Matthews Asia

Asia Sustainable Future Fund (the "Fund") a sub-fund of Matthews Asia Funds (the "Company")

I Accumulation GBP (the "Class") ISIN LU2459556770

Management Company: Carne Global Fund Managers (Luxembourg) S.A. (the "Management Company")

Objective and Investment Policy

- Objective:** The Fund seeks to achieve long-term capital appreciation while investing in companies that contribute to a sustainable future.
- Investment policy:** The Fund seeks to achieve its investment objective by investing, directly or indirectly, primarily (i.e., at least 65% of its net assets) in equities of companies located in, or with substantial ties to, the Asia ex Japan region that the Investment Manager believes contribute positively to one or more of its sustainability focus areas. On an ancillary basis, the Fund may invest in other permitted assets on a worldwide basis. For the purpose of this policy, the Asia ex Japan region consists of all countries and markets in Asia excluding Japan, but including all other developed, emerging and frontier countries and markets in Asia.
- The Fund seeks to invest primarily in companies that the Investment Manager believes, based on its analysis, meet the following environmental, social and governance ("ESG") standards: (1) they do not cause significant environmental or social harm; (2) they have good governance practices; and (3) they contribute to a sustainable future. In evaluating whether a company meets these ESG standards, the Investment Manager focuses on a company's contribution or potential future contribution to positive ESG outcomes based on a variety of criteria, which may include some or all of the following: climate change mitigation and adaptation, clean environment, circular economy, or sustainable production and consumption; health and well-being, human capital development, inclusive development or enablement of sustainable development; and/or good governance practices that demonstrate a strong commitment to integration of ESG principles.
- The Fund may invest (whether directly or indirectly) in China A Shares, either directly via a Qualified Foreign Investor ("QFI") license awarded to the Company, or via the Shanghai-Hong Kong Stock Connect and/or Shenzhen-Hong Kong Stock Connect programs, or indirectly via investment in access products. Under normal market conditions, it is expected that the Fund will hold less than 70% of its net assets in aggregate in China A and B Shares.
- The Fund's reference benchmark is the MSCI All Country Asia ex Japan Index (GBP) and is indicated for performance comparison only. The Fund is actively managed and does not aim to replicate or track the benchmark. Consequently, the Investment Manager, Matthews International Capital Management, LLC, may freely select the securities in which it invests, and the Fund's portfolio composition and performance may deviate materially from the benchmark.
- The Fund may also hold cash equivalents to achieve its investment objective, for treasury purposes and in case of unfavorable market conditions.
- Dividend policy:** Income generated by any of the investments is planned to be fully reinvested (that is, the Fund does not plan to make any dividend or interest payments).
- Holding period:** The Fund has no minimum holding period, however, the Fund has a long-term investment horizon (typically 5 years or longer). This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- Share transactions:** An investor can buy and sell shares of the Fund on any Business Day in Luxembourg.
- Investment manager:** Matthews International Capital Management, LLC

Risk and Reward Profile

Interpretation of the Risk and Reward Indicator: The Risk and Reward Indicator takes into account historical data which is not a reliable indicator of the future. The risk category was calculated using related historical performance data and it may not be a reliable indicator of the Fund's future risk profile. The risk category of the Fund is neither a target nor guaranteed to remain stable over time. A risk category of 1 does not mean a risk free investment.

Why is this Fund in this category? The Fund is in risk category 6 because it invests primarily in Asian equity securities. Many Asian markets are considered to be emerging markets and may experience sharp changes in valuation ("volatility"). Sharp changes in valuation are expected to result in sharp changes in the Fund's net asset value.

Are there other particular risks you should consider? The Risk and Reward Indicator does not provide an overall risk profile of the Fund, nor does it fully capture all the risks of investing in the Fund. Risks that you should consider include: market risk, interest rate risk, foreign exchange risk, settlement risk, valuation risk, credit risk, counterparty risk, liquidity risk, compliance risk, custody risk, operational risk, political risk, legal risk, regional and country risk, risk of investing in China A shares, risks associated with smaller companies, and growth stock risk. Investments in less developed financial markets may expose the Fund to increased operational, legal and political risk. The Investment Manager's consideration of ESG factors in making its investment decisions may impact the Fund's relative investment performance positively or negatively. For more details about risk, please refer to the Fund's Prospectus under "Risk Considerations," which is available at global.matthewsasia.com/prospectus.
