

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Satrix Emerging Markets Equity Tracker Fund - Class L (USD)

A sub-fund of Sanlam Universal Funds plc (the "Company")

Managed by Sanlam Asset Management (Ireland) Limited ISIN: IE00BG03XR83

Objectives and Investment Policy

Investment Objective

The investment objective of the Satrix Emerging Markets Equity Tracker Fund (the "Fund") is to increase the value of your shares over the long term equivalent to that gained from investment in emerging equity markets by tracking the performance of the MSCI Emerging Markets Index USD (the "Index").

Investment Policy

The Fund will aim to replicate the performance of the emerging equity markets by tracking the Index (Bloomberg code: NDUEEGF) with income reinvested. The Index captures large and mid cap representation across 21 emerging markets (EM) countries. The Fund may track the performance of the Index directly through the purchase of a representative basket of shares included in the Index. The fund may also track the performance of the Index indirectly through investment in exchange traded funds (ETF) and other collective investment schemes (CIS).

The Fund is passively managed and operates an index tracking strategy whereby it seeks to replicate the performance of the Index through investment directly in assets that are Index constituents, although not necessarily holding all of the constituents (i.e. on an optimisation basis). Accordingly, investment in the Fund should not be considered to provide a direct exposure to the Index.

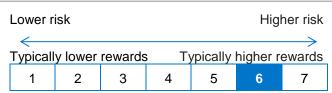

Further information on sustainability factors that may be relevant to this Fund can be found in the prospectus or on our website at www.sanlam.ie

The Company does not declare a dividend and therefore your shares do not pay you income.

You can sell your shares any day (except Saturday or Sunday) that banks are open in Dublin.

Recommendation: The Fund is suitable for investors with a time horizon of 5 years.

Risk and Reward Profile

Why is this Fund in category 6?

The Fund is rated 6 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

The price of shares and the income from them may fall as well as rise and investors may not get back the amount they have invested.

The Fund may invest in companies based in emerging markets which may involve additional risks not typically associated with other more established markets such as increased risk of social, economic and political uncertainty.

While seeking to replicate the performance of emerging equity markets by not solely tracking the Index, the Fund may incur a tracking error relative to the Index.

It may be difficult for the Fund in extreme market condition to redeem its shares from a CIS or ETF at short notice without suffering a loss.

Investing in a CIS or ETF may lead to payment by the Fund of additional fees and expenses in relation to those CIS or ETF.

As the investments of the Fund are in various currencies and the Fund is denominated in U.S. dollars your shares may be subject to currency risk.

What do these numbers mean?

They rate how a fund might behave and how much risk there is to your capital. Generally, the chance to make large gains means a risk of suffering large losses.

A **Category 1** fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a **Category 7** fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex (for example, 2 is not twice as risky as 1).

More about this rating:

This rating system is based on the average fluctuations of the prices of funds over the past 5 years - that is, by how much the value of their assets taken together has moved up and down. Historical data, such as is used in calculating the synthetic risk indicator, may not be a reliable indication of the future risk profile of the Fund.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

Charges

These charges are used to pay the costs of running the Fund, including the costs of marketing and selling. Overall, they reduce the growth of your investment.

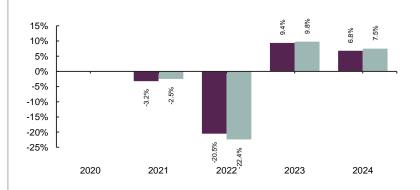

| One-off charges taken before or after you invest | |
|--|-------|
| Entry charge | None |
| Exit charge | None |
| Switching charge | None |
| This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out. | |
| Charges taken from the Fund over a year | |
| Ongoing charge | 0.42% |
| Charges taken from the Fund under certain specific conditions | |
| Performance fee | None |

The entry and exit charges shown are the maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on the expenses for the previous 12 month period ending December 2024. This figure, which excludes portfolio transaction costs, may vary from year to year.

You can find out more details about the charges by looking at the "Charges and Expenses" section of the prospectus.

Past Performance

■Class L (USD) ■MSCI Emerging Markets Index USD (Benchmark)

Past performance is not a reliable indicator of future performance.

The past performance takes account of all charges and costs, excluding entry and exit charges.

The performance of this class is calculated in US Dollars.

The Fund launched on 24 May 2013. This class started to issue shares on 17 January 2020.
