

Liontrust GF Special Situations Fund

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust GF Special Situations Fund is a sub-fund of Liontrust Global Funds plc. The Management Company is FundRock Management Company (Ireland) Limited. This document is based upon the A3 Acc EUR (ISIN: IEO0BL6VHG89)

Objective and Investment Policy

- To provide long-term capital growth by investing in equities of companies in a special situation. These companies are in a special situation because they have certain special characteristics that are difficult to replicate, distinct from their competitors and that enables them to sustain a higher level of profitability for longer than expected which often surprises the market and typically leads to strong share price appreciation.
- Growth stocks tend to pay out lower levels of dividend resulting in lower income yields and may produce more volatile returns than the market as a whole
- The Fund invests in UK & Irish equities. The Fund may also invest in other eligible asset classes as detailed within the prospectus.
- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am (Irish time) for execution at 12:00 midday valuation point on the same day.

- The Fund may, under certain circumstances, invest in derivatives but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead.
- The process seeks to identify companies that possess intangible assets
 which produce barriers to competition and provide a durable competitive
 advantage that allows the companies to defy industry competition and
 sustain a higher than average level of profitability for longer than
 expected.
- In the fund managers' experience, the hardest characteristics for competitors to replicate are three classes of intangible asset: intellectual property, strong distributions channels and significant recurring business.
 Other less powerful but nonetheless important intangible strengths include franchises and licenses; good customer databases and relationships; effective procedures and formats; strong brands and company culture.
- These tangible assets produce barriers to competition, protect margins
 and are capable, in the opinion of the fund managers, of reaping a
 financial advantage in the form of cash flow returns in excess of the cost
 of capital. A company that consistently generates excess cash flow returns
 will benefit from compounding as it reinvests this excess return into the
 business.

Risk and Reward Profile

Lower Risk
Typically lower rewards

Higher Risk Typically higher rewards

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund is categorised 5 primarily for its exposure to UK equities.
- The Fund's risk and reward category has been calculated using the methodology approved by the Financial Conduct Authority. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address below) or online at www.liontrust.co.uk.

- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
- overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- Credit Counterparty Risk: outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- Diversification Risk: the Fund is expected to invest in companies predominantly in a single country which maybe subject to greater political, social and economic risks which could result in greater volatility than investments in more broadly diversified funds.
- Liquidity Risk: the Fund will invest in smaller companies and may invest a small proportion (less than 10%) of the Fund in unlisted securities. There may be liquidity constraints in these securities from time to time, i.e. in certain circumstances, the fund may not be able to sell a position for full value or at all in the short term. This may affect performance and could cause the fund to defer or suspend redemptions of its shares.
- Smaller Companies Risk: the Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- ESG Risk: there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.
