## OBJECTIVE AND INVESTMENT POLICY

### Objective

To increase the value of its investments primarily through capital growth.

- The fund invests principally in equities of smaller companies that are listed on a recognised stock exchange in the USA. Typically these are companies with a market capitalisation of less than \$10bn at the time of purchase.
- At times the fund may invest in equities of companies of equivalent size that are headquartered or exercise the predominant part of their economic activity in the USA, but which are listed on a regulated stock exchange outside the USA.

    - which derive more than 10% revenue from conventional or nuclear weapons, related components and systems; or
    - which derive more than 10% revenue from manufacture or sale of civilian firearms or ammunition;
- Goal: companies which derive more than 5% revenue from mining or sale of thermal coal;
- Companies that the Investment Manager determines to be in breach of the United Nations Global Compact principles on human rights, labour rights, the environment and anti-corruption.
- The fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. The Investment Manager seeks to decrease the fund's exposure to climate risk and benefit from the opportunities associated with the transition to a net-zero emissions economy through investing in companies which are actively managing their carbon exposure and setting meaningful targets. Further information is contained in a methodology statement available on the Artemis website at [www.artemisfunds.com/methodology-statement](http://www.artemisfunds.com/methodology-statement).
- The evaluation of environmental, social and governance factors is determined by the Investment Manager using information provided by the companies (for example company sustainability reports) and third-party data, focusing on scores and metrics which that the Investment Manager considers to be relevant.
- More information about the environmental or social characteristics for this fund is available in the pre-contractual disclosure for financial products referred to in Article 8 under SFDR in the fund's prospectus.
- The fund may use derivatives and other techniques for hedging and for efficient portfolio management. The fund's derivatives may include, but are not limited to, futures and forward currency contracts.

## RISK CONSIDERATIONS

To ensure you understand whether this fund is suitable for you, please read the Key Investor Information which is available, along with the fund's Prospectus, from [www.artemisfunds.com](http://www.artemisfunds.com) or [www.fundinfo.com](http://www.fundinfo.com).

The fund is exposed to the following risks:

Market volatility risk	The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
Currency risk	The fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund's value.
Charges from capital risk	Where charges are taken wholly or partly out of a fund's capital, distributable income may be increased at the expense of capital, which may constrain or erode capital growth.
Smaller companies risk	Investing in small companies can involve more risk than investing in larger, more established companies. Shares in smaller companies may not be as easy to sell, which can cause difficulty in valuing those shares.
ESG risk	The fund may select, sell or exclude investments based on ESG criteria; this may lead to the fund underperforming the broader market or other funds that do not apply ESG criteria. If sold based on ESG criteria rather than solely on financial considerations, the price obtained might be lower than that which could have been obtained had the sale not been required.
