

Key Investor Information

This document provides you with the key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Blue Whale Growth Fund (the "Fund"),

a sub-fund within Blue Whale Investment Funds ICAV
Waystone Management (IE) Limited is the Manager of the Fund.

Class R EUR Accumulation (ISIN: IE00BJM0B969)

Objective & Investment Policy

Objective

The objective of the Fund is to seek capital growth.

Investment Policy

To invest in equity and equity related securities from a broad range of locations and sectors, both in developed and emerging markets. The Fund will have a concentrated portfolio, generally comprising 25 – 35 listed stocks, principally in equities, based on detailed research by the Investment Manager.

Other features of the Fund:

The Fund is actively managed.

The Fund's performance will be compared against the IA Global Sector. The IA Global Sector is a group of UK funds in the same sector grouped together by the UK Investment Association (the trade body that represents UK investment managers).

The Fund can invest across different geographic areas and industry sectors without limitation. Aggregate investment in emerging markets shall not exceed 20% of NAV.

You can buy and sell shares in the Fund on each business day.

Any income generated from the Fund is reinvested and reflected in the value of your investment.

The Fund may invest in other open-ended collective investment schemes, to a maximum of 10% of the Fund's overall NAV.

The Fund may invest in money market funds or instruments for liquidity or defensive purposes.

The Fund can take exposure of up to 100% of its NAV through use of financial derivative instruments (FDI).

The base currency of the Fund is US Dollars.

Currency hedging arrangements may be used to reduce the risk of currency movements in the value of securities held by the Fund which are not denominated in US Dollars.

Recommendation: This Fund may not be suitable for investors who plan to withdraw their money within 5 years. More information on the management of this portfolio may be obtained from the address provided in the 'Practical Information' section below.

Risk and Reward Profile

This indicator shows how much the Fund has risen and fallen in the past, and therefore how much the Fund's returns have varied. It is a measure of the Fund's volatility.

The higher a Fund's past volatility, the higher its position on the scale and the greater the risk that investors may have experienced losses as well as gains.

The Fund has been classed as 6 because its volatility has been measured as above average to high.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward profile shown is not guaranteed to remain the same and may change over time.

The lowest number on the scale does not mean that the Fund is risk-free.

The value and income from the Fund's assets may go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the Fund will achieve its objective and you may get back less than you originally invested.

- **Equity Market Risk:** As the Fund's portfolio is concentrated and consists principally of equities, it will likely exhibit greater volatility than other asset classes.
- **Currency Risk:** As the Fund invests in overseas securities, movements in exchange rates, when not hedged, cause the value of your investments to increase or decrease. Currency hedging, where applied, may not fully eliminate this risk and mismatches can occur.
- **Concentration Risk:** The Fund intentionally holds a relatively small number of investments and may also invest in securities within a particular industry, sector or geographical focus. This means that the performance of a single investment, industry, sector or region may have a greater impact on the Fund's value. The value of the Fund may therefore be subject to large swings (both up and down) compared to a more diversified portfolio.

Charges for this Fund

The charges you pay are used to cover the costs of running the Fund, including marketing and distribution. These charges reduce the potential growth of your investment.
