Goal

To provide income and long-term capital growth primarily through exposure to Canadian and foreign equity securities and, to a lesser extent, exposure to fixed income investments by investing primarily in other mutual funds, and to pay a monthly distribution (which will at times include a return of capital) to investors.

Investment strategy

Russell Investments Diversified Monthly Income (The Fund) invests primarily in Underlying Funds. The decision to invest in an Underlying Fund is based on Russell Investments' assessment of the market outlook and the Underlying Funds' ability to help The Fund meet its stated investment objectives.

Performance review³

	1 month	3 months	6 months	Year to date	1 year	3 years	5 years	10 years	Since inception
Series B	2.2%	3.6%	10.8%	3.6%	8.2%	2.1%	3.0%	3.8%	4.4%

Annual returns³

³ All Performance shown are only for Series B and are net of fees and expenses. Annual returns are calendar year returns for the last ten years or since inception if the Fund has less than ten years of history. Performance is annualized except for periods of less than one year.

Monthly distribution (Series B-7)^{4, 5}

⁴ The December monthly distribution may also include additional dividends paid by the fund.

⁵ The final distribution of the year may differ depending on the annual net income of the fund. If you do not elect to have the distributions paid out in cash at the time of purchase, they will automatically be reinvested. The actual distribution rates are fixed on an annual basis for each series of units. If the Fund's income is less than the annual distribution rate for the year, the distribution will include a return of capital. In these circumstances, if an investor elects to receive their monthly distribution in cash and not reinvest distributions, it is expected that the value of their investment will decline over time.
