

Liontrust GF High Yield Bond Fund

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust GF High Yield Bond Fund is a sub-fund of Liontrust Global Funds plc. The Management Company is FundRock Management Company (Ireland) Limited. This document is based upon the B1 Acc USD (ISIN: IE00BFXZFF67)

Objective and Investment Policy

- To maximise total returns over the long term through a combination of income and capital. The Fund will invest predominantly in high yield and selected investment grade bond and credit markets worldwide (including developed and emerging markets).
- There is no guarantee that a total return will be generated over any time period.
- The Fund invests in global high yield bonds which are denominated in US Dollar or hedged back into US Dollar. The Fund may also invest in other eligible asset classes as detailed within the prospectus.
- The Fund considers environmental, social and governance ("ESG") characteristics of issuers.
- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am (Irish time) for execution at 12:00 midday valuation point on the same day.
- The Fund will invest in derivatives but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. The

use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead.

- The process is designed to take advantage of inefficiencies in fixed income markets through a thorough understanding of the economic environment and detailed bottom up stock analysis.
- The process uses the same framework to garner a thorough understanding of the economic environment and for bottom up stock analysis: fundamentals, valuations and technicals (FVT).
- These three factors are examined regardless of whether the managers are considering a duration position or an investment in a speculative grade rated company. In judging whether a company is an attractive long-term investment, the managers analyse the following factors, which they call PRISM.
- Protections:** operational and contractual, such as structure and covenants.
- Risks:** credit, business and market. Interest cover: leverage and other key ratios.
- Sustainability:** of cash flows and environmental, social and governance (ESG) factors.
- Motivations:** of management and shareholders. While the Fund has neutral target levels of duration risk and asset allocation, the investment team takes a high conviction approach which can lead positioning to diverge significantly from neutral levels and benchmark profiles. This results in periods when investment performance diverges from benchmark indices.

Risk and Reward Profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund is categorised 5 primarily for its exposure to a diversified portfolio of high yield bonds along with a number of derivative positions.
- The Fund's risk and reward category has been calculated using the methodology approved by the Financial Conduct Authority. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address below) or online at www.liontrust.com.
- The Fund's volatility limits are calculated using the Value at Risk (VaR) methodology. In high interest rate environments the Fund's implied volatility limits may rise resulting in a higher risk indicator score. The higher score does not necessarily mean the Fund is more risky and is potentially a result of overall market conditions.

- The SRRI may not fully take into account the following risks:
 - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
 - Bonds are affected by changes in interest rates and their value and the income they generate can rise or fall as a result;
 - the creditworthiness of a bond issuer may also affect that bond's value. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers (high yield) may have difficulty in paying their debts. The value of a bond would be significantly affected if the issuer either refused to pay or was unable to pay.
- Credit Counterparty Risk:** the Fund uses derivative instruments that may result in higher cash levels. Outside of normal conditions, the Fund may choose to hold higher levels of cash. Cash may be deposited with several credit counterparties (e.g. international banks) or in shortdated bonds. A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- Emerging Market Risk:** the Fund may invest in emerging markets which carries a higher risk than investment in more developed countries. This may result in higher volatility and larger drops in the value of the fund over the short term.
- Liquidity Risk:** the Fund may encounter liquidity constraints from time to time. Participation rates on advertised volumes could fall reflecting the less liquid nature of the current market conditions.
- ESG Risk:** there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.

Charges

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
5.00% Is the maximum that may be taken out of your money before it is invested, at the discretion of the Fund Directors. In some cases, you may pay less or nil.	
Charges taken from the Fund over the year	
Ongoing Charges	0.97%
Charges taken from the Fund under certain specific circumstances	
Performance Fee	None

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. They reduce the potential growth of your investment.
- The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.
- The ongoing charges figure is based on expenses as at 2 January 2026. This figure may vary from year to year. It excludes:
 - portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units/shares in another collective investment undertaking.
- For more information about charges and what is included in each charge, please see the Fund's prospectus, which is available electronically at www.liontrust.com, or visit the costs and charges page on our website at www.liontrust.com/costs-and-charges.

Past Performance

- Past performance does not predict future returns.**
- It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launch date is 8 June 2018.
- The B1 Acc USD launch date is 8 June 2018.
- The base currency of the Fund is USD.

	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024
■ Liontrust GF High Yield Bond Fund B1 Acc USD					15.3%	5.2%	3.4%	-13.2%	13.4%	9.9%
■ ICE BofAML Global High Yield Hedge USD					14.5%	6.6%	3.0%	-11.4%	13.0%	9.3%
