

PORTFOLIO FACTSHEET

WSS DYNAMIC PASSIVE 10

Covering the month of March 2025 | Defaqto risk rating 10

THE PORTFOLIO

The portfolio aims to generate capital growth greater than the rate of inflation (CPI) over the long term (more than five years) with a high level of volatility. Close to all of the portfolio invests in equities, the majority (around 90%) of which is in Asia and emerging markets. Around half of the rest of the portfolio invests in smaller companies listed in developed markets. A very small proportion of the portfolio may be allocated to cash and money market funds, alternatives, commodities and fixed income. The portfolio predominantly, although not exclusively, uses passive strategies.

PERFORMANCE SINCE LAUNCH (%)

*Expected Volatility is expressed as the annualised standard deviation of monthly returns. **Since launch figures are from 31 August 2012. ***Source: Financial Express & Morningstar, as at 31.03.25, total return, net of fees, income reinvested. All performance numbers shown relate to the class, and where the fund has launched prior to the share class, factsheets demonstrating the longer term performance of the fund are available. These are not formal benchmarks but are proxies for equities, bonds, cash and inflation. The Weighted OCF is 0.16%. It represents the costs of investing into the underlying assets (not including any potential front/end/redemption fees) during the course of the assets' financial year. Any fees payable to the Discretionary Investment Manager (DIM), the Platform and the IFA are excluded. The DIM fee is 0.22%.

KEY RISKS

Past performance does not predict future returns. You may get back less than you originally invested. We recommend this fund is held long term (minimum period of 5 years). We recommend that you hold this fund as part of a diversified portfolio of investments.

The Model Portfolios managed by the Multi-Asset Team may be exposed to the following risks:

Credit Risk: There is a risk that an investment will fail to make required payments and this may reduce the income paid to the fund, or its capital value. The creditworthiness of a bond issuer may also affect that bond's value. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may have difficulty in paying their debts. The value of a bond would be significantly affected if the issuer either refused to pay or was unable to pay;

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss;

Liquidity Risk: If underlying funds suspend or defer the payment of redemption proceeds, the Fund's ability to meet redemption requests may also be affected;

Interest Rate Risk: Fluctuations in interest rates may affect the value of the Fund and your investment. Bonds are affected by changes in interest rates and their value and the income they generate can rise or fall as a result;

Derivatives Risk: Some of the underlying funds may invest in derivatives, which can, in some circumstances, create wider fluctuations in their prices over time;

Emerging Markets: The Fund may invest in less economically developed markets (emerging markets) which can involve greater risks than well developed economies;

Currency Risk: The Fund invests in overseas markets and the value of the Fund may fall or rise as a result of changes in exchange rates. **Index Tracking Risk:** The performance of any passive funds used may not exactly track that of their Indices.

Any performance shown in respect of the Model Portfolios are periodically restructured and/or rebalanced. Actual returns may vary from the model returns.

DISCLAIMER

This document is issued by Liontrust Investment Partners LLP (2 Savoy Court, London WC2R 0EZ), authorised and regulated in the UK by the Financial Conduct Authority (FRN 518552) to undertake regulated investment business.

It should not be construed as advice for investment in any product or security mentioned, an offer to buy or sell investments mentioned, or a solicitation to purchase securities in any company or investment product. Examples of stocks and funds are provided for general information only to demonstrate our investment philosophy.

The document contains information and analysis that is believed to be accurate at the time of publication, but is subject to change without notice. Whilst care has been taken in compiling the content of this document, no representation or warranty, whether express or implied, is made by Liontrust as to its accuracy or completeness, including for external sources (which may have been used) which have not been verified.

There is no certainty the investment objectives of the portfolio will actually be achieved, and no warranty or representation is given to this effect, whether express or implied. The portfolios therefore should be considered as long-term investments. This is a marketing communication. Before making an investment, you should read the relevant brochure, which provides full product details including investment charges and risks. These documents can be obtained, free of charge, from www.liontrust.co.uk or direct from Liontrust. If you are not a professional investor please consult a regulated financial adviser regarding the suitability of such an investment for you and your personal circumstances.

Any performance shown represents model portfolios which are periodically restructured and/or rebalanced. Although the model portfolios are applied to a client's account, the actual returns may vary from the model returns shown. Any figures shown have not been externally audited. The asset allocation information provided represents our model portfolios, please note that the asset allocation of a client's individual portfolio may differ. The portfolio holdings represent holdings in the portfolio as at 31.03.25. The actual holdings may differ from the above list at any other date. Due to rounding the figures may not add up to 100%.
