

FUND FACTSHEET

DIVERSIFIED REAL ASSETS FUND

D Acc GBP Class

Covering the month of May 2025

THE FUND

The Fund is managed by Mayank Markanday and invests at least 80% of its net asset value in a portfolio of real assets (including investments in infrastructure, renewables, commodities, inflation linked assets and specialist property). The Fund can only invest up to 10% of its assets in other open-ended collective investment schemes.

THE TEAM

Mayank Markanday

Mayank Markanday moved to Foresight Group in early February 2025. Since then, Foresight Group has been the sub-investment manager and sub-distributor of the Fund.

DIVERSIFIED REAL ASSETS FUND

KEY RISKS

Past performance does not predict future returns. You may get back less than you originally invested. We recommend this fund is held long term (minimum period of 5 years). We recommend that you hold this fund as part of a diversified portfolio of investments.

Overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund. Bonds are affected by changes in interest rates and their value and the income they generate can rise or fall as a result; The creditworthiness of a bond issuer may also affect that bond's value. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may have difficulty in paying their debts. The value of a bond would be significantly affected if the issuer either refused to pay or was unable to pay. This Fund may have a concentrated portfolio, i.e. hold a limited number of investments or have significant sector or factor exposures. If one of these investments or sectors / factors fall in value this can have a greater impact on the Fund's value than if it held a larger number of investments across a more diversified portfolio. The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings. Outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. International banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash. Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
