

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

WAVERTON
INVESTMENT FUNDS

Waverton Absolute Return Fund a sub fund of Waverton Investment Funds plc

Class A Stg£
ISIN: IE00BGCYVW61

Objectives and Investment Policy

The Fund aims to achieve growth on your investment.

The Fund may invest up to 100% of its assets indirectly in shares of companies worldwide and in alternative asset classes (such as hedge funds, real estate, private equity funds and commodities) through investment in other funds.

The Fund may invest up to 20% of its assets in structured products. These are securities in which the issuer undertakes to provide a return to investors based on the performance of a reference asset such as an equity, bond, derivative, index or fund.

The assets selected are those which seek to produce positive real returns regardless of the direction of the bond or equity markets.

For more information about the investment policy, see “Investment Objectives and Policies of the Funds” in the Fund’s prospectus available at www.wavertonfunds.co.uk.

You may sell your shares on any working day (generally, a day on which banks in Dublin and London are open).

The Fund declares dividends semi-annually (generally, on 30 April and 31 October each year). Unless you request cash payment, your dividends will be paid in the form of additional shares in the Fund.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The risk category is based on simulated data and may not be a reliable indicator of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time.

The numerical scale is complex. For example, 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 fund is not a risk-free investment the risk of losing your money may be small, but the chance of making gains is also limited.

The Fund is in category 3 as it typically produces higher rewards than other funds (such as money market funds) and is higher risk as a result of investing in alternative asset classes.

Risks materially relevant to the Fund which may not be adequately captured by the indicator :

- **Investment risk:** the Fund may not achieve its investment objective and the value of shares in the Fund may fall.
- **Underlying fund risk:** where the Fund invests in other funds, an extra layer of costs will arise at the level of the underlying funds. Certain underlying

funds may not be UCITS. They may have different characteristics and may not be subject to the same level of regulation. The Fund may find it difficult to sell its units in the underlying funds. This could, in turn, affect your ability to sell your shares.

- **Currency risk:** the Fund invests in assets which are priced in overseas currencies other than the Fund’s base currency (Sterling). Changes in exchange rates may lead to fluctuations in the value of your investment. The Fund may use techniques to try to limit currency exchange risk.
- **Derivatives risk:** the value of a derivative depends primarily on the performance of the underlying asset. A small movement in the value of the underlying asset may cause a large movement in the value of the derivative. The Fund is exposed to the risk that the other party of the derivative will not meet its obligations.
- **Emerging market risk:** investment of part of the Fund’s assets in emerging markets will be subject to greater risk due to possible political, economic, corporate governance, legal, market, accounting and other risks. Assets may not be properly held in custody and, as a result, may be lost. It may be more difficult to sell assets at a fair price in emerging markets.

See also the description of risks applicable to the Fund in “Risk Factors” in the Fund’s prospectus.

Charges for this Fund

These charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distribution. Overall, they reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge None

Exit charge None

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charge 2.08%

Charges taken from the Fund under specific conditions

Performance fee None

The ongoing charges figure shown here is an estimate. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, see "Fees and Expenses", "Subscription Price" and "Repurchase Price" in the Fund's prospectus.

Past Performance

Performance in the past is not a reliable indicator of future results.

In general, past performance takes account of all ongoing charges but not any entry, exit or switching charge.

Past performance is calculated in Sterling.

The Fund launched on 8 January 2014. The class launched on 20 February 2014.
