Sanlam International Inflation Linked Bond Fund – Class I GBP Base Inc a Sub-Fund of MLC Global Multi Strategy UCITS Funds Plc (the “Company”) Sanlam Asset Management (Ireland) Limited IE000HVOH0P7

Objectives and Investment Policy

Objectives and Investment Policy

Investment objective

The investment objective of Sanlam International Inflation Linked Bond Fund (the “Fund”) is to provide long term capital growth.

Investment Policy

The Fund is actively managed and invests in debt securities including inflation linked bonds, issued by sovereign governments and corporate entities and nominal bonds. The bonds may be index-linked and may be fixed or floating rate. At least 80% of the Fund’s assets shall be invested in inflation linked bonds.

Under exceptional circumstances, up to 100% of the Fund’s assets may be invested in UK or non-UK government debt securities, subject to there being at least 6 different issues of securities, with securities from any one issue not exceeding 30% of the Fund’s assets.

The Fund will not be restricted by credit quality measured by rating agencies, maturity or duration of securities when making investment decisions.

If considered appropriate to the investment objective, the Fund may also retain amounts in cash, cash equivalents and money market instruments (including, but not limited to, cash deposits, commercial paper, certificates of deposit and treasury bills), or other collective investment schemes (including schemes which themselves invest in cash or money market instruments or debt securities which are predominantly of investment grade). From time to time, the Fund may be solely invested in cash or ancillary liquid assets.

Securities invested in by the Fund will primarily be listed or traded on stock exchanges or markets as set out in Appendix IV of the Prospectus. However, up to 10% of the Fund’s Net Asset Value may be invested in fixed income securities that are not listed or traded on any exchange or market.

The Fund may from time to time be solely invested in cash or ancillary liquid assets at certain times such as:

- where the Investment Manager considers that there are no sufficient suitable investment opportunities;
- to protect the value of the Fund and maintain liquidity at times in falling or volatile markets;
- to facilitate the Fund’s ability to meet redemption requests; and
- where the Fund has received subscriptions that are awaiting investment.

The Fund may use financial derivative instruments (“FDI”) for efficient portfolio management and hedging purposes to protect against market or currency movements, to reduce costs, or to earn income or capital.

Further information on sustainability factors that may be relevant to this Fund can be found in the prospectus or on our website at www.sanlam.ie

You can sell your shares in the Fund any day (except Saturday or Sunday) that banks are open in Ireland and the UK.

Your shares may pay you income, any income you may be entitled to will be paid on a semi-annual basis.

The Fund does not track a benchmark nor is the Fund constrained by the value, price or components of a benchmark or any other aspect. The Fund is also not aiming to match or exceed the return of any benchmark.

Recommendation: Investment in the Fund should be viewed as medium to long term.

Risk and Reward Profile

The Fund is in category 4 as it invests in securities that can vary significantly in price from day to day due to a variety of factors. Therefore the chance to make large gains means the risk of suffering large losses.

A category 1 fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a category 7 fund, the risk of losing your money is high but there is also a chance of making higher gains.

The seven-category scale is complex. For example, a category 2 fund is not twice as risky as a category 1 fund. The category is based upon the annual calculation of the Fund’s risk calculation relevant to the nature of the types of instruments the Fund invests in. The risk category shown is not guaranteed and may change over time.

The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to the future.

The Fund will invest substantially in government bonds and therefore will carry a lower degree of credit risk than funds investing predominantly in fixed income or equity securities. There can be no assurance that the securities in which the Fund invests will not be subject to credit difficulties leading to the loss of some or all of the sums invested in such securities

or other instruments. The Fund may bear the risk of settlement default with parties with whom it trades.

The price of any security which is constituted as a bond is affected by the issuer’s or counterparty’s credit quality. Lower quality bonds are generally more sensitive to changes than higher quality bonds. Even within bonds considered investment grade, differences exist in credit quality and some investment grade debt securities may have speculative characteristics. Lower rated securities generally have a greater risk of default than higher rated securities.

The value of inflation-linked bonds and debt usually rise and fall in response to changes in real interest rates. Rising real interest rates generally result in declines in the values of existing inflation-linked debt and bonds, while falling real interest rates generally result in inflation-linked bond and debt values increasing. Investments with longer maturities and higher durations are more sensitive to real interest rate changes, therefore a change in real interest rates could have a substantial and immediate negative effect on the value of the Fund’s investments.

Some of the exchanges and markets on which the Fund may invest may prove to be illiquid or highly volatile from time to time and this may affect the price at which the Fund may liquidate positions to meet repurchase requests or other funding requirements. Prospective investors should also note that the securities of small capitalisation companies are less liquid and this may result in fluctuations in the price of the Shares of the Fund. Furthermore, the performance of the Fund may be affected by changes in economic and marketing conditions and in legal, regulatory and tax requirements.

The Fund may use FDI for efficient portfolio management and hedging. It may be that the use of FDI causes losses to the Fund.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus and the supplement of the Fund.

Charges

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it.

One-off charges taken before or after you invest	
Entry charge	Up to 5.00%
Exit charge	None
This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.	
Charges taken from the Sub-Fund over a year	
Ongoing charge	0.29%
Charges taken from the fund under certain specific conditions	
Performance fee	None

Any entry charge shown is a maximum figure. Where charges are shown in some cases you might pay less; you can find this out from your financial advisor or distributor.

The ongoing charge is based on the expenses for the previous 12 month period ending December 2023. This figure, which excludes portfolio transaction costs, may vary from year to year.

You can find out more details about the charges including performance fees and how they are calculated by looking at the Sub-Fund's prospectus and supplement which are available at www.sanlam.ie.

Past Performance

Past performance is not a reliable indicator of future results.

The past performance takes account of all charges and costs, excluding entry and exit charges.

The performance of this class is calculated in British Pounds.

The Fund launched on 29 July 2022. This class started to issue shares on 29 July 2022.
