Management expense ratio (MER) is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. The MER does not reflect the February 1, 2021 management fee decrease of 5 basis points.

⁷ The expected rate of return on a bond if it is held until maturity based on its current market price. It is not a measure of historical yield or the income received by an investor. Investment management fees, expenses and taxes are not included in this calculation that would have decreased the yield shown.

Important Information

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of returns are the historical annual compounded total returns including changes in unit/share value and reinvestment of all dividends or distributions and does not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual Funds are not guaranteed, their values change frequently and past performance may not be repeated.

All rates of return shown are for periods ending September 30, 2023. Rates of return shown for less than one year are not annualized. All other data shown is as of September 30, 2023 with exception of Fixed income statistics and sector weights, Regional weights, Credit quality breakdown and Ten largest holdings, which are as of August 31, 2023.
