

This document provides you with the key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

WS Ruffer Gold Fund (the "Fund"),

a fund within WS Ruffer Investment Funds (the "Company")
Waystone Management (UK) Limited is the Authorised Corporate Director of the Fund.

I Accumulation (ISIN: GB00B03VWY73)

Objective and Investment Policy

Objective

To achieve capital growth (an increase in the value of the Fund) over the longer term (at least five years) after all costs and charges have been taken.

Capital invested is at risk and there is no guarantee that the objective will be met over any time period.

Investment Policy

To invest at least 70% globally, including emerging markets (which are countries whose economies are progressing towards becoming advanced) in equities (company shares) and equity related securities in gold and precious metal related companies.

The Fund may also invest up to 30% in commodities (such as precious metals), investment and non-investment grade bonds (loans to either a company or government or public body that usually pay interest, the risk of default is lower on bonds rated as investment grade, than it is on non-investment grade bonds), equities (including equity related securities), treasury bills, money market instruments (which are short term loans that pay interest) and cash. Investment in open-ended Funds is limited to 10% of the Fund.

The Investment Manager combines asset allocation and security selection in seeking to meet the objective. Asset allocation and security selection is influenced by the Investment Manager's expectations of macro-economic, financial market conditions and valuation anomalies amongst gold and precious metal related securities.

Other features of the Fund:

The Fund is actively managed. The Investment Manager uses its expertise to select investments for the Fund and has the discretion to invest without the need to adhere to a particular benchmark.

The Fund can invest in other funds (including those managed by the Manager, the Investment Manager and its associates).

The Fund can invest across different geographic areas and industry sectors without limitation.

You can buy and sell shares in the Fund on each Wednesday which is a business day and the last business day of each month.

Any income generated from the Fund is reinvested and reflected in the value of your investment.

Derivatives (whose value is linked to that of another investment, e.g. company shares, currencies) may be used for investment purposes and to manage the risk profile of the Fund.

The Fund will not invest directly in alternative assets, but by using for example other Funds.

In extraordinary market conditions which could result in significant loss, the Fund has the ability to invest up to 75% in lower risk assets such as cash.

Recommendation: This Fund may not be suitable for investors who plan to withdraw their money within 5 years. More information on the management of this portfolio can be found at www.waystone.com.

Risk and Reward Profile

This indicator shows how much the Fund has risen and fallen in the past, and therefore how much the Fund's returns have varied. It is a measure of the Fund's volatility.

The higher a Fund's past volatility, the higher its position on the scale and the greater the risk that investors may have experienced losses as well as gains.

The Fund has been classed as 7 because its volatility has been measured as high.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward profile shown is not guaranteed to remain the same and may change over time.

The lowest number on the scale does not mean that the Fund is risk-free.

The value and income from the Fund's assets may go down as well as up. This will cause the value of your investment to fall as well as rise.

- **Currency Risk:** As the Fund invests in overseas securities, movements in exchange rates, when not hedged, cause the value of your investments to increase or decrease. Currency hedging, where applied, may not fully eliminate this risk and mismatches can occur.

- **Counterparty Risk:** The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.

- **Emerging Markets Risk:** The Fund may invest in emerging markets, which are markets in developing countries. These markets may be more

volatile than developed markets and may have less well-developed regulatory systems and disclosure standards. Emerging markets may have more political and economic risks that may result in large and frequent price movements. There is also a higher risk of liquidity issues or counterparty defaults, which could cause a loss to the Fund.

- **Change in Interest Rate Risk:** A rise in interest rates generally causes bond prices to fall. The value of fixed interest securities may also be affected by trends in interest rates, inflation and credit ratings.

- **Credit Risk:** The value of a bond or other fixed interest security may be affected by its credit rating. A lower credit rating increases the risk that the issuer may not pay interest or repaying the loan. Fixed interest securities are also influenced by trends in interest rates and inflation, which can cause their value to fluctuate.

- **Liquidity Risk:** The Fund may invest in assets such as corporate bonds or shares in smaller companies, that could become difficult to buy or sell in adverse market conditions. This may delay or restrict the Fund's ability to meet redemption requests and could negatively affect the Fund's value.

- **Derivative Risk:** The Fund may use derivatives, which can be complex instruments. A derivative may not perform as expected and can create losses greater than its initial cost. A relatively small movement in value of the underlying investment may have a much larger impact, positive or negative, on the value of the Fund than if the Fund held the underlying investment directly.

- **Alternative Investment Risk:** The Fund may invest in other investment vehicles to gain indirect exposure to alternative assets. These may include, where applicable, commodities, precious metals, real estate, private equity or other illiquid strategies. Such investments can involve a higher degree of risk and may be more volatile, which could increase the risk of loss. There is also a possibility of delays in receiving redemption proceeds.

For more information about the Fund's risks, please see the Risk Factors section of the prospectus which is available at www.waystone.com.

Charges for this Fund

The charges you pay are used to cover the costs of running the Fund, including marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge	5.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested/before the proceeds of your investment are paid out. In some cases, you may pay less. Please check with your financial adviser or distributor for the actual charges.

Charges taken from the Fund over the year

Ongoing Charges	1.04%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance Fee	None
-----------------	------

The ongoing charges figure is based on expenses as at 15 September 2025. This figure may vary from year to year.

The ongoing charges are taken from the income of the Fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

Where open-ended funds are a material portion of the Fund's portfolio we also include their ongoing charges in the calculation.

You may also be charged a dilution adjustment (an adjustment to cover dealing costs incurred by the Fund) on entry to or exit from the Fund.

For more information about charges (including any charges applied to the offset dealing costs), please refer to the Company's Prospectus, available at www.waystone.com.

Past Performance

Past performance is not a guide to future performance.

The past performance in the chart is net of tax and charges but excludes any entry or exit charges that may apply.

The Fund was launched on 1 October 2003. This share class was launched on 7 December 2005.

Past performance is calculated in GBP.
