

Manulife U.S. Large Cap Equity Fund

Seeks: Long-term capital appreciation

Use for: Core large-cap holding

Investment policy: Invests at least 80% of assets in large cap equity securities of U.S. companies. Typically holds between 40 – 65 companies in a broad range of industries and that is diversified across the growth-value style spectrum. May use financial derivative instruments.

Performance driven by stock selection

Potential to outperform when the market rewards fundamental measures of business quality and value

Flexible portfolio

Designed to be opportunistic in targeting undervalued companies across both value and growth stocks

Quality companies

Focused on best-of-breed companies with sustainable competitive advantages and strong cash flow generation

OPERATIONAL DETAILS

 Manulife Investment Management

Established asset manager with global resources and expertise extending across equity, fixed-income, and alternative investments as well as asset allocation strategies.

INVESTMENT PROCESS

Generate ideas in the large-cap universe

The team performs proprietary research to identify large-capitalization companies with a focus on those that generate higher returns on invested capital.

Research and validate

The team runs each idea through a gauntlet of analytical steps to assess each company's:

- Competitive advantages
- Growth drivers
- Industry
- Financial statements
- Management team
- Range of values analysis
- Stock-specific risks

Construct a right-price portfolio

The team seeks to construct a portfolio of 45 to 65 names in which each stock trades at a roughly 30% discount to the team's assessment of fair value. The most attractive buying opportunities would feature depressed fundamentals, low valuation, and weak market sentiment.

Adhere to a strict sell discipline

A position may be sold or reduced if:

- Fundamentals become impaired by structural deterioration
- The stock has reached fair value or has an upside/downside ratio notably below 2:1
