

Liontrust GF Global Technology Fund

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust GF Global Technology Fund is a sub-fund of Liontrust Global Funds plc. The Management Company is Bridge Fund Management Limited. This document is based upon the A10 Accumulating Euro (ISIN: IE000UVC9QY1)

Objective and Investment Policy

- To generate long term (5 years or more) capital growth.
- Growth stocks tend to pay out lower levels of dividend resulting in lower income yields and may produce more volatile returns than the market as a whole.
- The Fund invests in Global technology and telecommunications equities. The Fund may also invest in other eligible asset classes as detailed within the prospectus.
- The Fund considers environmental, social and governance ("ESG") characteristics of companies.
- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am (Irish time) for execution at 12:00 midnight valuation point on the same day.
- The Fund may, under certain circumstances, invest in derivatives but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or

negative, on the value of a fund than if the underlying investment was held instead.

- The team seeks to generate strong returns by investing in innovative companies. They believe that innovation is the single most important driver of stock returns.
- The team sets their investible universe to only those companies that are listed, liquid (with a market capitalisation above \$1 billion at the time of purchase) and have the resources to innovate (based on metrics of financial strength).
- The team manages the Global Innovation 200 watchlist, an ever-evolving list of the most innovative companies around the world across all sectors and regions. Every company that makes it onto the list has four attributes:
 - **Innovation:** Creates genuine value for customers by driving down prices or providing more for its customers' money.
 - **Barrier:** Has strong barriers to competition to capture value for shareholders.
 - **Management:** Has good management with the right incentives and ability to execute.
 - **Cash returns on capital:** Can convert its investments in innovation into cash.
- The team manages the portfolio based on the following principles:
 - Stock weights are determined by each stock's current valuation upside and its contribution to the diversification of the portfolio.
 - Portfolio fundamentals are monitored through management meetings, company results, and announcements and industry research.
 - The team's typical intended holding period is three to five years. Stocks are sold for three reasons: they hit their target price, a better opportunity is identified on the watchlist or there is a breakdown in fundamentals.

Risk and Reward Profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund is categorised 7 primarily for its exposure to Global technology and telecommunications equities.
- The Fund's risk and reward category has been calculated using the methodology approved by the Financial Conduct Authority. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address below) or online at www.liontrust.co.uk.

- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- **Credit Counterparty Risk:** outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- **Concentration Risk:** the Fund may have a concentrated portfolio, i.e. hold a limited number of investments (35 or fewer) or have significant sector or factor exposures. If one of these investments or sectors / factors fall in value this can have a greater impact on the Fund's value than if it held a larger number of investments across a more diversified portfolio.
- **Liquidity Risk:** the Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings.
- **ESG Risk:** there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.

Charges

One-off charges taken before or after you invest

Entry Charge	None
Exit Charge	None

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.

Charges taken from the Fund over the year

Ongoing Charges	0.49%
-----------------	-------

Charges taken from the Fund under certain specific circumstances

Performance Fee	None
-----------------	------

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. They reduce the potential growth of your investment.
- The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.
- The ongoing charges figure is based on expenses as at 31 December 2024. This figure may vary from year to year. It excludes:
 - portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units/shares in another collective investment undertaking.
- For more information about charges and what is included in each charge, please see the Fund's prospectus, which is available electronically at www.liontrust.co.uk, or visit the costs and charges page on our website at www.liontrust.co.uk/costs-and-charges.
