## Goal

To provide long-term capital growth primarily through exposure to Canadian and foreign equities. The Series F will have some exposure to Canadian fixed income investments which will reduce volatility and also provide some growth through capital appreciation of these investments, as well as providing income.

## Investment strategy

Russell Investments Long-Term Growth (The Fund) invests primarily in Underlying Funds. It has a target asset allocation of 23% fixed income exposure and 77% equity and real asset exposure. The equity exposure of The Fund is roughly 25% Canadian equities, and 75% foreign equities.

## Important Information

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of returns are the historical annual compounded total returns including changes in unit/share value and reinvestment of all dividends or distributions and does not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual Funds are not guaranteed, their values change frequently and past performance may not be repeated.

All rates of return shown are for periods ending April 30, 2024. Rates of return shown for less than one year are not annualized. All other data shown is as of April 30, 2024 with exception of Top 10 holdings, Regional weights and Sector weights, which are as of March 31, 2024. Holdings may differ from a fund's holdings in its annual financial statements.

As with all mutual funds, investment in this mutual fund contains risks that may make it unsuitable for investors, depending on their investment objectives and risk tolerance. If the fund does not perform as intended, an investor may experience a loss of part or all of their principal invested. Please read the prospectus of this fund for a detailed description of the risks involved in this investment.

Diversification and strategic asset allocation do not assure a profit or protect against loss in declining markets.
