The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Managed Income Fund

A sub-fund of Ninety One Global Strategy Fund
("Ninety One GSF")
managed by Ninety One Luxembourg S.A.

Class I Accumulation shares in US dollars
ISIN: LU0983164699

Objectives and investment policy

The Fund aims to provide income with the opportunity for long-term capital growth (i.e. to grow the value of your investment).

The Fund seeks to limit volatility (the pace or amount of change in its value) to be lower than 50% of the volatility of global equities. While the Fund aims to limit its volatility to be lower than 50% of global equities there is no guarantee that this will be achieved over the long-term or over any period of time.

The Fund invests in a broad range of assets around the world including: bonds (contracts to repay borrowed money which typically pay interest at fixed times), equities (e.g. the shares of companies), alternative assets (such as property and infrastructure), derivatives, transferable securities and in other funds. The Fund may hold cash.

Investments may be held directly in the asset itself, other than in property, or indirectly (e.g. using derivatives). Normally, exposure to shares of companies will be no more than 40% of the value of the Fund.

The Fund focuses on investing in assets expected to provide a reliable level of income and opportunities for capital growth in many market conditions. Investment opportunities are identified using in-depth analysis and research on individual companies and countries.

Bonds may be issued by any issuer (e.g. governments or companies), including emerging and frontier type markets. The Fund may invest up to 25% of its value in emerging and frontier markets.

The Fund may invest up to 20% of its value in mainland China, including bonds traded on the China Interbank Bond Market and companies traded on Stock Connect (a share trading link between the Hong Kong Stock Exchange and China's mainland markets).

The Fund promotes environmental and social characteristics in line with Article 8 of the EU Sustainable Finance Disclosure Regulation (SFDR).

The Fund will not invest in certain sectors or investments. Over time, the Investment Manager may, in accordance with the Fund's investment objective and policy, apply additional exclusions to be disclosed on the website, as they are implemented.

Derivatives (financial contracts whose value is linked to the price of an underlying asset) may be used in order to achieve the Fund's investment objectives or with the aim of either managing the Fund risks or reducing the costs of managing the Fund.

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives.

Any income due from your investment is reflected in the value of your shares. You can typically buy or sell shares in the Fund on any business day.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

Lower risk
Potentially lower rewards

Higher risk
Potentially higher rewards

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

Environmental, social or governance related risk events or factors, if they occur, could cause a negative impact on the value of the investments made by the Fund.

The Fund appears towards the lower end of the Risk and Reward Indicator scale. This is because the mix of assets the Fund invests in, tends to produce returns which fluctuate more than those of cash funds but less than those of funds which solely invest in the shares of companies.

Risks that may not be fully captured by the Risk and Reward Indicator:

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

Default: There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

Derivatives: The use of derivatives may increase overall risk by magnifying the effect of both gains and losses leading to large changes in value and potentially large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

Emerging and Frontier market (inc. China): These markets carry a higher risk of financial loss than more developed markets as they may have less developed legal, political, economic or other systems.

Equity investment: The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.

Government securities exposure: The Fund may invest more than 35% of its assets in securities issued or guaranteed by a permitted sovereign entity, as defined in the definitions section of the Fund's prospectus.

Interest rate: The value of fixed income investments (e.g. bonds) tends to decrease when interest rates rise.

The full list of Fund risks are contained in the appendices of the Ninety One GSF prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry charge shown is the most you might pay, in some cases you might pay less.

You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 31 December 2025. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see Appendix 1 of the Ninety One GSF prospectus.

Past Performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested.

The Fund does not track an index, any index shown is for illustrative purposes only.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in US Dollars.

The Fund was launched on 26 July 2011 and this share class on 28 November 2013.

On 31 May 2024, the Fund changed its name from Global Multi Asset Income to Global Managed Income to better reflect its investment policy.
