# Sustainable Asia Bond Fund

#### Class I5 (EUR Hedged) Acc

#### The Fund<sup>1</sup>

**Objective:** the Sustainable Asia Bond Fund aims to maximize total returns by investing in issuers and/or securities demonstrating strong environmental and/or social sustainability attributes and/or enabling sustainable practices.

**Policy:** the Fund is actively managed and will invest at least 85% of its net assets in fixed income securities in Asia (including Australia and New Zealand) which are 1) issued by Sustainable Issuers and/or 2) ESG labelled bonds including but not limited to "green", "social", "sustainable", "sustainability-linked". It will invest a minimum of 25% in ESG bonds and may invest up to 35% in debt securities rated lower than investment grade, up to 15% of sustainable issuers outside Asia and up to 10% in PMB denominated debt securities circulated in China Bond Connect to 10% in RMB-denominated debt securities circulated in China Bond Connect.

**Philosophy:** the Fund features a fully integrated ESG portfolio that applies exclusion screening to avoid controversial sectors and positive tilts towards issuers with the potential to deliver positive social and environmental impact. We believe leveraging our extensive on-the-ground proprietary Asian credit research and ESG capabilities provides us with an informational advantage over our peers.

Source: Manulife Investment Management, MSCI, S&P Trucost. \*Please refer to definitions. ESG characteristic values for both portfolio and benchmark are calculated on corporate debt holdings only, exclusive of cash, derivatives, sovereign/sub-sovereign and asset backed securities. If only a subset of the securities in a portfolio or benchmark are in coverage, the weights are readjusted by Manulife Investment Management to add up to 100%. 1 Carbon intensity data is the most current data available from S&P Trucost, which typically lags by one fiscal year due to the nature of publicly available emissions disclosure across industries and with individual companies. 2 ESG themed bonds refer to "dedicated" bonds from which proceeds are specifically used for environmental, social and/or sustainability projects.

#### **Definitions**

- **Carbon intensity:** Carbon intensity is measured on a weighted average basis for companies held and allows investors to know how efficient the portfolio is in terms of carbon (GHG) emissions (tons) per unit of sales revenue (US\$1,000,000). Scope 1 emissions are direct emissions from owned or controlled sources. Scope 2 emissions are indirect emissions from the generation of purchased energy.
- Women on board: Weighted average percentage of women on the board of the holdings.
- Board independence: Weighted average percentage of independent board of directors of the holdings.
- CEO/Chair separation: Weighted average percentage of holdings where there is a separation of CEO and Chairperson.

Portfolio characteristics including holdings, sector weightings and market capitalization are subject to change at any time. Ongoing market volatility can dramatically impact short term returns. All material is compiled from sources believed to be reliable and correct, but accuracy cannot be guaranteed.

#### Risks

All investments involve risk, including the possible loss of principal. There is no guarantee investment objectives will be met Past performance is not indicative of future results. Investment return and principal value will fluctuate so shares, when redeemed, may be worth more or less than their original cost.

Risks associated with investments in debt instruments with loss-absorption features (including Contingent Convertible Debt Securities): debt instruments with loss-absorption features present more significant risks relative to traditional debt securities particularly given that instruments of this type can be written down or converted to equity as the result of the triggering of predetermined criteria relating to solvency and/or regulatory required capital levels, that may be beyond the control of the issuer.

**Credit Risk:** there is a risk that a debt issuer will default, by failing to repay principal and interest in a timely manner, or that negative perceptions of the issuer's ability to make such payments will cause the price of that bond to decline.

**Risks Relating to Sustainable Investing:** since the Fund invests primarily in issuers demonstrating sustainability characteristics, this carries the risk that, under certain market conditions, the Fund may perform differently compared to funds that do not utilize a sustainable investment strategy.

**High-Yield Bonds Risk:** the Fund may invest in higher yielding debt securities rated below investment grade, or if unrated, their equivalent.

**Use of Financial Derivatives Instruments (FDIs):** the Fund may use FDIs to manage risk and manage the Fund more effectively. The use of derivatives exposes the Fund to additional risks, including volatility risk, management risk, market risk, credit risk and liquidity risk.

**Emerging Markets Risk:** the investment of the Fund may be exposed to higher risks than in developed economies or markets.

**Mainland China Investment Risk:** investing in securities issued or guaranteed by issuers in Mainland China is subject to the risks of investing in emerging markets generally as well as to specific risks relating to the Mainland China market.

**Liquidity and Volatility Risks:** during certain times, the Fund's investments may become difficult to sell for full value or at all, which could affect performance and could result in delays when you sell your shares.

For a more detailed explanation of risks, please refer to the **"General Risk Factors"** section and **"Appendix I"** of the Prospectus.
