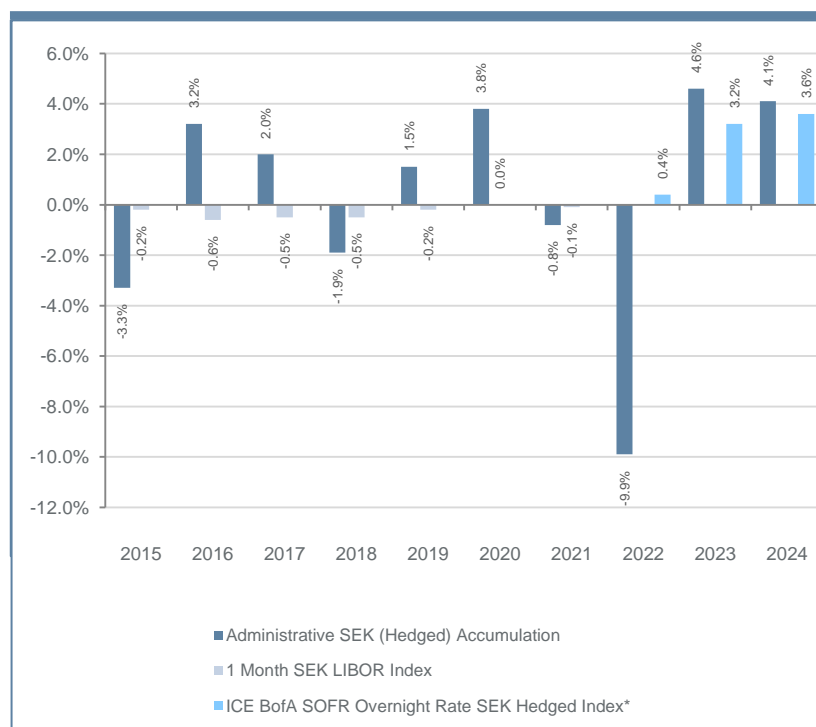

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	1.40%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry charges shown are maximum figures. You may pay less – you can find this out from your financial advisor.

The ongoing charges figure is based on expenses for the year ending 2024. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see the section of the prospectus entitled "Fees and Expenses", which is available at www.europe.pimco-funds.com.

Past Performance

- Past performance is not an indicator of future returns.
- Past performance does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.
- The performance of the class is calculated in Swedish Kronor.
- The fund launched in December 2008. This class started to issue shares in November 2011.
- *The Benchmark changed on 1 July 2022 from the 1 Month SEK LIBOR Index to the ICE BofA SOFR Overnight Rate Index SEKH. The past performance data shown in the chart for annual periods up to 2022 relates to the previous benchmark, 1 Month SEK LIBOR Index. The past performance data shown for 2022 reflects the blended return of the 1 Month SEK LIBOR Index ending 30 June 2022 and ICE BofA SOFR Overnight Rate Index SEKH (the current benchmark index) from 1 July 2022.

Practical Information

Depository State Street Custodial Services (Ireland) Limited.

Prospectus and further information Further information on the fund or other share classes or sub-funds of the Company, including the prospectus, the most recent annual report and subsequent semi-annual reports of the Company, may be obtained from the Administrator, as are the latest share prices.
