

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

WAVERTON

INVESTMENT FUNDS

Waverton Global Credit Opportunities Fund
a sub fund of Waverton Investment Funds plc
The Management Company of the Fund is
FundRock Management Company (Ireland) Limited

A Euro Hedged
ISIN: IE000G0PGD24

Objectives and Investment Policy

The Fund aims to achieve income and capital growth on your investment. The Fund may invest its assets directly or indirectly through investment in other funds, in bonds issued by governments or companies worldwide and structured products.

The bonds may have fixed or variable interest rates and are not subject to any ratings restrictions. A rating agency gives ratings based upon its assessment of the risk that the issuer of a bond will be unable to make payments. The Fund may invest in bonds priced in any currency. The Fund may invest no more than 20% of its assets denominated in emerging market currencies.

The Fund may use instruments whose value is determined by changes in the value of the underlying assets they represent (derivatives). The Fund may do so for investment purposes or in order to manage the Fund more efficiently (e.g., reducing risks or costs or generating additional growth or income).

The Fund may invest no more than 20% of its assets in contingent convertible securities, which are securities issued primarily by non-U.S. financial institutions, which may be converted into shares, written down or written off upon the occurrence of a predetermined trigger event, typically when the issuer's capital levels fall below a specified threshold.

The Fund may invest up to 10% of its assets in other funds which have similar objectives and policies to the Fund (or in funds which invest in bonds or money market instruments), of which up to 5% of its assets may be invested in funds investing in bond markets globally.

At times, the Fund may hold cash and cash-like instruments.

The Fund's approach to selecting investments combines a top-down

analysis of macroeconomic developments with a bottom-up analysis of fundamentals.

For more information about the investment policy, see "Investment Objectives and Policies of the Funds" in the Fund's supplement available at www.w1m.com.

You may sell your shares on any working day (generally, a day on which banks in Dublin and London are open).

The Fund declares dividends quarterly (generally, on 31 January, 30 April, 31 July and 31 October each year). Unless you request cash payment, your dividends will be paid in the form of additional shares in the Fund.

The Fund is actively managed and uses the ICE BofA Global Corporate & High Yield Index EUR Hedged (the "Benchmark") for performance comparison purposes only. The Fund does not seek to track the Benchmarks and so has discretion as to the investments it may make. While a proportion of the Fund may be components of, and have similar weightings to, the Benchmarks, the Investment Manager may or may not invest in assets which are not included in the Benchmarks or with weightings different to that of the Benchmarks. There can be no guarantee that the Fund will match or exceed the performance of the Benchmarks.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The risk category is based on historical data and may not be a reliable indicator of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time.

The numerical scale is complex. For example, 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 fund is not a risk-free investment the risk of losing your money may be small, but the chance of making gains is also limited.

The Fund is in its risk category as shown above as it typically produces higher rewards than other funds (such as money market funds) and is higher risk as a result of investing in bonds worldwide.

Risks materially relevant to the Fund which may not be adequately captured by the indicator:

- **Investment risk:** the Fund may not achieve its investment objective and the value of shares in the Fund may fall.
- **Credit and settlement risk:** the issuers of bonds or other instruments that the Fund buys, or other parties with whom the Fund trades, may not be able to make payments or deliver instruments to the Fund. As a result, this could lead to a loss. This risk is higher for investments with lower credit ratings.
- **Interest rate risk:** interest rate movements affect the value of bonds. The price of a bond generally falls when interest rates rise. Bonds with a final payment date further into the future are more sensitive to changes in interest rates.

- **Currency risk:** the Fund invests in assets which are priced in overseas currencies other than the Fund's base currency (US Dollar) and your shares are priced in Euro. Changes in exchange rates may lead to fluctuations in the value of your investment. The Fund may use techniques to try to protect the value of your shares due to changes in currency exchange rates and to try to limit currency exchange risk. There is no guarantee this will be successful.
- **Derivatives risk:** the value of a derivative depends primarily on the performance of the underlying asset. A small movement in the value of the underlying asset may cause a large movement in the value of the derivative. The Fund is exposed to the risk that the other party of the derivative will not meet its obligations.
- **Emerging market risk:** investment of part of the Fund's assets in emerging markets will be subject to greater risk due to possible political, economic, corporate governance, legal, market, accounting and other risks. Assets may not be properly held in custody and, as a result, may be lost. It may be more difficult to sell assets at a fair price in emerging markets.
- **Special Risks of Investing in Asian Securities:** investment of part of the Fund's assets in Asian securities will be subject to possible increased market volatility in certain Asian markets as a result of higher concentration of market capitalisation, lower trading volumes, lower liquidity generally and declines in foreign exchange rates, as well as increased social, political, legal, and operational risks due to the impact of geopolitical conflicts, unstable or authoritarian governments, lower levels of supervision and regulation of financial markets, restriction on foreign investment, and government interference and nationalisation.

See also the description of risks applicable to the Fund in "Risk Factors" in the Fund's prospectus.

Charges for this Fund

These charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distribution. Overall, they reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

The ongoing charge shown is an estimate. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

For more information about charges, see "Fees and Expenses", "Subscription Price" and "Repurchase Price" in the Fund's prospectus.

Charges taken from the Fund over a year

Ongoing charge	1.13%
----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	None
-----------------	------

Past Performance

There is insufficient data to produce a useful indication of past performance for the Share Class

Performance in the past is not a reliable indicator of future results.

In general, past performance takes account of all ongoing charges but not any entry, exit or switching charge.

Past performance is calculated in Euro.
The Fund is yet to launch. This class is yet to launch.
