

Liontrust Sustainable Future Monthly Income Bond Fund

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Sustainable Future Monthly Income Bond Fund is a sub-fund of the Liontrust Investment Funds ICVC and categorised as a UCITS scheme. This document is based upon the P Gr Acc GBP (ISIN: GB00B3RPTP62). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective and Investment Policy

- To produce monthly income payments together with capital growth.
- Total Return Target - The Fund targets a net total return of at least the iBoxx Sterling Corporates Overall Total Return over the long term (rolling 5 year periods).
- There is no guarantee that a total return will be generated over any time period.
- The level of targeted income is not guaranteed.
- The Fund invests in investment grade corporate bonds that are sterling denominated or hedged back to sterling. The Fund may also invest in other eligible asset classes as detailed within the prospectus.
- All investments will be expected to conform to our social and environmental criteria.
- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day.
- The Fund will invest in derivatives but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead.
- Macroeconomic analysis is used to determine the team's top-down view of the world and this helps shape all aspects of portfolio construction and appetite for risk. After this the managers aim to focus on high quality issuers and believe this can reduce bond specific risk.
- The fund managers' assessment of quality is a distinctive part of the process, in which they combine traditional credit analysis with a detailed sustainability assessment based on the proprietary model. The managers assess individual bonds for whether they believe they offer attractive long-term returns and for absolute and relative valuations.
- The managers seek the best value bonds issued by the high-quality issuers identified, looking at bonds issued across the capital structure, along the maturity curve, or issued into the primary credit markets (UK, US and Europe).
- Sustainability analysis is fully integrated into the investment process helping to identify companies that the managers believe will both enhance returns and reduce issuer specific tail-risk.

Risk and Reward Profile

- This Synthetic Risk and Reward Indicator (SRRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund is categorised 5 primarily for its exposure to a diversified portfolio of bonds along with a number of derivative positions.
- The Fund's risk and reward category has been calculated using the methodology approved by the Financial Conduct Authority. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address below) or online at www.liontrust.co.uk.
- The Fund's volatility limits are calculated using the Value at Risk (VaR) methodology. In high interest rate environments the Fund's implied volatility limits may rise resulting in a higher risk indicator score. The higher score does not necessarily mean the Fund is more risky and is potentially a result of overall market conditions.

- The SRRRI may not fully take into account the following risks:
 - Bonds are affected by changes in interest rates and their value and the income they generate can rise or fall as a result;
 - the creditworthiness of a bond issuer may also affect that bond's value. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers (high yield) may have difficulty in paying their debts. The value of a bond would be significantly affected if the issuer either refused to pay or was unable to pay.
- **Credit Counterparty Risk:** the Fund uses derivative instruments that may result in higher cash levels. Cash may be deposited with several credit counterparties (e.g. international banks) or in short-dated bonds. A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- **Liquidity Risk:** the Fund may encounter liquidity constraints from time to time. Participation rates on advertised volumes could fall reflecting the less liquid nature of the current market conditions.
- **ESG Risk:** there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.

Charges

One-off charges taken before or after you invest

Entry Charge None

Exit Charge None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the Fund over the year

Ongoing Charges 0.26%

Charges taken from the Fund under certain specific circumstances

Performance Fee Performance Fee Rate: 20.00% of the outperformance of the Benchmark (iBoxx Sterling Corporates 5-15 years Index).

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. They reduce the potential growth of your investment.
- The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.
- The ongoing charges figure is based on expenses as at 31 December 2024. This figure may vary from year to year. It excludes:
 - portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units/shares in another collective investment undertaking.
- For more information about charges and what is included in each charge, please see the Fund's prospectus, which is available electronically at www.liontrust.co.uk, or visit the costs and charges page on our website at www.liontrust.co.uk/costs-and-charges.
- A performance fee is calculated and accrued at each valuation point and crystallises on 31 December each year or upon redemption. There is a cap on the outperformance level set at 6.25%, therefore for the purpose of calculating the Performance Fee the maximum performance fee that can be paid in a given year is 1.25% (i.e. 0.2 of 6.25%). No Performance Fee will be payable with respect to a Fund class in any Performance Period unless such class has recovered any accumulated underperformance for previous Performance Periods.
- Investors in share classes with a performance fee will pay a variable performance fee amount that is based on the performance of the underlying share class, which is likely to result in different total fees being charged each year and, during periods of outperformance, higher total fees than that of a share class with no performance fee. A performance fee may be payable in case the share class has outperformed its benchmark but had a negative performance.

Past Performance

- Past performance does not predict future returns.**
- It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launch date is 14 June 2010.
- The P Gr Acc GBP launch date is 5 July 2010.
- The base currency of the Fund is GBP.
- The benchmark changed effective 1st of January 2025 from Iboxx Sterling Corporates 5-15 years to iBoxx Sterling Corporates Overall Total Return.

	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024
■ Liontrust Sustainable Future Monthly Income Bond Fund P Gr Acc GBP	1.7%	9.8%	8.3%	-2.8%	9.8%	5.8%	-0.5%	-16.0%	12.9%	1.3%
