

Liontrust US Opportunities Fund

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust US Opportunities Fund is a sub-fund of the Liontrust Investment Funds I and categorised as a UCITS scheme. This document is based upon the C Acc GBP (ISIN: GB00B7K9LQ88). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective and Investment Policy

- To generate long term (5 years or more) capital growth.
- The Fund invests at least 80% in US equities. The Fund may also invest up to 20% in companies outside of the US as well as other eligible asset classes as detailed within the prospectus.
- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day.
- The Fund may, under certain circumstances, invest in derivatives but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a

derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead.

- The fund managers believe markets that are often irrational and price inefficiency can last for some time. The key to success, therefore, is to be flexible in shifting the balance of time allocated to different core investment disciplines to suit prevailing market forces. In particular, the fund managers will change the focus between fundamental analysis and technical analysis to capture opportunities as the elements that drive markets change.
- The process is focused on identifying both better and poorer performing companies and constructing the fund's portfolio to generate positive outcomes around those names. This is carried out through a screening process to reduce the funds' target universe followed by in-depth fundamental company analysis. Intrinsic valuation of a company (using discounted cash flow modelling or relative to its peers) is also a core part of the approach.
- Once the target list of better and poorer performing companies is identified, the fund managers use technical analysis and risk overlays to construct and manage the portfolio. The fund managers use technical research as a tool for deciding when to invest, how much to invest and how to manage an active position in funds. This technical analysis references measures such as share price, volume and relative strength indicators.

Risk and Reward Profile

- This Synthetic Risk and Reward Indicator (SRRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund is categorised 6 primarily for its exposure to US equities.
- The Fund's risk and reward category has been calculated using the methodology approved by the Financial Conduct Authority. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address below) or online at www.liontrust.com.

- The SRRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- **Credit Counterparty Risk:** outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- **Diversification Risk:** the Fund is expected to invest in companies predominantly in a single country which maybe subject to greater political, social and economic risks which could result in greater volatility than investments in more broadly diversified funds.
- **Liquidity Risk:** the Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings.
- **Style Risk:** the Fund's investment approach follows a specific style. This means the Fund may perform differently from the broader market or other funds that adopt a different style. For example, growth stocks often trade at higher valuations and can be more sensitive to changes in interest rates or market sentiment, which may lead to greater volatility. Conversely, value stocks may underperform during periods when growth investing is favoured. Although quality companies with strong balance sheets, stable earnings, and robust governance practice may reduce certain risks, they can underperform in markets that favour higher-risk or cyclical investments. If the chosen style is out of favour, the Fund's performance may be adversely affected regardless of overall market conditions.
- **ESG Risk:** there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.

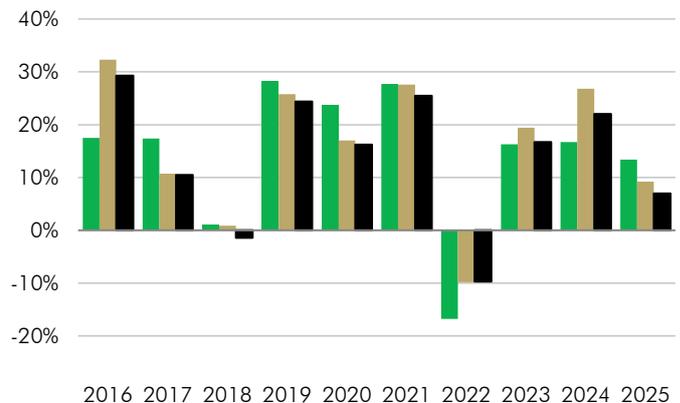

Charges

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested.	
Charges taken from the Fund over the year	
Ongoing Charges	0.87%
Charges taken from the Fund under certain specific circumstances	
Performance Fee	None

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. They reduce the potential growth of your investment.
- The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.
- The ongoing charges figure is based on expenses as at 31 December 2025. This figure may vary from year to year. It excludes:
 - portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units/shares in another collective investment undertaking.
- For more information about charges and what is included in each charge, please see the Fund's prospectus, which is available electronically at www.liontrust.com, or visit the costs and charges page on our website at www.liontrust.com/costs-and-charges.

Past Performance

- **Past performance does not predict future returns.**
- It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launch date is 31 December 2002.
- The C Acc GBP launch date is 3 October 2012.
- The base currency of the Fund is GBP.
- The benchmark changed effective 1st of February 2025 from S&P 500 to MSCI USA.

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
■ Liontrust US Opportunities Fund C Acc GBP	17.5%	17.4%	1.1%	28.2%	23.7%	27.7%	-16.8%	16.3%	16.7%	13.4%
■ MSCI USA	32.3%	10.7%	0.9%	25.8%	17.0%	27.6%	-9.8%	19.4%	26.8%	9.2%
