INVESTOR NOTIFICATION

There are two ways in which Liontrust and other asset managers show the costs of funds: the UCITS Ongoing Costs Figure and the MiFID Ongoing Cost. From 1 February 2025, the MiFID Ongoing Cost displayed for this Liontrust Fund will exclude the costs of UK-listed closed-ended investment funds listed on a UK regulated market. For explanations of the fund charges, please visit the Costs and Charges page on the Liontrust website: [Costs and charges | Liontrust Asset Management PLC](#).

¹The Ongoing Charges Figure (OCF) covers all aspects of operating a fund during the course of its financial year. These include the annual charge for managing the fund, administration and independent oversight functions, such as trustee, depository, custody, legal and audit fees and the ongoing costs of underlying investments including open and closed ended collective investment schemes. The OCF excludes portfolio transaction costs except for an entry/exit charge paid by the Fund when buying or selling units in another fund. This will have an impact on the realisable value of the investment, particularly in the short term. ²These are the annual costs of running and managing the Fund. There is currently no charge for switching funds, however the number of switches is limited to a max of one per calendar month.

MA EXPLORER 35 FUND

KEY RISKS

Past performance does not predict future returns. You may get back less than you originally invested. We recommend this fund is held long term (minimum period of 5 years). We recommend that you hold this fund as part of a diversified portfolio of investments.

Overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund. Bonds are affected by changes in interest rates and their value and the income they generate can rise or fall as a result;

The creditworthiness of a bond issuer may also affect that bond's value. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may have difficulty in paying their debts. The value of a bond would be significantly affected if the issuer either refused to pay or was unable to pay.

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss; Liquidity Risk: If underlying funds suspend or defer the payment of redemption proceeds, the Fund's ability to meet redemption requests may also be affected; Derivatives Risk: Some of the underlying funds may invest in derivatives, which can, in some circumstances, create wider fluctuations in their prices over time; Emerging Markets: The Fund may invest in less economically developed markets (emerging markets) which can involve greater risks than well developed economies.
