

Key Information Document

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Class W USD Accumulating IE00BY08M15

Manulife U.S. All Cap Core Equity Fund

a sub-fund of Manulife Investment Management II ICAV.

The Central Bank of Ireland is responsible for supervising Manulife Investment Management (Ireland) Limited (the "Management Company") in relation to this Key Information Document. The ICAV is managed by the Management Company. The ICAV and Management Company are each authorised in Ireland and regulated by the Central Bank of Ireland. The Management Company acts as the PRIIP Manufacturer.

For more information on this product, please refer to ucits.manulifeim.com/ or call +353 1 5841503.

This document was produced on 15 November 2024.

What is this product?

Type: This product is a UCITS fund authorised in Ireland and regulated by the Central Bank of Ireland.

Term: This product is not subject to any fixed term.

Objectives:

Objectives and Investment Policy This product aims to achieve long term capital appreciation by primarily investing directly in equities, equity related securities, and convertible securities of companies domiciled in the U.S. Its investments will be diversified across sectors, and without any industry or capitalisation focus. The fund may also invest indirectly through specialist financial techniques (known as derivatives). The fund may use derivatives for hedging and efficient portfolio management but not for leverage as an investment strategy. Nevertheless, although expected to be limited, the use of derivatives may introduce constant leverage to the Fund in order to hedge currency exposure or for risk management. The level of leverage may vary depending on the exposure to non-base currency and the risk appetite of the portfolio manager. The Fund's leverage will not exceed 100% of the Fund's Net Asset Value, as measured using the commitment approach. It may also invest up to 10% of its assets in other UCITS and ETFs.

Fund Benchmark The Fund employs an actively managed investment strategy. The Fund uses the Russell 3000 Index as a benchmark for performance comparison purposes only and does not track the performance of the benchmark, but is managed in reference to a benchmark.

Dealing Frequency You may buy and sell shares on any day on which the Irish Stock Exchange and New York Stock Exchange are open for regular business. The Fund holiday calendar is available from the Administrator.

Distribution Policy This share class does not pay out a distribution. Any investment income generated will be reinvested.

Depository: Citi Depository Services Ireland DAC

Further Information: This describes Manulife U.S. All Cap Core Equity Fund, which is a sub-fund of Manulife Investment Management II ICAV. The assets of this Fund are segregated from those of other sub-funds of Manulife Investment Management II ICAV which means that they cannot be used to pay the liabilities of other sub-funds of Manulife Investment Management II ICAV. The prospectus and annual reports relate to Manulife Investment Management II ICAV. Exchange rights into other sub-funds and relevant charges are detailed in the prospectus. You can find the fund's prospectus and annual reports in our 'Documents' section on our website. Please visit our website to view fund prices.

Intended retail investor:

This product is designed to be purchased with advice and should form part of a broader portfolio of investments. The product is suitable for investors including those with a basic knowledge of financial instruments, who are comfortable with the level of risk in the risk indicator section. Investors must be able to bear capital loss and should have an investment time horizon of at least five years.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level and poor market conditions will likely impact the value of your investment.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the product's Annual Report or Prospectus available at the website listed above.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of this share class (where the class has been in existence under 10 years, supplemented by the performance of another class of the Fund with an earlier inception date, if appropriate, and further, by the share class benchmark where necessary to complete a period of 10 years). The stress scenario shows what you might get back in extreme market circumstances. The unfavourable scenario occurred for an investment between December 2021 and June 2024, the moderate scenario occurred for an investment between June 2018 and June 2023, and the favourable scenario occurred for an investment between October 2016 and October 2021. Markets could develop very differently in the future.

Recommended Holding Period: 5 years
Investment: USD 10,000

Scenarios		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress	What you might get back after costs	750 USD	770 USD
	Average return each year	-92.47%	-40.15%
Unfavourable	What you might get back after costs	7,580 USD	11,340 USD
	Average return each year	-24.24%	2.55%
Moderate	What you might get back after costs	11,120 USD	17,260 USD
	Average return each year	11.22%	11.54%
Favourable	What you might get back after costs	18,140 USD	23,920 USD
	Average return each year	81.44%	19.06%

What happens if Manulife Investment Management (Ireland) Limited is unable to pay out?

The Fund does not include any protection from future market performance, so you could lose some or all of your investment. These losses may be covered by the Irish Investor Compensation Company DAC, subject to certain limitations. However, your investments are deposited with a third party custodian bank, which means that in case of default of Manulife Investment Management (Ireland) Limited, you should be able to get back the current value of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0% annual return). For the recommended holding period, we have assumed the Fund performs as shown in the moderate scenario.

Investment: USD 10,000	If you exit after 1 year	If you exit after 5 years
Total costs	117 USD	936 USD
Annual cost impact (*)	1.2%	1.2%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12.8% before costs and 11.5% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	0 USD
Exit costs	Maximum of 3% of your investment before it is paid out to you. These costs would only apply if the Fund's Board of Directors makes a determination to impose a redemption charge in accordance with the Prospectus. As of the date of this document, the Fund's Board of Directors has never made such a determination.	0 USD
Ongoing costs taken each year		If you exit after 1 year
Management fees and other administrative or operating costs	1.1% of the value of your investment per year. This reflects a commitment by the Management Company to keep this category of costs from exceeding this amount. This commitment may be lifted upon prior notice to shareholders.	105 USD
Transaction costs	0.1% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	12 USD
Incidental costs taken under specific conditions		If you exit after 1 year
Performance fees	There is no performance fee for this product.	0 USD

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

This product has no required minimum holding period but is designed for long-term investment. Since the value of investments can rise and fall over differing time periods, you should have an investment horizon of at least 5 years when buying an investment of this type.

The minimum recommended holding period is therefore 5 years. You can request to take out some or all of your money at any time. You can typically request to buy or sell shares in the Fund on any business day (as set out in the Fund's prospectus).

How can I complain?

For information on the complaints handling process, please refer to the Manulife Investment Management (Ireland) Limited Complaints Management Policy at the website listed above.

Complaints may be referred in writing to the Management Company, 2/f, 5 Earlsfort Terrace, Dublin 2 D02 CK83, Ireland, or via e-mail at Complaints.IrishFunds@manulife.com.

You may also have recourse to refer the complaint to the Financial Services and Pensions Ombudsman Service. Complaints about a person advising on or selling the Product should be pursued with that person.
