

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Short Fixed Income Lower Carbon ESG Screened Fund

Share Class: EUR Distributing Shares (ISIN: IE000TIVIXI5)

a sub fund of Dimensional Funds plc. This Fund is managed by Dimensional Ireland Limited.

Objectives & Investment Policy

The aim is to maximise total returns from the universe of debt instruments in which the Fund invests. Total return seeks to generate both income and capital appreciation.

The Fund is actively managed which means that the Investment Manager is actively making investment decisions for the Fund. The Fund is not managed in reference to a benchmark.

The Fund invests in debt (such as bonds, commercial paper, bank and corporate debt) issued by governmental, quasi-governmental, governmental agency, supranational agency issuers and companies mainly from developed countries which the Investment Manager considers to be consistent with the Fund's strategy of investing in sustainable investments.

The Fund will generally invest in debt which matures within five years.

At the time of purchase, the Fund may invest in debt considered investment grade at the time of purchase (e.g., rated BBB- or above by Standard & Poor's Rating Group ("S&P") or Fitch Ratings Ltd. ("Fitch") or Baa3 or above by Moody's Investor's Service, Inc. ("Moody's")). The Fund may invest with an emphasis on debt rated in the lower half of the investment grade spectrum (e.g., rated BBB- to A+ by S&P or Fitch or Baa3 to A1 by Moody's). The Fund may hold more lower quality securities when the Investment Manager believes that the returns warrant such investments. However, it may decrease

its level of investment in lower quality securities when the returns and level of risk do not warrant such investment.

The Investment Manager intends to take into account the impact that companies may have on the environment and other sustainability considerations when making investment decisions for the Fund. The Fund will generally exclude or underweight securities of companies that, according to the Fund's sustainability impact considerations, may be less sustainable as compared to other companies in the Fund's investment universe or companies with similar business lines. Similarly, the Fund will generally be overweight in securities of companies that may be more sustainable as compared either to other companies in the Fund's investment universe or other companies with similar business lines.

The Fund will use financial contracts or instruments (derivatives) in an attempt to protect returns against exchange rate fluctuations between both (i) the currency of your share class and the base currency of the Fund; and (ii) the currency of investments and the base currency of the Fund (hedging).

The Fund may use financial contracts or instruments (derivatives) to manage risk, reduce costs or improve returns.

Income is normally distributed annually.

You may sell your investment in the Fund on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 3 because of the low range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund may invest up to 5% of its assets in other underlying funds. The Fund's performance, costs and risks will be affected by the underlying funds. There can be no assurance that an underlying fund will achieve its investment objective.

The Fund may invest in tradeable debt (bonds), the return on which depends on the issuer's ability or willingness to make its payments. There is a risk that the issuer will fail to do so. Although the Fund generally invests in bonds with high ratings, these ratings are subjective and a high rating does not guarantee an issuer's ability or willingness to pay.

Tradeable debt (bonds) are interest rate sensitive, meaning that the range and frequency of price movements of the bonds may be significant due to various factors, including changes in interest rates, the creditworthiness of the bond issuer and the ease with which similar investments may be bought or sold (liquidity).

The Fund's sustainability impact considerations may limit the number of investment opportunities available, and as a result, at times may produce different returns or more modest gains than funds that are not subject to

such special investment conditions. Sustainability impact considerations may cause a Fund's industry allocation to deviate from that of funds without these considerations and of conventional benchmarks.

The Fund may use financial contracts (known as derivatives) for various reasons, including to try to reduce the effect of currency fluctuations between the currency of its assets and the currency of the share class, or to reduce the effect of market or interest rate movements (known as hedging). The effectiveness of any hedging strategy is not guaranteed to succeed and may prevent the Fund from benefitting from an increase in value of a particular currency.

Derivatives can be a risky asset. They can be subject to risks such as counterparty, liquidity, interest rate, market, credit and management risks and improper valuation. The Fund, in turn, may be affected by this and the share price may fluctuate, which may result in a loss to the Fund.

The Fund may enter into various financial contracts (derivatives) with another party. There is a risk that this party will become insolvent or fail to make its payments which may result in the Fund and your investment suffering a loss.

Where the Fund uses futures or forward foreign currency contracts (derivatives), it may become exposed to certain investment risks including leverage, market, mismatching of exposure and/or counterparty risk, liquidity, interest rate, credit and management risks and the risk of improper valuation. While the Fund is not expected to have exposure to leverage to a material degree, any movement in the price of these investments can have a significant impact on the value of the Fund and the Fund could lose more than the amount invested.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the Fund over a year	
Ongoing charges	0.25%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less, you can find this out from your financial adviser or distributor.

The ongoing charges figure is based on expenses for the year ending November 2024. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.

No conversion fee will be charged by the Fund or the investment manager.

Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2021 and the share class was launched in 2021.

Past performance has been calculated in EUR.
