

Liontrust GF Sustainable Future Multi Asset Global Fund

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust GF Sustainable Future Multi Asset Global Fund is a sub-fund of Liontrust Global Funds plc. The Management Company is Bridge Fund Management Limited. This document is based upon the B8 Acc USD (ISIN: IE00BMXDB955)

Objective and Investment Policy

- To achieve capital growth over the long term (five years or more) by investing globally in sustainable securities.
- Growth stocks tend to pay out lower levels of dividend resulting in lower income yields and may produce more volatile returns than the market as a whole.
- The Fund invests globally. Allocations to equities, bonds and cash will vary over time depending on market circumstances. The Fund may also invest in other eligible asset classes as detailed within the prospectus.
- All investments will be expected to conform to our social and environmental criteria.
- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am (Irish time) for execution at 12:00 midday valuation point on the same day.
- The Fund may, under certain circumstances, invest in derivatives but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. The use of derivatives may create leverage or

gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead.

- The investment process seeks to generate strong returns from investing in companies aiming to deliver profits through positive social and environmental impacts. The fund managers look at the world through the prism of three mega trends – Better resource efficiency (cleaner), Improved health (healthier) and Greater safety and resilience (safer) – and then 22 themes within these.
- If a company has significant exposure to one of the themes, the fund managers verify how sustainable the rest of its activities are. For each company the fund managers determine the key ESG factors that are important indicators of future success and assess how well these are managed, via the proprietary Liontrust Sustainability Matrix.
- The fund managers aim to invest in companies that have robust business fundamentals with a proven ability to deliver high returns on equity (ROE) through sustaining margins and asset turnover. Typically, these companies have a maintainable competitive advantage through scale, technology or business model.
- The fund managers seek to invest in well-run companies whose products and operations capitalise on the transformative changes the Liontrust Sustainable Investment team has highlighted, may benefit financially from them and score well on ESG, business fundamentals and valuation. The managers believe identifying these powerful themes and investing in exposed companies can make for attractive and sustainable investments.

Risk and Reward Profile

- This Synthetic Risk and Reward Indicator (SRRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund is categorised 6 primarily for its exposure to a diversified portfolio of Global equities and bonds.
- The Fund's risk and reward category has been calculated using the methodology approved by the Financial Conduct Authority. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address below) or online at www.liontrust.co.uk.

- The SRRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
 - Bonds are affected by changes in interest rates and their value and the income they generate can rise or fall as a result;
 - the creditworthiness of a bond issuer may also affect that bond's value. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers (high yield) may have difficulty in paying their debts. The value of a bond would be significantly affected if the issuer either refused to pay or was unable to pay.
- **Credit Counterparty Risk:** outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- **Emerging Markets Risk:** the Fund may invest in emerging markets which carries a higher risk than investment in more developed countries. This may result in higher volatility and larger drops in the value of the fund over the short term.
- **Liquidity Risk:** the Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings.
- **ESG Risk:** there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.

Charges

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.

Charges taken from the Fund over the year	
Ongoing Charges	0.62%

Charges taken from the Fund under certain specific circumstances	
Performance Fee	None

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. They reduce the potential growth of your investment.
- The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.
- The ongoing charges figure is based on expenses as at 31 December 2024. This figure may vary from year to year. It excludes:
 - portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units/shares in another collective investment undertaking.
- For more information about charges and what is included in each charge, please see the Fund's prospectus, which is available electronically at www.liontrust.co.uk, or visit the costs and charges page on our website at www.liontrust.co.uk/costs-and-charges.

Past Performance

- **Past performance does not predict future returns.**
- It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launch date is 13 October 2021.
- The B8 Acc USD launch date is 13 October 2021.
- The base currency of the Fund is EUR.

	2020	2021	2022	2023	2024
■ Liontrust GF Sustainable Future Multi Asset Global Fund B8 Acc USD			-23.7%	16.0%	3.4%
■ Liontrust SF Multi-Asset Global Index USD			-17.8%	16.9%	7.1%
