### What is this product?

#### Type:

This product is a UCITS Fund.

#### Term:

Open Ended Fund.

#### Objectives:

The investment objective of Fund is to target capital growth over the long term and to outperform inflation through a portfolio of investments giving exposure to a range of real assets.

#### Investment Policy:

The Fund is actively managed and invests up to 100% of its assets primarily in a global range of equity securities of companies listed on stock exchanges set out in Appendix I of the Prospectus who derive their value from underlying real assets. For this purpose "real assets" are physical assets that have value due to their substance and properties e.g. housing, warehousing, infrastructure, utilities, aviation and renewable energy.

The Fund may invest up to 30% of its assets in real estate investment trusts ("REITS").

The Fund may invest on an ancillary basis up to 20% of its assets in fixed income securities such as, including but not limited to corporate bonds, sovereign debt and money market instruments such as investment grade corporate bonds and government issued securities of less than 1 year maturity and cash deposits.

The Fund may invest in financial derivative instruments ("FDI") for efficient

portfolio management and hedging purposes. FDI are financial instruments the value of which is linked to the expected future price movements on underlying assets, for example an option is a contract that gives the owner the right, but not the obligation, to buy or sell assets at a specified price before a specified date. Futures are contracts that create an obligation to buy or sell another security on or before a specified future date.

Further information on sustainability factors that may be relevant to this Fund can be found in the prospectus or on our website at [www.sanlam.ie](http://www.sanlam.ie).

You can sell your shares in the Fund any day (except Saturday or Sunday) that banks are open in Ireland and the UK.

**Distribution Policy:** The Company does not declare a dividend in relation to your shares and therefore any income that your shares may earn will be retained within the Fund and the value of shares will rise accordingly.

**Benchmark:** The Fund measures its performance relative to a benchmark index (a composite of the Consumer Price Inflation rate of G10 region) "Benchmark" for reference or investor communication purposes, including in the Company's annual and half-yearly reports. Whilst the Fund has a target return of CPI +4%, the performance of the Fund relative to the benchmark index is not factored in any way into the investment process.

#### Intended retail investor:

This Fund has been designed to form part of a broader portfolio of investments, but may also be suitable as a significant component of an investors overall portfolio and should be purchased with advice or on an execution only basis by a basic investor. Investors must be able to bear loss of capital in order to seek to generate higher potential returns.

### What are the risks and what could I get in return?

#### Risk Indicator

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level and poor market conditions will likely impact the value of your investment.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the product's Annual Report or Prospectus available at [www.sanlam.ie](http://www.sanlam.ie)

This product does not include any protection from future market performance so you could lose some or all of your investment.

## Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor.

The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of Sanlam Real Assets Fund over the last 10 years. Where there has not been a full 10 years of Fund performance, the performance of the fund's benchmark has been used. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

## What happens if Sanlam Asset Management (Ireland) Limited is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary, Northern Trust Fiduciary Services (Ireland) Limited (the "Depositary"). In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations).

There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario and the investment is GBP 10,000.

Investment: GBP 10,000	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	76 GBP	634 GBP
<b>Annual cost impact (*)</b>	0.8%	0.8%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 13.2% before costs and 12.4% after costs.

## Composition of costs
