

# Liontrust UK Growth Fund

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust UK Growth Fund is an Authorised Unit Trust and categorised as a UCITS scheme. This document is based upon the M Inc GBP (ISIN: GB00BD5CY988). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

## Objective and Investment Policy

- To deliver capital growth over the long term (5 years or more).
- Growth stocks tend to pay out lower levels of dividend resulting in lower income yields and may produce more volatile returns than the market as a whole.
- The Fund invests in UK & Irish equities. The Fund may also invest in other eligible asset classes as detailed within the prospectus.
- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- Income share classes allow investors to receive a distribution or reinvest dividend income.
- The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day.
- The Fund may, under certain circumstances, invest in derivatives but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for

investment purposes. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead.

- The process seeks to identify companies that possess intangible assets which produce barriers to competition and provide a durable competitive advantage that allows the companies to defy industry competition and sustain a higher than average level of profitability for longer than expected.
- In the fund managers' experience, the hardest characteristics for competitors to replicate are three classes of intangible asset: intellectual property, strong distributions channels and significant recurring business. Other less powerful but nonetheless important intangible strengths include franchises and licenses; good customer databases and relationships; effective procedures and formats; strong brands and company culture.
- These tangible assets produce barriers to competition, protect margins and are capable, in the opinion of the fund managers, of reaping a financial advantage in the form of cash flow returns in excess of the cost of capital. A company that consistently generates excess cash flow returns will benefit from compounding as it reinvests this excess return into the business.

## Risk and Reward Profile

- This Synthetic Risk and Reward Indicator (SRRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund is categorised 5 primarily for its exposure to UK equities.
- The Fund's risk and reward category has been calculated using the methodology approved by the Financial Conduct Authority. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address below) or online at [www.liontrust.co.uk](http://www.liontrust.co.uk).

- The SRRRI may not fully take into account the following risks:
  - that a company may fail thus reducing its value within the Fund;
  - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- **Credit Counterparty Risk:** outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- **Diversification Risk:** the Fund is expected to invest in companies predominantly in a single country which maybe subject to greater political, social and economic risks which could result in greater volatility than investments in more broadly diversified funds.
- **Liquidity Risk:** the Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings.
- **Smaller Companies Risk:** the Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- **ESG Risk:** there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.

## Charges

### One-off charges taken before or after you invest

Entry Charge	None
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the Fund over the year

Ongoing Charges	0.63%
-----------------	-------

### Charges taken from the Fund under certain specific circumstances

Performance Fee	None
-----------------	------

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. They reduce the potential growth of your investment.
- The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.
- The ongoing charges figure is based on expenses as at 31 December 2024. This figure may vary from year to year. It excludes:
  - portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units/shares in another collective investment undertaking.
- For more information about charges and what is included in each charge, please see the Fund's prospectus, which is available electronically at [www.liontrust.co.uk](http://www.liontrust.co.uk), or visit the costs and charges page on our website at [www.liontrust.co.uk/costs-and-charges](http://www.liontrust.co.uk/costs-and-charges).

## Past Performance

- **Past performance does not predict future returns.**
- It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launch date is 8 March 1993.
- The M Inc GBP launch date is 31 July 2019.

A paper copy of this information is available free of charge upon request from Liontrust Fund Partners LLP at 2 Savoy Court, London, WC2R 0EZ.

The Fund is dual priced; it has an offer (buying) price and a bid (selling) price and the difference between these (bid-offer spread) is dependent on the underlying holdings. This means the price investors buying and selling receive is reflective of the underlying transaction costs related to the subscription or redemption to avoid any dilution in the fund's value for existing investors.
