Monthly distribution (Series B-6)^{4,5}

⁴ The December monthly distribution may also include additional dividends paid by the fund.

⁵ The final distribution of the year may differ depending on the annual net income of the fund. If you do not elect to have the distributions paid out in cash at the time of purchase, they will automatically be reinvested. The actual distribution rates are fixed on an annual basis for each series of units. If the Fund's income is less than the annual distribution rate for the year, the distribution will include a return of capital. In these circumstances, if an investor elects to receive their monthly distribution in cash and not reinvest distributions, it is expected that the value of their investment will decline over time.
