

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Sanlam Global Emerging Markets Fund – Class B2 (USD)

A sub-fund of Sanlam Universal Funds plc (the "Company")

Managed by Sanlam Asset Management (Ireland) Limited

ISIN: IE00BWVG2822

Objectives and Investment Policy

Investment Objective

The investment objective of the Sanlam Global Emerging Markets Fund (the "Fund") is to increase the value of your shares over the long term by seeking to outperform the performance of the MSCI Emerging Markets TR Net Index (the "Index"). The Fund will aim to outperform the Index on a three year basis.

Investment Policy

The Fund is actively managed and will invest up to 100% of its assets in companies listed or traded in emerging and frontier markets. The Fund's investments will not be limited to sector or capitalisation restrictions.

The Fund may invest up to 20% of its Net Asset Value in money market instruments and liquid assets such as cash and cash equivalents.

The Fund may also invest up to 20% of its NAV in other UCITS Funds.

The Fund may use financial derivative instruments (FDI) in the form of futures and options. FDI may be used for efficient portfolio management purposes. FDI are financial instruments the value of which is linked to the expected future price movements on underlying assets.

The Company does not declare a dividend and therefore your shares do not pay you income.

The Fund measures its performance relative to a benchmark index (MSCI EM Index in USD) for reference or investor communication purposes,

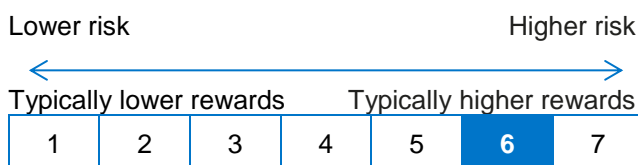

including in the Company's annual and half-yearly reports. As the Investment Manager seeks to outperform the benchmark over a three year basis, the Fund is managed in reference to the benchmark.

Further information on sustainability factors that may be relevant to this Fund can be found in the prospectus or on our website at www.sanlam.ie

You can buy and sell your shares in the Fund any day (except Saturday or Sunday) that banks are open in Dublin.

Recommendation: The Fund is suitable for investors with a time horizon of 5 years.

Risk and Reward Profile

Why is this Fund in category 6?

The Fund is rated 6 due to its exposure to shares and stocks, and to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

The price of shares and the income from them may fall as well as rise and investors may not get back the amount they have invested.

The Fund may invest in companies based in emerging and frontier markets which may involve additional risks not typically associated with other more established markets such as increased risk of social, economic and political uncertainty.

Liquidity Risk: when dealing in emerging and frontier markets the accumulation and disposal of holdings in some investments may be time consuming and may need to be conducted at unfavourable prices.

It may be difficult for the Fund in extreme market condition to redeem its shares from a CIS at short notice without suffering a loss.

Investing in a CIS may lead to payment by the Fund of additional fees and expenses in relation to those CIS.

As the investments of the Fund are in various currencies and the Fund is denominated in U.S. dollars your shares may be subject

to currency risk.

What do these numbers mean?

They rate how a fund might behave and how much risk there is to your capital. Generally, the chance to make large gains means a risk of suffering large losses.

A **Category 1** fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a **Category 7** fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex (for example, 2 is not twice as risky as 1).

More about this rating:

This rating system is based on the average fluctuations of the prices of funds over the past 5 years - that is, by how much the value of their assets taken together has moved up and down. Historical data, such as is used in calculating the synthetic risk indicator, may not be a reliable indication of the future risk profile of the Fund.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

Charges

These charges are used to pay the costs of running the Fund, including the costs of marketing and selling. Overall, they reduce the growth of your investment.

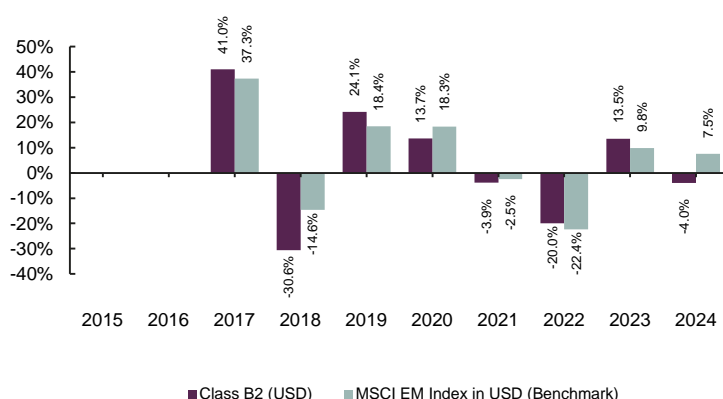

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	None
Switching charge	2.00%
This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charge	1.14%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on the expenses for the previous 12 month period ending December 2024. This figure, which excludes portfolio transaction costs, may vary from year to year.

You can find out more details about the charges by looking at the "Charges and Expenses" section of the prospectus.

Past Performance

Past performance is not a reliable indicator of future performance.

The past performance takes account of all charges and costs, excluding entry and exit charges.

The performance of this class is calculated in US Dollars.

The Fund launched on 2 June 2015. This class started to issue shares on 5 December 2016.
