

# U.S. Small Cap Equity Fund

**Class I5 GBP Acc**

## The Fund

### Investment objective

The US Small Cap Equity Fund aims to make diversified investments. Additionally, the fund manager aims to achieve capital growth.

### Policy

The Fund invests at least 70% of its net assets in equity securities of small-capitalization companies in the U.S. The investment team considers small-capitalization companies to be those that, at the time of investment, are in the capitalization range of the Russell 2000 Index. Equity securities include common and preferred stocks, rights, warrants, and depositary receipts.

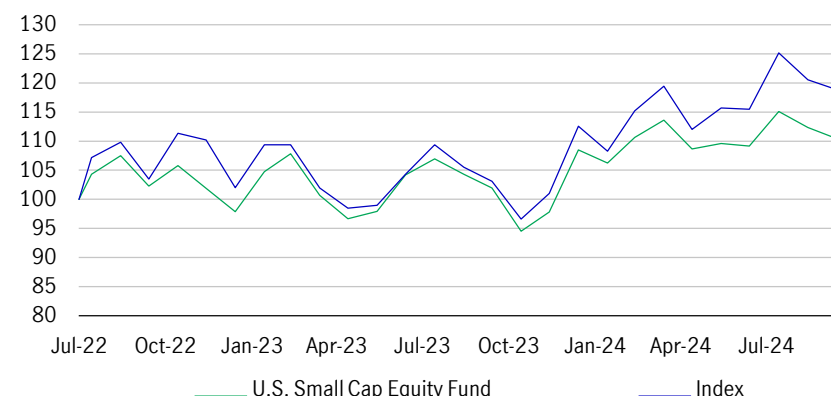

### Philosophy

The team believes that fundamentals matter over a market cycle and that high-quality companies will provide superior risk-adjusted returns over the long term. To that end, they invest primarily in the stocks of small-cap companies with durable, niche business models that they believe are undervalued and offer the potential for high returns on capital.

## Risks

**All investments involve risk, including the possible loss of principal. There is no guarantee investment objectives will be met. Past performance is not indicative of future results.**

**Small Cap Risk:** Investments in securities of small and medium sized companies may involve greater risk than is customarily associated with investment in larger and more established companies.

**Natural Resources Sector Risk:** by focusing on the natural resources sector, some Funds carry much greater risks of adverse developments than a Fund that invests in a wider variety of industries.

**Geographical Concentration Risk:** the concentration of the Fund's investments in US related companies may result in greater volatility than portfolios which comprise broad based global investments. The value of the Fund may be more susceptible to adverse events in the region.

**Liquidity and Volatility Risks:** the Fund may invest in companies which are less well established in their early stages of development. These companies may often experience significant price volatility and low liquidity due to the low trading volume of their securities. During certain times, the Fund's investments may become difficult to sell for full value or at all, which could affect performance and could result in delays when you sell your shares.

**Use of Financial Derivatives Instruments (FDIs):** the Fund intends to use financial derivative instruments ("FDIs") for investment, efficient portfolio management and/or hedging purposes.

For a more detailed explanation of risks, please refer to the "General Risk Factors" section and "Appendix I" of the Prospectus.
