

Asian Small Cap Equity Fund

Class I5 USD Acc

The Fund

Investment objective

The Asian Small Cap Equity Fund aims to provide long-term capital growth for those investors who hold a long term investment view and are prepared to accept significant fluctuations in the value of their investments.

Policy

The Fund is made of a diversified investment portfolio, with at least 70% of its net assets invested in equity and equity related investments of smaller cap companies in the Asian and/or Pacific region.

Philosophy

As Asian equity markets are semi-efficient and idiosyncratic, we believe that outperformance in the Asia small cap equity space can be achieved by focusing on:

- Companies that are under researched by global banks
- Utilizing our on-the-ground resources to uncover inefficiencies between company fundamentals and market perception
- Companies with a compelling domestic opportunity and/or an international story with a niche market in ideally an oligopolistic market

Portfolio characteristics including holdings, sector weightings and market capitalization are subject to change at any time. Current and future holdings are subject to risk. Ongoing market volatility can dramatically impact short term returns. All material is compiled from sources believed to be reliable and correct, but accuracy cannot be guaranteed.

Risks

All investments involve risk, including the possible loss of principal. There is no guarantee investment objectives will be met. Past performance is not indicative of future results.

Small Cap Risk: investments in securities of small and medium sized companies may involve greater risk than is customarily associated with investment in larger and more established companies.

Geographical Concentration Risk: the concentration of the Fund's investments in Hong Kong-related or PRC-related companies may result in greater volatility than portfolios which comprise broad-based global investments.

Natural Resources Sector Risk: by focusing on the natural resources sector, some Funds carry much greater risks of adverse developments than a Fund that invests in a wider variety of industries.

Volatility and Liquidity Risk: during certain times, the Fund's investments may become difficult to sell for full value or at all, which could affect performance and could result in delays when you sell your shares.

Emerging Markets Risk: the investment of the Fund may be exposed to higher risks than in developed economies or markets.

Mainland China Investment Risk: investing in the securities markets in Mainland China is subject to the risks of investing in emerging markets generally as well as to specific risks relating to the Mainland China market.

Investments via Stock Connect: investment in Stock Connect securities is subject to various risks due to regulations subject to change, and may take retrospective effect. There can be no assurance that the Fund will be able to obtain investment opportunities through the two-way stock trading link.

Use of Financial Derivatives Instruments (FDIs): the Fund may use FDIs for investment purposes as well as to manage risk and manage the Fund more effectively. The use of derivatives exposes the Fund to additional risks, including volatility risk, management risk, market risk, credit risk and liquidity risk.

For a more detailed explanation of risks, please refer to the "General Risk Factors" section and "Appendix I" of the Prospectus.
