Market value (fund level)[§]:
\$615.44M

Net asset value (Class S)[§]:
\$18.14

Fund inception date: 07/31/2014

Investment objective

The Multifactor U.S. Equity Fund seeks to provide long term capital growth. The Fund invests principally in common stocks of large and medium capitalization U.S. companies but may also invest in common stocks of small capitalization U.S. companies. RIM utilizes a variety of quantitative inputs and qualitative investment information and analysis in the management of the Fund to assess Fund characteristics and identify a portfolio which it believes will provide the desired exposures.

Nothing contained in this material is intended to constitute legal, tax, securities or investment advice, nor an opinion regarding the appropriateness of any investment. The general information contained in this publication should not be acted upon without obtaining specific legal, tax and investment advice from a licensed professional.

Fund facts - class level

3 year Sharpe ratio^{§, **}: 0.63

Top ten holdings^{1, 2} Subject to change

| Holding | Weight |
|------------------------------|--------|
| Microsoft Corp. | 6.6% |
| Apple Inc. | 5.7% |
| NVIDIA Corp. | 3.8% |
| Amazon.com, Inc. | 3.2% |
| Alphabet, Inc. | 2.2% |
| Meta Platforms, Inc. Class A | 2.2% |
| Berkshire Hathaway, Inc. | 1.4% |
| Eli Lilly & Co. | 1.3% |
| JPMorgan Chase & Co. | 1.2% |
| Broadcom Inc. | 1.1% |

¹ Data as of 02/29/2024

² The top ten holdings list excludes shares of the investment vehicles in which the Fund invests its cash.

Diversification and strategic asset allocation do not assure profit or protect against loss in declining markets.

Mutual Fund investing involves risk, principal loss is possible.

Sector weightings^{1, 2}

| Sector | Weight |
|--------------------------|--------|
| Technology | 36.2% |
| Consumer Discretionary | 14.0% |

Fund objectives, risks, charges and expenses should be carefully considered before investing. A summary prospectus, if available, or a prospectus containing this and other important information can be obtained by calling 800-787-7354 or by visiting <https://russellinvestments.com>. Please read a prospectus carefully before investing.

Multifactor U.S. Equity Fund (continued)

About the fund

The investment process emphasizes dynamic management of multiple equity factors to seek to provide long term capital growth. While Russell is best known for its manager research capability and the outsourcing of security selection to sub-advisors, we possess 40+ years of experience understanding market behavior and the equity factors that drive market returns.

Value, quality, momentum and volatility play important roles in producing performance within equity markets, but will fall in and out of favor over longer market cycles.

Advisor

All investment advisory and portfolio management services for the Fund, including developing the investment program for the Fund, will be provided by the Fund investment advisor.

| | Role | Target allocation | Year assigned |
|-------------------------------------------|------|-------------------|---------------|
| Russell Investment Management, LLC (RIM)* | N/A | 100.0% | 2014 |

The Fund may invest in derivatives, including futures and options. Investments in derivatives may cause the Fund's losses to be greater than if it invests only in conventional securities and can cause the Fund to be more volatile. Derivatives involve risks different from, or possibly greater than, the risks associated with other investments.

Investments in small cap, micro cap, and companies with capitalization smaller than the Russell 2000® Index, are subject to the risks of common stocks, may experience considerable price fluctuations and are more volatile than large company stocks. Generally, the smaller the company size, the greater the risks.

The Multifactor U.S. Equity Fund utilizes a variety of quantitative inputs and qualitative assessments in its management. If these are not predictive or are incorrect, the Fund may underperform. This Fund also utilizes index replication and/or optimization strategies, which may cause its returns to be lower than if it employed a fundamental investment approach to security selection.

*RIM manages Fund assets not allocated to money manager strategies and utilizes quantitative and/or rules-based processes and qualitative analysis to assess Fund characteristics and invest in securities and instruments which provide the desired exposures. This includes the Fund's positioning strategy, which is used to seek excess return and manage portfolio risks by targeting specific exposures, and the active tax management strategy that is implemented across the entire fund. These strategies are used in conjunction with allocations to third-party managers to fully reflect Russell Investments' strategic and dynamic views with integrated liquidity and risk management.

KEY TERMS:

Alpha - shows how a Fund did relative to what would have been expected given the Fund's Beta and the performance of the Fund's benchmark. For example, an alpha of 1.4 means that the Fund outperformed its estimated return by 1.4%.

Beta - a measure of the Fund's sensitivity to market changes using the Fund's benchmark as an approximation of the market; beta greater than 1 is more volatile than the market; beta less than 1 is less volatile than the market.

Standard deviation - defines how widely returns varied from a daily average over a given period of time. A higher standard deviation means a more volatile Fund. For example, a Fund with a standard deviation of 6 and an average annual return of 10% saw annualized monthly returns fall within 6 percentage points of that average (or between 4% and 16%) two-thirds of the time.

Sharpe ratio - a calculation that reflects the reward per each unit of risk in a portfolio. The higher the ratio, the better the Fund's risk-adjusted return.

R-squared - a statistic that indicates how much a Fund's fluctuations were attributable to movements in the Fund's benchmark.

Important Information

For more information on Russell Investment Company funds, contact your investment professional or plan administrator for assistance.

Russell Investments' ownership is composed of a majority stake held by funds managed by TA Associates Management, L.P., with a significant minority stake held by funds managed by Reverence Capital Partners, L.P. Certain of Russell Investments' employees and Hamilton Lane Advisors, LLC also hold minority, non-controlling, ownership stakes.

Frank Russell Company is the owner of the Russell trademarks contained in this material and all trademark rights related to the Russell trademarks, which the members of the Russell Investments group of companies are permitted to use under license from Frank Russell Company. The members of the Russell Investments group of companies are not affiliated in any manner with Frank Russell Company or any entity operating under the "FTSE RUSSELL" brand.

Russell Investment Company mutual funds are distributed by Russell Investments Financial Services, LLC, member FINRA, part of Russell Investments.
