

Asian High Yield Fund

Class I5 (CHF Hedged) Acc

The Fund

Investment objective

The Asian High Yield fund aims to maximize total returns from a combination of capital appreciation and income generation.

Policy

The Fund invests at least 70% of its net assets in higher-yielding debt securities of corporations, governments, agencies and supra-nationals in Asia and rated below investment grade.

Philosophy

We believe that consistently attractive risk-adjusted returns can be generated in Asian High Yield markets by seeking to exploit credit opportunities within a risk-controlled investment approach. We also believe leveraging on our extensive on-the-ground proprietary research and ESG capabilities provides us with an informational advantage over our peers.

Risks

All investments involve risk, including the possible loss of principal. There is no guarantee investment objectives will be met. Past performance is not indicative of future results. Investment return and principal value will fluctuate so shares, when redeemed, may be worth more or less than their original cost.

Political and Regulatory Risk: changes to government policies or legislation in the markets in which the Fund invests may adversely affect the stability of such markets, limiting the repatriation of foreign capital or the availability of legal redress through the courts. Investments in certain markets may also require the procurement of a substantial number of licences, regulatory consents or approvals. This could adversely affect the value of investments in the Fund.

Credit Risk: there is a risk that a debt issuer will default, by failing to repay principal and interest in a timely manner, or that negative perceptions of the issuer's ability to make such payments will cause the price of that bond to decline.

High-Yield Bonds Risk: the Fund may invest in higher-yielding debt securities rated lower than investment grade, or if unrated, their equivalent. As such, an investment in the Fund is accompanied by a higher degree of credit risk, volatility and liquidity risks than high rated debt securities.

Emerging Markets Risk: the investment of the Fund may be exposed to higher risks than in developed economies or markets.

Liquidity and Volatility Risks: during certain times, the Fund's investments may become difficult to sell for full value or at all, which could affect performance and could result in delays when you sell your shares.

People's Republic of China Investment Risk: investing in the securities markets in Mainland China is subject to the risks of investing in emerging markets generally as well as to specific risks relating to the Mainland China market.

Use of Financial Derivatives Instruments (FDIs): the Fund intends to use financial derivative instruments ("FDIs") for investment, efficient portfolio management and/or hedging purposes.

For a more detailed explanation of risks, please refer to the **"General Risk Factors"** section and **"Appendix I"** of the Prospectus.
