BOARD OF DIRECTORS' REPORT

The Board of Directors ("Board") of Artemis Funds (Lux) presents the Semi-Annual Report, including Financial Statements of the Company for the six months ended 30 April 2025.

Structure of the Company

Artemis Funds (Lux) ("the Company") is an open-ended investment company organised as a *société anonyme* under the laws of the Grand Duchy of Luxembourg and qualifies as a *Société d'Investissement à Capital Variable* ("SICAV"). The Company qualifies as an Undertakings for Collective Investment in Transferable Securities ("UCITS") for the purposes of the UCITS Directive and the Company is registered pursuant to Part I of the Law of 17 December 2010 on UCITS, as amended and is subject to the supervision of the *Commission de Surveillance du Secteur Financier* ("CSSF"). The Company operates separate sub-funds ("funds"), each of which is represented by one or more share classes. The funds are distinguished by their specific investment policy or any other specific features.

The Company constitutes a single legal entity, but the assets of each fund shall be invested for the exclusive benefit of the shareholders of the corresponding fund and the assets of a specific fund are solely accountable for the liabilities, commitments and obligations of that fund.

The Board may at any time resolve to set up new funds and/or create within each fund one or more share classes and the Prospectus will be updated accordingly. The Board may also at any time resolve to close a fund, or one or more share classes within a fund to further subscriptions.

All the funds and share classes are registered for distribution in the Grand Duchy of Luxembourg and are marketed in accordance with the UCITS Directive in certain Member States of the European Union and elsewhere. Full details are available on the Artemis website www.artemisfunds.com.

As at 30 April 2025, the Company comprised nine funds with multiple share classes.

Board composition

The Board is composed of five members, three of them being independent from the Management Company and Investment Manager. At each annual general meeting, the shareholders are required to re-elect the Board members to serve in office for the following accounting year. The Board consists of individuals from different areas of the asset management industry with a wide range of skills and experience.

Chairman's statement

The six months under review were some of the most volatile in recent history for financial markets. The period began with optimism about the election of President Donald Trump and what was perceived as a pro-business agenda. Global equity markets reached new highs, led by the US.

However, in early 2025, after turbo charging global equities for several years, 'American exceptionalism' encountered some potential challenges. The advent of DeepSeek – a Chinese competitor to ChatGPT that was allegedly developed at a lower cost and capex intensity – challenged the long-held view that American companies reign supreme in technology and AI. As a result, investors took profits in the so-called 'Magnificent Seven' mega cap technology stocks.

The situation intensified on 2 April when President Trump announced a series of punitive tariffs with some of the US's largest trading partners, many of which reciprocated. The resultant uncertainty led to steep falls in stockmarkets – the S&P 500 suffered its worst ever two-day period. Despite weak equity markets, it was likely the disorder in the bond market – with Treasury yields climbing despite the S&P 500 selling off – that forced Trump to announce the 90-day suspension to reciprocal tariffs. Bond markets then stabilised and there was a significant relief rally in equity markets.

Following these moves, global share prices ended the period in slightly positive territory. In a significant shift, Europe and the UK outperformed the US. Within the US market, large-cap stocks outperformed smaller companies, which tend to have a more domestic focus. In this very difficult environment, a number of the sub-funds underperformed their benchmarks and produced a negative return. In the pages that follow, you can read about the ways in which their respective managers reacted to the market's volatility and took steps to protect their investors' wealth.

For and on behalf of the Board

Henry Kelly
Chairman

Luxembourg, 26 June 2025

ARTEMIS FUNDS (LUX) – GLOBAL FOCUS

INVESTMENT OBJECTIVE AND POLICY

To increase the value of Shareholders' investments primarily through capital growth.

The fund invests principally (at least 80% of its assets) in equities of companies selected on a global basis.

The Investment Manager aims to identify long-term growth trends that are not seasonal or cyclical or dependent on current economic events. Companies are sought which may benefit from these trends and which exhibit characteristics such as high and persistent barriers to entry, competent management teams whose remuneration is aligned to the success of the company, exposure to external factors, and high governance standards.

It is expected that the portfolio of the fund will be invested in equities of between 25 and 35 companies¹.

Shares in the following types of companies (held either directly or indirectly via derivatives) are automatically excluded:

- Tobacco: companies which derive more than 5% revenue from tobacco production;
- Weapons: companies:
 - involved in the production of controversial weapons (including cluster munitions, landmines, biological and chemical weapons); or
 - which derive more than 10% revenue from the manufacture and retail of civilian firearms and ammunition;
- Fossil fuels: companies which derive more than 10% revenue from:
 - mining, sale or power production from thermal coal; or
 - production of arctic oil and gas; or
 - extraction of oil sands.
- Companies that the Investment Manager determines to be in breach of the United Nations Global Compact principles on human rights, labour rights, the environment and anti-corruption.

The fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. In that respect, the Investment Manager assesses the sustainability of each investment, including environmental, social and governance (ESG) factors such as a company's remuneration policy, energy and social supply policy, board diversity and any unequal voting rights alongside traditional financial metrics. However, investments are chosen on the basis of many quantitative (financial or ESG) or qualitative (e.g. quality and/or growth characteristics) attributes and need not rate highly on any or all of these sustainability factors to be included in the portfolio.

In addition to ESG criteria considered during company selection, other sustainability criteria are taken into account in the thematic analysis at sector and company level.

Stock selection is determined by the Investment Manager using information provided by the companies (for example company sustainability reports) and third-party data focusing on scores and metrics which the Investment Manager considers to be relevant.

More information about the environmental or social characteristics for this fund is available in the pre-contractual disclosure for financial products referred to in Article 8 under SFDR which follow the fund's details and which form an integral part of the Prospectus.

At times the fund may invest in ADRs, GDRs, participatory notes and contracts for difference. Participatory notes and contracts for difference would be used to access markets where direct access to purchase equities may be difficult. Their use is not intended to create leverage. Investments in participatory notes and contracts for difference shall not exceed 10% of the fund's Net Asset Value.

The fund may invest up to 10% of its Net Asset Value in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect.

The fund may use derivatives and other techniques for hedging and for efficient portfolio management. The fund's derivatives may include, but are not limited to, futures and forward currency contracts.

Subject to the limits set out in the Investment Restrictions, the fund may also hold ancillary liquid assets for treasury purposes.

Subject to the limits set out in the Investment Restrictions, the fund may also invest in bank deposits, money market instruments and money market funds in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. Higher levels of investments in bank deposits, money market instruments or money market funds may be held in periods of elevated equity market valuations to reduce risk.

The fund may invest up to 10% of its Net Asset Value in other collective investment schemes.

¹ Before 6 August 2024, the fund was invested in equities of 60 companies. To ensure an orderly transition, and to limit trading expenses associated with the transition, the Investment Manager will reduce the fund's holdings towards the desired 25-35 holdings over a six month period, when opportunities arise.

INVESTMENT REVIEW

Overview

The period started with Chinese equities and emerging markets briefly leading the way after the government in Beijing announced an enormous package of stimulus measures. However, this optimism was soon tempered by questions over the efficacy of the measures, and later on, by Donald Trump's victory in the US presidential election. Expectations of tax breaks and deregulation helped to supercharge the US rally, but the threat of tariffs led to a pullback in countries with which it has a large trade deficit.

The final month of the period in question – April 2025 – was dominated by 'Liberation Day' and its aftermath, as Trump announced extreme levels of 'reciprocal' tariffs, only to compromise a week later by implementing a 90-day pause. Global equities sold off with the US leading the way down, but markets have subsequently recouped most of their losses.

We have now entered a period where macro concerns are driving asset prices. Worries over the future economic direction of the US, epitomised by tariff moves, have forced asset allocators to question their exposure to the world's dominant stock market.

Amid this volatility, the fund lost 6.7% in dollar terms over the six-month period, compared with a positive return of 0.9% from its MSCI AC World index benchmark.

Detractors

IT and software development company **Globant** was our biggest detractor after 2025 revenue-growth guidance came in below expectations. We nonetheless added to our position as the stock has rarely traded as cheaply as its current level.

Novo Nordisk released trial results for CagriSema, its next-generation weight-loss drug, which disappointed the market. Towards the end of the period, it cut its annual revenue and profit forecasts, leading to fears that US rival Eli Lilly is taking market share in the weight-loss market.

TSMC was hit by fears over the AI tech spending cycle and a potential slowdown in the US. As the clear leader in semiconductor manufacturing, TSMC should have the pricing power to navigate these headwinds, while its valuation remains appealing.

Transportation company **Saia's** economic sensitivity worked against it towards the end of the period, with investors taking the view that weak results were suggestive of future earnings disappointment.

Contributors

Ryanair was a top contributor, benefiting from the weakness in the oil price.

HDFC Bank saw renewed interest following the Indian election, due to the likelihood of higher fiscal spending and improving liquidity conditions as the government continues with policies for economic growth.

Constellation Energy, the electricity and gas provider, jumped higher on the back of its acquisition of Calpine and expectations of increased AI spending by hyperscalers (providers of infrastructure used in cloud computing and other applications). We sold out on the back of this outperformance.

Wheaton Precious Metals announced record revenues in 2024, helped by the rising gold price.

Recent purchase **Standard Chartered** got off to a good start. The bank is returning to net income growth via its less capital-intensive non-lending businesses such as wealth management which, along with disciplined cost control and large share buybacks, suggests returns should improve further from here.

Purchases

We initiated positions in **Otis** and **American Express** and moved back into **Wells Fargo**.

Having exited our position in **Wells Fargo** in 2024, we felt the result of the US election offered enough of a catalyst to re-enter the bank. Trump's agenda of deregulation is likely to benefit financials the most and, for Wells specifically, may accelerate the removal of its regulatory asset cap, allowing it to expand into a potentially stronger economic environment, justifying a higher multiple.

Otis manufactures, installs and services elevators and escalators. The manufacture and installation of new elevators is an oligopoly with only three to four large players. Nevertheless, Otis makes about 60% of its revenues and 90% of its operating profit from servicing contracts.

Our investment thesis is based on the market's misplaced focus on the downside from new equipment sales in China. These only account for a few per cent of net profit and have already suffered a major slowdown, so are unlikely to affect earnings from here. More importantly, the market underestimates the strength of the recurring revenue coming from Otis's servicing segment. We believe the potential upside is three times higher than the potential downside.

We invested in **American Express** as we believe that with payments becoming more commoditised, consumers need a

Past performance is not a guide to the future.

¹ Artemis/Lipper Limited, class I accumulation, mid to mid in USD. All figures show total returns with dividends and/or income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if you invest in a different currency class.

ARTEMIS FUNDS (LUX) – GLOBAL FOCUS

good reason to pick one method over another. High-income customers pick Amex because of its brand, reward benefits (funded by partners) and the 'sunk cost' of having paid a membership, as you would for a service such as Amazon Prime. Meanwhile, card network revenues, membership and absolute spend per card continue to grow, while counterintuitively, a large increase in card fees as higher rewards kick in appears to be increasing usage.

The strengthening ecosystem around Amex's network should, in our view, be valued at a higher multiple and the lending side of the business at a premium to a bank. Earnings should also grow more quickly than historical levels. Our analysis suggests the potential upside is twice as much as the potential downside.

On the other side of the ledger, we sold out of **ASML** due to worries that big spenders on semiconductors such as Intel and Samsung will buy fewer lithography machines.

While chocolatier **Lindt** has delivered on pricing and volume growth, these strengths appeared priced in, so we took profits.

Outlook

The widely anticipated 'Trump put' seems to have returned, with the president continuing to water down tariffs while trade talks with China in Geneva yielded an agreement for a 90-day postponement. The force with which markets have moved – both with respect to the sell-off and rally thereafter – has been unprecedented.

The worst-case scenario of the trade war looks to have been ruled out – much to investors' relief – but the effective US tariff rate on Chinese goods remains at around 40%, which is much higher than at any point during Trump's first term. Protectionist tendencies are still likely to have a significant impact on global trade and represent a departure from the norms of the post-war era, characterised by dollar and US financial supremacy.

If nothing else, the past 100 or so days have increased the risk premium on US assets; confidence in the country's status as a financial hegemon has taken many decades to build and the risk that it is now being eroded is one we must take seriously. Meanwhile, other markets around the world, such as China, Japan and Europe, have been awoken from their slumber and are spawning interesting investment opportunities as a result.

Natasha Ebtehadj and Swetha Ramachandran

ARTEMIS FUNDS (LUX) – GLOBAL HIGH YIELD BOND

INVESTMENT OBJECTIVE AND POLICY

The fund aims to increase the value of shareholders' investments through a combination of income and capital growth.

The fund may invest in the bonds of any type of issuer (for example government or corporates) with no restriction on economic or geographic areas (including emerging markets).

The fund will invest at least 80% in high-yield bonds, which either (a) have been given a credit rating of: (i) Ba1 or lower by Moody's; (ii) BB+ or lower by Standard & Poor's; or (iii) BB+ or lower by Fitch; or (b) have not been rated but which the Investment Manager believes would, if they were rated, be given a comparable credit rating.

Corporate bonds (held either directly or indirectly via derivatives) issued by companies involved in the following are automatically excluded:

- Tobacco: companies which derive more than 5% revenue from tobacco production;
- Nuclear power: companies which derive more than 5% revenue from:
 - nuclear power plant ownership or operation;
 - manufacturing of nuclear-specific essential components;
 - uranium mining; or
 - nuclear energy based power generation;
- Weapon companies:
 - involved in the production of controversial weapons (including cluster munitions, landmines, biological and chemical weapons) or nuclear weapons; or
 - which derive more than 5% revenue from conventional weapons, related components and systems;
- Fossil fuels: companies which:
 - derive more than 10% revenue from thermal coal-based power generation; or
 - derive more than 5% revenue from thermal coal mining or sale, oil sands, fracking or arctic drilling;
- Companies that the Investment Manager determines to be in breach of the United Nations Global Compact principles on human rights, labour rights, the environment and anti-corruption.

The fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. This is achieved through (i) operating exclusions lists, as detailed above, based on industries where the Investment Manager assesses there to be fundamental ESG-related concerns, (ii) taking into consideration ESG risks and opportunities, which may additionally influence the bonds selected depending on the outcome of the ESG evaluation, and (iii) favouring investment in issuers with low or reducing carbon intensity,

with the Investment Manager aiming for the fund's carbon intensity (as measured by scope 1 & 2 emissions) to be below that of the ICE BoAML Global High Yield Constrained Index. Further information is contained in a methodology statement available on the Artemis website at www.artemisfunds.com/methodology-statement.

The environmental social and governance (ESG) evaluation of individual securities is determined by the Investment Manager using information provided by the companies (for example company sustainability reports) and third-party data focusing on individual factors and metrics that the Investment Manager considers to be relevant.

More information about the environmental or social characteristics for this fund is available in the pre-contractual disclosure for financial products referred to in Article 8 under SFDR which follow the fund's details and which form an integral part of the Prospectus.

In addition to purchasing high yield bonds, the fund may use derivatives and other techniques for investment, hedging and for efficient portfolio management. The fund's derivatives may include, but are not limited to, futures, forward currency contracts, credit default swaps (single name and indices) and interest rate swaps. In particular, the Investment Manager intends to hedge the fund's Base Currency against the currencies in which the underlying assets of the fund are denominated. There may be certain currency exposures where it is impractical or not cost effective to apply the portfolio hedge, but the intention is that the fund will operate a target hedge ratio of 100%.

In the event that any bonds held by the fund are subject to a restructuring process, the fund will be permitted to invest in new bonds or equity securities issued as part of the reorganisation process.

The fund may invest up to 10% of its assets in each of the following:

- asset-backed securities and mortgage-backed securities;
- distressed/defaulted bonds; and
- other collective investment schemes.

The fund may invest up to 20% of its assets in each of the following:

- contingent convertible bonds; and
- more speculative high yield bonds, where they carry a credit rating from Moody's, Standard & Poor's or Fitch, that have been given ratings whereby none are at or above B- (for Standard & Poor's and Fitch) or B3 (for Moody's) not qualifying as distressed/defaulted bonds at the time of purchase.

Subject to the limits set out in the Investment Restrictions, the fund may also hold ancillary liquid assets for treasury purposes.

ARTEMIS FUNDS (LUX) – GLOBAL HIGH YIELD BOND

Subject to the limits set out in the Investment Restrictions, the fund may also invest in bank deposits, money market instruments and money market funds in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions.

INVESTMENT REVIEW

Performance

The fund made 2.0%¹ over the six-month period, compared with gains of 1.9% from its ICE BofA Merrill Lynch Global High Yield Constrained USD Hedged index and 2.1% from its IA Global High Yield Bond sector average.

During this time, the fund celebrated an important milestone: its fifth anniversary, which took place in November. Back then, we wrote:

“It has been a good five years, in which we have delivered significant outperformance. Having said that, we are entering the next five years in a far better position to generate alpha for clients. Yields are considerably higher than they were when we first launched the fund, while market and company fundamentals are no longer being suppressed by quantitative easing, meaning there is more room for our bottom-up approach to create value. We are excited about where we can take the strategy by the time it celebrates its 10th anniversary.”

Since then, the investment world was (briefly) turned upside down by Donald Trump's 'Liberation Day' tariffs and their subsequent postponement and reversal. While equities have largely recovered from the volatility, high-yield credit spreads stand out as remaining well wide of previous levels. This has reinforced the considerable yield premium that has built up over recent years, making the opportunity in the asset class appear even more attractive.

Contributors

The single biggest contributor to performance during the period was **Asmodee**, a UK distributor of tabletop games and accessories. In January it announced strong sales and profit growth during the third quarter, largely driven by new releases based on third-party intellectual property.

Our holding in **Constellation**, the market leader in dealer-to-dealer used cars in the UK, moved higher as it announced it was going to call its bonds at a premium in early May 2025. Constellation has delivered strong returns after receiving a significant equity injection, illustrating the ability of high-yield bonds to exhibit different return profiles from their sector. We took profits via a complete sale.

French games developer **Ubisoft** announced the creation of a new unit to develop its next tranche of blockbuster titles. While Ubisoft will retain 75% ownership, the remaining

share is to be taken by Chinese technology group Tencent, which will invest €1.16 billion as part of the transaction. This obviously bodes well for Ubisoft's ability to refinance its bonds due to mature in 2027 and 2031, and they responded in a predictably upbeat fashion.

S&P upgraded the debt of **GFL Environmental**, although we believe a further re-rating to investment grade is likely, with the company announcing the sale of its environmental services division and plans to pay down debt with the proceeds.

Detractors

Our largest detractor during the period was US Gulf of Mexico oil & gas producer **W&T Offshore**. While it was affected by the lower oil price, we felt W&T's underperformance of its sector was unjustified from a fundamental basis given its low lifting (post-drilling extraction) costs, no immediate liquidity needs and leverage of less than 2x. We added to our position.

Australian iron ore and lithium miner **Mineral Resources** experienced some softness. Unease about lower lithium prices and high capex spending was compounded when bad weather in Western Australia damaged one of its supply roads. However, it has a number of strategic options available should the market become too concerned about leverage and/or liquidity. We never buy companies reliant upon a commodity price and as such increased our position on the weakness.

German pharmaceutical group **Cheplapharm** suffered following a disappointing set of Q3 results. While these were below our expectations, the underperformance of the bonds looks overdone.

US medical real estate investment trust **Medical Properties Trust** saw continued underperformance of its largest client, which led us to become more cautious on its ability to manage upcoming 2026 and 2028 maturities. We sold out.

In Q1 2025, French fashion house **Isabel Marant** underwhelmed investors with a cautious outlook for the remainder of the year. After we added to the position, it surprised the market with good numbers and positive momentum in the underlying business. This led its bonds to rally at the end of April and into May.

Purchases

Here we think it would be good to focus on some of our April purchases, to show the sort of value available to high-yield investors who are willing to hold their nerve and take a selective, off-benchmark approach when the market panics.

- **SNF** (the dominant player in flocculant polyacrylamide [PAM], a chemical primarily used in water filtration – if you like drinking clean water, you've probably used one of SNF's

Past performance is not a guide to the future.

¹ Artemis/Lipper Limited, class I USD Acc to 30 April 2025. All figures show total returns with dividends and/or income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if you invest in a different currency class.

products) 2027 maturity bonds: bought at an 8.7% yield (in US dollars) to a 12-month early call.

- **Owens & Minor** (a US medical-supply company which actually released a positive earnings report in April and issued bonds to pay for an acquisition – thus clearing up a potential risk the market had been worried about): bought at a 12.8% yield (in US dollars) to a 12-month early call.

- **CBR** (this German fashion wholesaler has no sales outside of Europe, zero exposure to the US and sailed through Covid while deleveraging and generating cash throughout. There is no logical reason why it sold off in the middle of the tariff volatility and it recovered quickly – but we were able to buy bonds near the lows) 2030 maturity bonds: bought at an 8.6% yield to a 12-month early call (hedged into US dollars).

- **Titan International** (as a US-based wheel producer it has very little cross-border trade and so is likely to be a net beneficiary of tariffs) 2028 maturity bonds: bought at a 9.0% yield (in US dollars) to a 12-month early call.

- **W&T Offshore** (mentioned above): bought at a 19.7% yield (in US dollars) to a 12-month early call.

- **Isabel Marant** (mentioned above – while it has issues, the retail business is growing in low double digits, it has cash on the balance sheet, no liquidity concerns and a low level of cash burn, while comparator multiples cover the debt easily): bought at 56 cents on the euro, for a yield of 51.4% to a 12-month early call.

Sales

We sold a number of holdings to fund the above additions, including auto-parts maker TI Fluid Systems, data-storage provider Domestic & General and US grocery chain Albertsons. We also sold Crocs, a producer of questionable (but admittedly profitable) footwear choices, on concerns that positive momentum in its brand is beginning to fade.

Many of the names we purchased (such as SNF, CBR and Titan International) are not exposed to tariffs in any way, while some of the names we sold (such as Albertsons and Crocs) are – so it wasn't simply a case of selling non-tariff-exposed bonds to buy tariff-exposed ones.

Prior to the April volatility, most of the sales we made during the six-month period could be attributed to profit taking.

Outlook

The market now appears largely to have decided that tariffs will result in lower economic growth and higher inflation, but that investors will look through it. As we write this, both the S&P 500 and the MSCI World are just 0.4% below where they were before tariffs were announced. Although 10-year US Treasuries have been volatile, they have ended the month within 10bps of their starting point. In this world, credit spreads stand out – those on the global high-yield market have moved 58bps wider. We couldn't honestly tell you which of these markets is 'right', but it does suggest that high yield

has baked in considerably more of a valuation discount over the past month than other risk markets.

As ever within a highly active strategy such as ours, we have done our best to jump on these opportunities for discounted valuations – where we judge the real risks have not changed nearly as much – when they present themselves. We did the same in 2020 when yields on the market were very similar to what they are today. That worked out very well for our investors. Volatility always opens up opportunities for a strategy like ours. By being nimble and moving quickly, we picked up some bonds this month that we are confident will prove to be bargains over the next few years. We believe that the volatility of this year is likely not over yet and are excited about getting to go bargain-hunting again soon.

David Ennett and Jack Holmes

ARTEMIS FUNDS (LUX) – LEADING CONSUMER BRANDS

INVESTMENT OBJECTIVE AND POLICY

The fund aims to increase the value of Shareholders' investments primarily through capital growth over a five year period.

The fund invests principally (at least 80% of its assets) in companies selected on a worldwide basis (including in emerging markets) which are considered by the Investment Manager to own or operate leading consumer brands. These are consumer-facing businesses which, through their heritage, innovation and investment have developed market-leading brands in the category (or categories) in which they operate. The Investment Manager believes that these brands provide an enduring competitive advantage which allows them to earn customer loyalty, strong pricing power and high margins. The Investment Manager expects these companies to benefit from long-term structural trends in consumer spending. The fund will not be constrained to any sector.

It is expected that the portfolio of the fund will be invested in equities of between 25 and 50 companies.

Shares in the following types of companies (held either directly or indirectly via derivatives) are automatically excluded:

- Tobacco: companies which derive more than 10% revenue from tobacco;
- Gambling: companies which derive more than 10% of revenue from gambling;
- Weapons: companies:
 - involved in the production of controversial weapons (including cluster munitions, landmines, biological and chemical weapons); or
 - which derive more than 5% revenue from conventional or nuclear weapons, related components and systems;
- Fossil fuels: companies which derive more than 5% revenue from:
 - mining or sale of thermal coal; or
 - extraction, production or refining of either oil or gas.
- Companies that the Investment Manager determines to be in breach of the United Nations Global Compact principles on human rights, labour rights, the environment and anti-corruption.

The fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. In that respect, the Investment Manager assesses the sustainability of each investment by considering sustainability factors which are material to the investment case for each holding, such as carbon intensity, carbon transition plans, remuneration policy and/or board diversity,

alongside traditional financial metrics. However, investments are chosen on the basis of many quantitative (financial or sustainability-related) or qualitative (e.g. quality and/or growth characteristics) attributes and need not rate highly on any or all of these sustainability factors to be included in the portfolio.

In addition to sustainability criteria considered during company selection, other sustainability criteria are taken into account in the thematic analysis at sector and company level.

More information about the environmental or social characteristics for this fund is available in the pre-contractual disclosure for financial products referred to in Article 8 under SFDR which follow the fund's details and which form an integral part of this Prospectus.

At times the fund may invest in ADRs, GDRs and participatory notes. Participatory notes would be used to access markets where direct access to purchase equities may be difficult. Their use is not intended to create leverage. Investments in participatory notes shall not exceed 10% of the fund's Net Asset Value.

The fund may invest up to 20% of its Net Asset Value in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect.

The fund may use derivatives and other techniques for hedging and for efficient portfolio management. The fund's derivatives may include, but are not limited to, futures, forward currency contracts and contracts for difference.

Subject to the limits set out in the Investment Restrictions, the fund may also hold ancillary liquid assets for treasury purposes.

Subject to the limits set out in the Investment Restrictions, the fund may also invest in bank deposits, money market instruments and money market funds in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. Higher levels of investments in bank deposits, money market instruments or money market funds may be held in periods of elevated equity market valuations to reduce risk.

The fund may invest up to 10% of its Net Asset Value in other collective investment schemes.

ARTEMIS FUNDS (LUX) – LEADING CONSUMER BRANDS

INVESTMENT REVIEW

Overview

The period started with Chinese equities and emerging markets briefly leading the way after the government in Beijing announced an enormous package of stimulus measures. However, this optimism was soon tempered by questions over the efficacy of the measures, and later on, by Donald Trump's victory in the US presidential election. Expectations of tax breaks and deregulation helped to supercharge the US rally, but the threat of tariffs led to a pullback in countries with which it has a large trade deficit.

The final month of the period in question – April 2025 – was dominated by 'Liberation Day' and its aftermath, as Trump announced extreme levels of 'reciprocal' tariffs, only to compromise a week later by implementing a 90-day pause. Global equities sold off with the US leading the way down, but markets have subsequently recouped most of their losses.

We have now entered a period where macro concerns are driving asset prices. Worries over the future economic direction of the US, epitomised by tariff moves, have forced asset allocators to question their exposure to the world's dominant stock market.

Amid this volatility, Artemis Funds (Lux) – Leading Consumer Brands made a return of 1.7%¹ over the six-month period, compared with 0.9% from its MSCI AC World index benchmark.

Contributors

Amer Sports, owner of the Arc'teryx, Salomon and Wilson brands, was the standout performer during the period after a surprise trading update in Q4 revealed sales in China over the Golden Week national holiday increased by 60% compared with the previous year. Notably, sales of its flagship Arc'teryx brand accelerated meaningfully in its higher-margin retail channel.

When we first invested in Amer in Q3 2024, we felt the company would exceed conservative expectations, but since then it has placed shares in the market to optimise its capital structure by paying down non-tax-deductible debt, creating further tailwinds for earnings, valuation and the share price. We modestly trimmed our position.

EssilorLuxottica reported acceleration in its top-line growth during Q4 and suggested potential for margin improvement. Reported sales of 2 million units of the Meta Ray-Ban glasses were ahead of expectations, while it has high hopes for its Nuance smart audio glasses which have a built-in hearing aid to support people with mild to moderate hearing loss. Following strong performance, we took some profits from the company.

Richemont delivered a positive earnings surprise. The company's idiosyncratic growth drivers mean there is limited correlation between its fundamentals and the fortunes of the wider luxury sector, and this view was borne out in an update at the start of January that confirmed an acceleration in trading, leading to strong share price outperformance. This also benefited another quality play in the sector, **Hermès**, which has since also reported better-than-expected results.

Towards the end of the period, **Lindt** and **Technogym** benefited from their relative resilience to tariffs. Pricing power-wise, both can pass on rising costs to end consumers in their respective markets of premium chocolate and premium fitness equipment.

Detractors

Deckers performed poorly on profit-taking after a strong run in 2024 followed by nervousness around its 2025 prospects in the face of tariffs and macro concerns. The footwear designer increased guidance for top-line growth from 12% to 15%, noting strong demand for its flagship Hoka and Ugg brands. However, this increase was no more than expected and its shares fell significantly. We added to our position, believing the de-rating to have been extreme and valuation compelling for the growth on offer.

Although **Prada** performed well in February, it fell victim to concerns over tariffs in the second half of March. Although there are concerns about the second-order impact on consumer spending, we believe a reversal in positioning was the main cause of its underperformance rather than the pricing of negative outcomes.

LVMH came under pressure in Q4 from a series of unexpected management changes at the divisional level and France's one-off 'surtax' on profitable companies. Together, these are expected to shave 2 to 3% off its EPS (earnings per share). These headwinds followed a trend of normalisation in luxury demand over the course of 2024, which led LVMH's shares to fall out of favour. However, we believe fundamentals have likely troughed. It staged a sequential improvement in Q4 trading versus Q3 and we believe the shares continue to reflect a degree of scepticism about the sustainability of the recovery, opening an attractive valuation opportunity to add to our position.

Purchases

The two biggest additions to the portfolio over the period were **Eicher Motors** (owner of the Royal Enfield motorcycle brand) and **American Express**.

Past performance is not a guide to the future.

¹ Source: Artemis/Lipper Limited, class I Accumulation, mid to mid in USD. All figures show total returns with dividends and/or income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if you invest in a different currency class.

Eicher Motors has a 45% share of the Indian premium motorcycle market. It has seen an acceleration of sales volumes from new model launches, particularly on the 450cc platform. We believe volumes can accelerate further from here, a contention that is not priced into consensus forecasts.

With payments becoming more commoditised, consumers need a good reason to pick one method over another. High-income customers choose American Express because of its brand, reward benefits (funded by partners) and the 'sunk cost' of having paid a membership as you would for a service such as Amazon Prime.

Meanwhile, card network revenues, membership and absolute spend per card continue to grow, while counterintuitively, a large increase in card fees as higher rewards kick in appears to be increasing usage.

It is our view that the strengthening ecosystem around Amex's network should be valued at a higher multiple and the lending side of the business at a premium to a bank. Earnings should also grow more quickly than historical levels.

We also initiated a position in the world's most profitable spirits company, **Kweichow Moutai**. Moutai has a 94% market share in the prestige segment in baijiu, a white Chinese spirit, with high barriers to entry that it has cultivated for more than 90 years. Its prestige offering Feitian accounts for about 90% of profit and is the main driver of the company's current gross margin of more than 90%. Direct sales are on track to exceed 60% of liquor revenues by 2026 – offering further upside to already high operating margins.

Towards the end of the period, we invested in Indian jewellery retailer **Titan** – a beneficiary of robust gold demand in India, insulated from global tariffs.

Sales

Menswear retailer **Hugo Boss** announced weak Q1 trading in its key US market. With the shares' low valuation insufficient to compensate for mounting earnings risk, we sold out.

Concerns that excessive pricing had reduced participation levels (and therefore earnings) for longer than expected at **Vail Resorts** led us to sell our small position. We reduced our position in another hotelier, **Marriott**, on worries about the second-order effect of tariffs on growth and consumer confidence.

We exited **Ralph Lauren** on concerns over the brand's international growth potential (more than 50% of sales) on a likely consumer backlash to iconic American brands.

Outlook

We are not much wiser than we were in the immediate aftermath of Liberation Day about where the level of tariffs will eventually settle.

Tariffs on Chinese imports will require brands to significantly reprice upwards and/or Chinese suppliers to take a margin

hit to keep doing business. A third option is for brands to raise prices globally rather than just in the US, helping spread the pain more evenly, and we have already seen evidence of companies taking this route. In sectors such as luxury, this has the added advantage of preventing arbitrage from higher- to lower-priced shopping destinations, which can be disruptive to company operations.

Most luxury goods have no China sourcing but are affected by additional tariffs on European imports, which would require cost mitigation for the majority and passthrough for the select few with genuine pricing power. On Q1 results calls, management teams have seemed confident about passing on price increases to mitigate tariffs but have been more cautionary about the US consumer (albeit depending on the company).

Those exposed to the higher end such as **Hermès** and **Brunello Cucinelli** continue to see stable trends despite the equity market sell-off, while **Kering** and even former sector leader **LVMH** are experiencing difficulties due to the higher proportion of aspirational consumers within their client base.

We are concerned about sporting goods companies due to proposed tariffs on Vietnam of 46% – where, for example, **On Holding** sources 90% of its product. There are worries that consumers would be unwilling to pay the extra mid-single-digit to high-single-digit increase on On's \$150 trainers to offset the extra cost.

We also think domestic US travel – which has boomed since the end of Covid lockdowns – could be due a slowdown and have been preparing for this by favouring the more internationally exposed **Accor** as our preferred hotel operator. The company delivered better-than-expected Q1 results and issued a confident outlook for the remainder of the year, noting no slowdown in Q2 to date.

The dynamics of consumer financial health and behaviour are currently extremely nuanced. While overall spending remains stable with a positive outlook in the near term, income disparities, reliance on credit among lower-income households and potential tariff impacts introduce notable vulnerabilities. Continued monitoring of these trends will be critical to gauge the longer-term resilience of the US consumer market amid ongoing economic uncertainties. The ongoing noise from tariff newsflow is starting to present attractive opportunities to both add to the structural winners and share-gainers within the sector on a longer-term view and prune names more at risk from exposure to lower-end discretionary spending or a higher-than-average reliance on the US consumer.

Swetha Ramachandran and Natasha Ebtehadj

ARTEMIS FUNDS (LUX) – SHORT-DATED GLOBAL HIGH YIELD BOND

INVESTMENT OBJECTIVE AND POLICY

The fund aims to generate a return greater than the benchmark, after the deduction of costs and charges, over rolling three-year periods, through a combination of income and capital growth.

The fund may invest in the bonds of any type of issuer (for example government or corporates) with no restriction on economic or geographic areas (including emerging markets).

The fund will invest at least 80% in short-dated high yield bonds, which:

- have a residual maturity of less than five and a half years; and
- either (a) have been given a credit rating of: (i) Ba1 or lower by Moody's; (ii) BB+ or lower by Standard & Poor's; (iii) BB+ or lower by Fitch; or (b) have not been rated but which the Investment Manager believes would, if they were rated, be given a comparable credit rating.

Corporate bonds (held either directly or indirectly via derivatives) issued by companies involved in the following are automatically excluded:

- Tobacco: companies which derive more than 5% revenue from tobacco production;
- Nuclear power: companies which derive more than 5% revenue from:
 - nuclear power plant ownership or operation;
 - manufacturing of nuclear-specific essential components;
 - uranium mining; or
 - nuclear energy based power generation;
- Weapons: companies:
 - involved in the production of controversial weapons (including cluster munitions, landmines, biological and chemical weapons) or nuclear weapons; or
 - which derive more than 5% revenue from conventional weapons, related components and systems;
- Fossil fuels: companies which:
 - derive more than 10% revenue from thermal coalbased power generation; or
 - derive more than 5% revenue from thermal coal mining or sale, oil sands, fracking or arctic drilling;
- Companies that the Investment Manager determines to be in breach of the United Nations Global Compact principles on human rights, labour rights, the environment and anti- corruption.

The fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. This is achieved through (i) operating exclusions lists, as detailed above, based on industries where the Investment Manager assesses there to be fundamental ESG-related concerns, (ii) taking into consideration ESG risks and opportunities, which may additionally influence the bonds selected depending

on the outcome of the ESG evaluation, and (iii) favouring investment in issuers with low or reducing carbon intensity, with the Investment Manager aiming for the fund's carbon intensity (as measured by scope 1 & 2 emissions) to be below that of the ICE BoAML Global High Yield Constrained Index. Further information is contained in a methodology statement available on the Artemis website at www.artemisfunds.com/methodology-statement.

The environmental social and governance (ESG) evaluation of individual securities is determined by the Investment Manager using information provided by the companies (for example company sustainability reports) and third-party data focusing on individual factors and metrics that the Investment Manager considers to be relevant.

The Investment Manager shall target an average duration, across all of the bonds held by the fund, between zero and two years in normal market circumstances; however there may be times (for example in periods of high volatility or market disruption) when average duration will be above two years. In these circumstances, the Investment Manager shall endeavour to return the portfolio to an average duration between zero and two years as soon as practicable taking into account the best interests of Shareholders.

The fund may use derivatives and other techniques for investment, hedging and for efficient portfolio management. The fund's derivatives may include, but are not limited to, futures, forward currency contracts, credit default swaps (single name and indices) and interest rate swaps.

In particular, the Investment Manager intends to hedge the fund's base currency against the currencies in which the underlying assets of the fund are denominated. There may be certain currency exposures where it is impractical or not cost effective to apply the portfolio hedge, but the intention is that the fund will operate a target hedge ratio of 100%.

In the event that any bonds held by the fund are subject to a restructuring process, the fund will be permitted to invest in new bonds or equity securities issued as part of the reorganisation process.

The fund may invest up to 10% of its assets in each of the following:

- asset-backed securities and mortgage-backed securities;
- distressed/defaulted bonds.
- more speculative high yield bonds, where they carry a credit rating from Moody's, Standard & Poor's or Fitch, that have been given ratings whereby none are at or above B- (for Standard & Poor's and Fitch) or B3 (for Moody's) not qualifying as distressed/defaulted bonds at the time of purchase; and
- other collective investment schemes.

Subject to the limits set out in the Investment Restrictions, the fund may also hold ancillary liquid assets for treasury purposes.

Subject to the limits set out in the Investment Restrictions, the fund may also invest in bank deposits, money market instruments and money market funds in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions.

INVESTMENT REVIEW

Overview

The fund made 1.9%¹ over the six-month period, underperforming both its Secured Overnight Financing Rate (SOFR) benchmark, which made 2.2%, and its IA Sterling High Yield Bond sector average, which made 2.2%. We are still ahead of both measures over one, three and five years.

Part of the underperformance over the period in question can be attributed to the tariff-induced volatility of April when we were held back by a number of technical factors rather than idiosyncratic credit 'blow-ups'. Our positioning in B-rated securities acted as a headwind as BB-rated bonds outperformed in the risk-off environment, while our CCC underweight wasn't as protective as it could have been given the large amount of telecommunications debt in this bucket.

As many of our clients will be aware, we have a strategic underweight to the telecom and utility sectors in the fund due to our concerns around balance-sheet sustainability and mounting refinancing risk in a higher interest-rate environment. Unfortunately, in a sharp sell-off such as the one seen in April, the market instead tends to focus on the short-run stability of cashflows as longer-term dynamics become tomorrow's problem.

We have seen this dynamic many times in high yield, notably in March/April 2020 as Covid shutdowns shocked the market. As was the case then, we resisted the temptation to position ourselves for an easy month by adding a bunch of 'okay now/problem in future' positions at the cost of substantial future returns. On the contrary, we used April's sell-off as an opportunity to add to some of our most beaten-up names and lock in attractive yields to be harvested soon. The tendency for the high-yield market to be liquidity/flow driven in the short term, while ultimately returning to cashflow fundamentals in the medium term, may mean it periodically torments our very souls, but is also what makes it such a fertile hunting ground for active returns.

As we sit here in early May, we are pleased with our actions during the sell-off where we added yield to the fund at, or near, the lows. While we have given back some of our historic outperformance as we leant into the sell-off, we believe we are now better positioned than we were a month ago to deliver higher returns over the rest of 2025 and beyond.

Contributors

Our holding in **Constellation**, the market leader in dealer-to-dealer used cars in the UK, moved higher as it announced it was going to call its bonds at a premium in early May 2025. Constellation has delivered strong returns after receiving a significant equity injection, illustrating the ability of high-yield bonds to exhibit different return profiles from their sector. We took profits via a complete sale.

Recent purchase **TI Fluid Systems**, a specialist auto-parts manufacturer, hit the ground running. We have started to add risk back in the auto sector in recent months as valuations have become cheaper. TI has an attractive niche in pressurised fuel tanks which stand to disproportionately benefit from what we think will be a slowdown in the sale of battery electric cars and a corresponding increase in mezzanine technologies, such as full and partial hybrids.

IHO Verwaltungen, the holding company of Tier-1 German auto parts manufacturers Schaeffler and Continental, performed strongly after the market's perception of the correct risk premium moved closer to our own. Again, cyclical pricing looked overdone, and we were able to profit from the market unwinding some of its overblown concerns.

French games developer **Ubisoft** announced the creation of a new unit to develop its next tranche of blockbuster titles. While it will retain 75% ownership, the remaining share is to be taken by Chinese technology group Tencent, which will invest €1.16 billion as part of the transaction. This obviously bodes well for Ubisoft's ability to refinance its bonds due to mature in 2027 and 2031, and they responded in a predictably upbeat fashion.

Detractors

Our largest detractor during the period was US Gulf of Mexico oil & gas producer **W&T Offshore**. While it was affected by the lower oil price, we felt W&T's underperformance of its sector was unjustified from a fundamental basis given its low lifting (post-drilling extraction) costs, no immediate liquidity needs and leverage of less than 2x. We added to our position.

German pharmaceutical group **Cheplapharm** suffered following a disappointing set of Q3 results. While these were below our expectations, the underperformance of the bonds looks overdone to us now.

In Q1, French fashion house **Isabel Marant** underwhelmed investors with a cautious outlook for the remainder of 2025. After we added to the position, it surprised the market with good numbers and positive momentum in the underlying business. This led its bonds to rally at the end of April and into May.

Past performance is not a guide to the future.

¹ Source: Artemis/Lipper Limited, class I USD Acc to 30 April 2025. All figures show total returns with dividends and/or income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if you invest in a different currency class.

ARTEMIS FUNDS (LUX) – SHORT-DATED GLOBAL HIGH YIELD BOND

Largely as to be expected in April, we saw softer performance from cyclical holdings in areas such as specialty chemicals (**Ineos** and **Synthomer**) and mining (**Mineral Resources**). We added to our positions.

Purchases

One notable purchase early in the period was **Belron**, the global leader in windscreen-repair, a hugely profitable area. The increasing use of sensors located just behind windscreens means minor repairs now require specialised equipment to recalibrate said sensors, which increases pricing and drives out smaller competitors unwilling to invest. As the market leader, Belron is set to capture the natural consolidation in the industry.

We were most active in the volatility of April, notably in a 'white whale': French specialty chemicals producer **SNF**. Although we already held some of its bonds, it became our biggest position when we bought its 2027 paper at a yield to call of 8.7%.

SNF is responsible for about 56% of the global supply of flocculant PAM (Polyacrylamide), a chemical used to 1) purify municipal water used by around 1 billion people and 2) enhance recoveries when drilling for oil. Although there is nothing remarkable in either business, it is the interaction of the two and the price volatility of PAM's main ingredient, propylene, which makes it interesting.

When energy prices are high, its water-purification business has modest margins due to high input costs and constant demand. However, such periods see a massive increase in demand for PAM's other use, as adding the chemical to drilling fluids becomes economic above a certain oil price.

Conversely, when energy prices fall, oil drillers use less PAM but the water business becomes super profitable due to the same constant demand but sharply lower input costs. This means the cycle determines whether this business – with leverage of just 1.2x – increases profits via margin or revenue growth.

Elsewhere we added to names that were knocked around on cyclical angst, such as contract miner **Perenti** and tyre manufacturer **Titan International**.

Sales

Earlier in the period, we exited our position in European lottery provider **Allwyn**. The bonds had performed well but we grew concerned about the faltering performance of the UK lottery business it acquired. We also exited wheelchair maker **Sunrise Medical**, primarily on valuation grounds.

Other bonds we sold included **Multiversity**, an Italian online university, and **Bertrand Franchise**, a French restaurant group which owns the rights to Burger King in France. Both bonds had significantly outperformed since we purchased them. Nothing extraordinary happened in either business. The point is that just because these kinds of issuers are not in the group of over-covered index constituents towards the

larger end of the high-yield market, they are often structurally mispriced and able to generate alpha even if the macro is going against them.

Although we underperformed in the volatility of April, we felt the fund's design set it up well for the future. Each holding has a maximum of 5.5 years until maturity, resulting in a compressed maturity/call schedule. As such, we received around 3% of the fund's NAV back to us as called bonds. Getting cash at par (and above) in times of heightened volatility allowed us to buy positions without having to fund them via sales in the same tricky market. The only genuine sale we made in the month was our position in high-fashion footwear pioneer **Crocs**, which held up 'too well' in the volatility. We are also seeing greater competition from other brands in the sector it essentially created.

We remain invested in German pharma company **Cheplapharm**, but rotated our dollar holdings into euro ones, as cross-market inefficiency tends to increase during periods of volatility, and we were happy to exploit these once again.

Outlook

April was an eventful month which saw the full gamut of investor emotions. The shock of the 'Liberation Day' tariff announcements was met with revulsion and the pricing of some cataclysmic outcomes. While the subsequent pauses, reversals and climb-downs were welcomed, there remains a high degree of uncertainty. We are cautious as to the damage done to inventory and corporate supply chains, not to mention consumer confidence. Like most fixed-income investors, we will be keenly monitoring macro data as well as company statements from April onwards. We feel the most likely outcome is a more volatile but perhaps less extreme environment.

As such, we think continuing to seek attractive risk/reward trade-offs without seeking pure beta in portfolios is the right strategy. While tariffs will generally be 'bad' for everyone (and especially so for US consumers), they will nevertheless create relative winners and losers within individual sectors, meaning stock selection and knowing your credits inside-out will be as important as ever. Just as we trimmed risk in February as the market got a little too comfortable, we added risk in April as the opposite occurred. This will continue to be our approach as we move through 2025.

Fundamentally, the countervailing impact of tariffs – suppressing growth on one hand but increasing inflation on the other – makes us cautious on longer-duration assets as a source of yield. Whichever of these impacts ultimately prevails is relevant, but in any case, the path will not be a straight line and volatility in duration markets appears to be the only certainty. As such, a strategy of conspicuously avoiding duration and seeking out high-quality corporate cashflows as a source of return appears as sensible as ever.

David Ennett and Jack Holmes

ARTEMIS FUNDS (LUX) – SMARTGARP GLOBAL EMERGING MARKETS EQUITY

INVESTMENT OBJECTIVE AND POLICY

To increase the value of Shareholders' investments through a combination of capital growth and income.

The fund invests principally in equities of companies that are listed, headquartered or that exercise the predominant part of their economic activities in emerging market countries.

A proprietary tool called 'SmartGARP' is used as the foundation of the investment process. It screens the financial characteristics of companies by identifying those that are growing faster than the market but are trading on lower valuations than the market. The Investment Manager selects companies that in aggregate have good 'SmartGARP' characteristics. This tends to mean that the portfolio contains stocks that have lower valuations than the market average, upgrades to profit forecasts, and are under-owned by the investment community, while at the same time benefiting from helpful trends in the wider economy.

Shares in the following types of companies (held either directly or indirectly via derivatives) are automatically excluded:

- Tobacco: companies which derive more than 5% revenue from production, distribution or sale of tobacco
- Weapons: companies:
 - involved in the production of controversial weapons (including cluster munitions, landmines, biological and chemical weapons) or nuclear weapons; or
 - which derive more than 5% revenue from manufacture or sale of civilian firearms or ammunition;
- Coal: companies which derive more than 5% revenue from mining or sale of thermal coal.

The fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. 'SmartGARP' also screens companies globally for Environmental, Social and Governance (ESG) characteristics. Beyond taking into consideration how companies score on the 'SmartGARP' ESG factor generally, the Investment Manager pays particular attention to companies' current and expected carbon footprint, with the fund aiming to have a falling carbon emission intensity over the long term, at least five years. Whilst the exclusions are binding on the selection of investments, the Investment Manager is not constrained by the results of the SmartGARP screening. The Investment Manager exercises discretion as to which securities are included in the portfolio, using both financial and ESG inputs from SmartGARP. Further information is contained in a methodology statement available on the Artemis website at www.artemisfunds.com/methodology-statement.

More information about the environmental or social characteristics for this fund is available in the pre-contractual disclosure for financial products referred to in Article 8 under SFDR which follow the fund's details and which form an integral part of this Prospectus.

The fund will invest in equity securities directly or indirectly through instruments such as, but not limited to, ADRs, GDRs, participatory notes and contracts for difference.

Participatory notes and contracts for difference will be used to access markets where direct access to purchase equities may be difficult. Their use is not intended to create leverage. Investments in participatory notes and contracts for difference shall not exceed 20% of the fund's Net Asset Value.

The fund may invest up to 20% of its Net Asset Value in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect.

The fund may use derivatives and other techniques for hedging and for efficient portfolio management. The fund's derivatives may include, but are not limited to, futures and forward currency contracts.

Subject to the limits set out in the Investment Restrictions, the fund may also hold ancillary liquid assets for treasury purposes.

Subject to the limits set out in the Investment Restrictions, the fund may also invest in bank deposits, money market instruments and money market funds in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions.

The fund may invest up to 10% of its Net Asset Value in other collective investment schemes.

INVESTMENT REVIEW

Main changes to the fund

Volatility in the market required us to make some changes over the period. Our largest purchase was in BYD, a Chinese auto business that is making substantial market share gains relative to its competitors in both Europe and the US. Also in China, we added PICC (insurance) and CMOCC (materials) to name but a few. Other notable purchases were in India, where we added Redington (technology) and Eicher Motors (autos).

To fund these purchases, we reduced Reliance Industries (India, energy) and ICICI Bank (India) and sold CNOOC (China, energy) and Companhia Energetica (Brazil, utilities).

This leaves the portfolio's characteristics largely unchanged. At a country level, we remain most overweight China and Brazil, and most underweight India and Taiwan. At a sector level, autos and transportation are overweights, and semiconductors and media & entertainment underweights.

The fund continues to trade at a discount to the market (around 30%), yet with the same growth and quality characteristics and a substantial income premium.

Explaining the fund's performance

The fund returned 3.1%¹ outperforming its benchmark the MSCI Emerging Markets index, which returned 0.4%.

At a country level there was broad contribution, with our exposure in China, Taiwan, India, Colombia, Brazil, UAE, Poland proving positive. The only notable detracting country was South Africa.

At a sector level, industrials held back performance. We had strong contributions from financials, consumer discretionary and real estate.

Top stock contributors were Emaar Properties (real estate, UAE), Bancolombia (bank, Colombia) and Geely (auto, China). On the negative side was our lack of exposure to Xiaomi (technology, China), as well as our holdings in Hon Hai (technology, Taiwan), and JD.com (retail, China).

The wider context

Over the period, there was significant volatility in markets caused by the election of President Donald Trump, and the policy initiatives that followed, in particular his imposition of tariffs on the US's main trading partners. While few countries escaped, emerging markets seemed to be particularly hard hit, with China receiving the most punitive rates and responding with its own tariffs on US goods.

Looking ahead

The Chinese economic recovery has so far been underwhelming, partly because the geopolitical background is creating heightened uncertainty. On the positive side, the potential for stimulus measures to offset a weaker growth outlook could be significant.

Emerging market stocks remain lowly valued and out of favour. This gives them some downside protection compared to markets that have performed exceptionally well and where growth has been extrapolated far out into the future. In the shorter term of course, any weakness in sentiment leads to selling of emerging markets. Rather than become more pessimistic in these periods, we think a contrarian approach of allocating to the asset class will be a rewarding strategy.

When times are bad, risk aversion can lead to indiscriminate selling. We believe this creates opportunities for disciplined investors and our process has been designed to look for the companies where the fundamentals are signalling good news, yet share prices are not reflecting this optimism.

Raheel Altaf

Fund manager

Past performance is not a guide to the future.

¹ Source: Artemis/Lipper Limited, class I USD Acc to 30 April 2025. All figures show total returns with dividends and/or income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if you invest in a different currency class.

ARTEMIS FUNDS (LUX) – UK SELECT

INVESTMENT OBJECTIVE AND POLICY

The fund aims to grow capital over a five year period.

The fund invests principally (at least 80% of its net assets) in equities of companies that are headquartered or have a significant part of their activities in the United Kingdom.

The fund will not be constrained to any economic sector. It is expected that the portfolio of the fund will be invested in the equities of between 35 and 65 companies.

The fund may also hold up to 20% of its Net Asset Value in other transferable securities and derivatives.

At times the fund may invest in fixed income securities, including high yield bonds and contingent convertible bonds, up to a maximum of 20% of the fund's Net Asset Value. The minimum credit rating for high yield bonds is B (Standard & Poor's or the equivalent from other rating agencies).

The fund makes use of derivatives for investment purposes to take both long and short positions in individual companies. At times, the fund may also use equity index futures and/or options (long or short) in order to vary the level of volatility and/or market exposure in the fund.

The fund's net exposure to companies will typically lie in the range of 85-100% (longs minus shorts) depending on market conditions.

The fund may also use derivatives and other techniques for hedging and for efficient portfolio management. The fund's derivatives may include, but are not limited to, futures, forward, swaps, options currency contracts and contracts for difference.

At times, the fund may invest in ADRs, GDRs and participatory notes. Participatory notes would be used to access markets where direct access to purchase equities may be difficult. Their use is not intended to create leverage. Investments in participatory notes shall not exceed 10% of the fund's Net Asset Value.

Subject to the limits set out in the Investment Restrictions, the fund may also hold ancillary liquid assets for treasury purposes.

Subject to the limits set out in the Investment Restrictions, the fund may also invest in bank deposits, money market instruments and money market funds in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. Higher levels of investments in bank deposits, money market instruments or money market funds may be held in periods of elevated equity market valuations to reduce risk.

The fund may invest up to 10% of its Net Asset Value in other collective investment schemes, including Real Estate Investment Trusts (REITs).

INVESTMENT REVIEW

Overview

The six-month period got off to a difficult start thanks to a badly received Budget in the UK, which heralded an increase in government spending to be partly funded by a sharp rise in employers' national insurance contributions. The OBR's (Office for Budget Responsibility) view was that the net impact was likely to be inflationary, while the lack of any material supply-side reforms meant it was deemed to have done little to improve the UK's long-term growth prospects.

Although the gloom continued into January, with concerns around growth and inflation leading to higher gilt yields, the FTSE 100 started the year positively (it's worth remembering it derives more than three-quarters of its sales from abroad). Mid- and small-cap stocks, which have a higher exposure to the domestic economy, didn't fare as well.

However, we do not think the outlook at home is universally gloomy. Our base case is that the UK economy will muddle through near-term headwinds, before seeing a pick-up in momentum in the second half of the year as inflation starts to fall (as costs from the Budget annualise) and the consumer benefits from lower interest rates.

Later in the period, concerns around UK stagflation rapidly faded as investor attention switched across the Atlantic. Mounting concerns about tariffs reached a head on 2 April and Liberation Day: the US president announced these would be significantly larger and wider-ranging than expected, before they were postponed and/or reversed, helping markets quickly recover losses.

Despite the significant volatility, the fund still managed to deliver a return of 7.1% over the six-month period, compared with a gain of 5.6% from its FTSE All-Share index benchmark¹.

Contributors

Our list of biggest contributors over the period was dominated by the banks, with **NatWest, Barclays, Standard Chartered** and **Lloyds** among our 10 best performers.

Higher interest rates mean higher net interest margins (the difference between the interest banks pay on customer deposits and the interest they receive on loans). The interest rate on banks' 'structural hedges' (risk-management tools used to manage exposure to fluctuations in interest rates)

Past performance is not a guide to the future.

¹ Artemis/Lipper Limited, class I accumulation, mid to mid in sterling (or the indicated currency). All figures show total returns with dividends and/or income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if you invest in a different currency class.

should continue to rise significantly over the next couple of years. As a result, we expect the earnings of the UK's domestic banks to continue to rise even as interest rates creep lower. We added to our positions in Barclays, Standard Chartered and Lloyds.

Rolls-Royce continued to perform well, aided by a further rally in EU defence stocks after Germany announced higher spending in this area and the UK aerospace sector was exempted from tariffs.

From a relative point of view, we benefited from avoiding Glencore, AstraZeneca and Diageo, as shares in these companies fell.

Detractors

Homebuilder **Vistry** announced three profit warnings in quick succession towards the end of last year and has since announced a restructuring programme.

Despite little news, **Oxford Instruments** de-rated sharply, possibly due to fears around tariffs and export restrictions. We added to our position.

WH Smith fell after releasing its interim results, as analysts reduced earnings numbers to account for the exit of the high street business, the re-financing of a low-cost bond and currency movements. Fears around weaker US domestic travel have also weighed on sentiment. However, we view the exit from the high street business as positive for its medium-term growth prospects and on just 10x earnings we have added to our holding.

Packaging manufacturer **Smurfit Westrock** took a hit from tariff fears due to its cyclical nature and the business's significant operations in Mexico, the US and Canada. However, Q1 results were in line with expectations and the company maintained its guidance for the year, aided by cost-cutting such as mill closures (increasing price tension), which offset lower volumes.

From a relative point of view, not holding BAE Systems or British American Tobacco detracted from performance as these stocks rose in value.

Purchases

We initiated a new holding in **Aviva** following its bid for Direct Line. The deal appears to make both strategic and financial sense, increasing the business's exposure to 'capital-light' general insurance earnings and creating substantial cost synergies.

In oil & gas, we switched some of our exposure from **BP** into **Shell**, as the latter offers similar returns for a given commodity price but with lower risk.

We added to **International Consolidated Airlines Group (IAG)** after it fell heavily on tariff concerns. Currency movements and lower fuel costs should offset potentially weaker transatlantic demand, while Q1 numbers showed that bookings through Q2 and into Q3 remain strong.

Sales

The holding in Aviva was funded by taking profits in **DS Smith**, which performed exceptionally well courtesy of the rally in the shares of **International Paper** following the US election. We remain enthused about the story but struggled with the valuation relative to other opportunities available in the UK market.

We exited **Ashtead** early in the period as supply and demand for rental equipment became unbalanced following many years of price increases due to post-Covid disruption. After we sold out, its shares fell when it warned on weaker demand in the US and a more competitive pricing environment.

In 2023, we sold our holding in door-and-window producer **Tyman** when a takeover bid from **Quanex** was completed. This was a part-cash, part-stock deal and the fund was left with a small holding in Quanex's US-listed shares, which we have steadily reduced.

Outlook

The Liberation Day tariff announcements and subsequent de-escalation have only confirmed the unpredictability of policy under Donald Trump, which will likely remain a feature of his second term. Uncertainty over trade will persist as the clock ticks down on the 90 days' 'pause'. The good news is that movements in opinion polls and the bond/equity markets were all it took to get the president to roll back on some of his most unorthodox policies. Consequently, we believe that agreements will be reached in the end, although the journey there will be far from smooth. The on/off nature of tariffs will cause significant volatility in global supply chains as we move through the summer, making it difficult to predict near-term earnings for international businesses.

This uncertainty will weigh on global growth, while the US consumer will pick up the cost of tariffs. Trump has promised the tax cuts in the One Big Beautiful Bill Act, which has just been passed by the House, will offset these headwinds, but the size of the US budget deficit significantly limits room for manoeuvre if the bond market is to remain onside.

Turning to the UK, we believe the impact of the tariffs will be limited and as the first country to sign an agreement with the US, those companies that are directly affected can at least now plan their medium-term response. Indirect impacts of the tariffs include lower commodity prices and a stronger pound, two trends that will ease inflationary pressures on the economy and allow the Bank of England to continue to reduce interest rates through the second half of the year. This creates a favourable backdrop for the UK consumer to finally come out and spend – particularly given ongoing positive real wage growth and exceptionally high savings rates over recent years.

Despite the headwinds of the Budget, we have already started to see some green shoots of spending from domestically focused UK PLCs as well as the strong Q1 GDP print (+0.7% quarter-on-quarter), where growth was led by services. Over the course of the last two months, we have

ARTEMIS FUNDS (LUX) – UK SELECT

tilted the portfolio further towards domestically focused companies and as result we believe the fund is well placed to capture both the earnings recovery and multiple expansion as consumer confidence builds through the summer.

Away from the macro, we believe that for the first time since the Brexit vote, a more favourable narrative is starting to build around allocating to the UK market (trade deals have been signed, the pound is strengthening, macro conditions are improving, the consumer is on the cusp of a recovery, Budget headwinds are abating and the stock market remains cheap) and helpfully this is happening just as investors are questioning their overall exposure to the US. Given the size of the US stock market, there does not have to be much change in asset allocations to materially move the flow picture in other much smaller markets around the world. The performance of Germany's DAX (£1.8trn market cap) so far this year shows how quickly multiples can expand when flows start to move.

Whilst outflows from the UK have felt relentless over recent years, the pick-up in M&A and step-change in the rate of buybacks already outweighs the selling we have seen by investors. There are some early signs that outflows are abating and, if this trend continues, the multiple expansion could be rapid. Perhaps this is already happening? At the time of writing the rebound has continued into May, leaving the fund trading on 10.2x forward earnings versus 12.2x for the broader UK market, from which levels we see scope for returns from earnings growth, income and, finally, long-awaited multiple expansion.

Ed Legget and Ambrose Faulks

ARTEMIS FUNDS (LUX) – US EXTENDED ALPHA

INVESTMENT OBJECTIVE AND POLICY

To increase the value of Shareholders' investments primarily through capital growth.

The fund invests principally in equities and equity-related derivatives of companies that are listed, headquartered or that exercise the predominant part of their economic activities in the USA.

Shares in the following types of companies (held either directly or indirectly via derivatives) are automatically excluded:

- Tobacco: companies which derive more than 5% revenue from production, distribution or sale of tobacco
- Weapons: companies:
 - involved in the production of controversial weapons (including cluster munitions, landmines, biological and chemical weapons); or
 - which derive more than 10% revenue from conventional or nuclear weapons, related components and systems; or
 - which derive more than 10% revenue from manufacture or sale of civilian firearms or ammunition;
- Coal: companies which derive more than 10% revenue from mining or sale of thermal coal.
- Companies that the Investment Manager determines to be in breach of the United Nations Global Compact principles on human rights, labour rights, the environment and anti-corruption.

The fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. The Investment Manager seeks to decrease the fund's exposure to climate risk and benefit from the opportunities associated with the transition to a net-zero emissions economy through investing in companies which are actively managing their carbon exposure and setting meaningful targets. Further information is contained in a methodology statement available on the Artemis website at www.artemisfunds.com/methodology-statement.

The evaluation of environmental, social and governance factors is determined by the Investment Manager using information provided by the companies (for example company sustainability reports) and third-party data, focusing on scores and metrics which that the Investment Manager considers to be relevant.

The fund makes use of derivatives for investment purposes to take both long and short positions in individual companies. At times, the fund may also use equity index futures and/or options (long or short) in order to vary the level of volatility and/or market exposure in the fund.

Total derivatives (longs and shorts) are likely to represent a significant proportion of the fund's gross exposure to companies, which will typically lie in a range of 130-160% of Net Asset Value but which may potentially be as high as 200%. The Investment Manager uses derivatives to select stocks that may benefit from falling, as well as rising, share prices. However the fund's ability to have a gross exposure to companies of more than 100% of its Net Asset Value means that the fund has the potential both to generate greater returns and to experience greater losses than if the fund was restricted to a gross exposure of 100% of its Net Asset Value.

The fund's net exposure to companies will typically lie in the range of 85-110% (longs minus shorts) depending on market conditions.

At times the fund may invest in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect. Investments in China A-shares shall not exceed 10% of the fund's Net Asset Value.

The fund may also use derivatives and other techniques for hedging and for efficient portfolio management.

The fund's derivatives may include, but are not limited to, contracts for difference, futures, options, swaps and forward currency contracts.

A significant proportion of the Net Asset Value of the fund will be held in cash due to the level of derivative use.

Subject to the limits set out in the Investment Restrictions, the fund may also hold ancillary liquid assets for treasury purposes.

Subject to the limits set out in the Investment Restrictions, the fund may also invest in bank deposits, money market instruments and money market funds in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. In order to allow the fund to be able to manage counterparty risk, the fund may also invest its cash in government securities. These securities will generally be less than 1 year maturity.

The fund may invest up to 10% of its Net Asset Value in other collective investment schemes.

INVESTMENT REVIEW

Main changes to the fund

We made a number of significant changes over the period. Because of the volatile macroeconomic backdrop, we wanted to make the portfolio more defensive. We also wanted to take advantage of the price dislocations that emerged in the volatility.

In terms of sales, we reduced our holding in Nvidia, and sold out of Fidelity National, Linde and Elevance.

We used the proceeds from the sales to buy Coca Cola (a defensive company that increases the stability of the fund), S&P Global, Abbvie and Lam Research.

At a sector level, we remain most overweight financials and utilities, and most underweight technology because of our underweight position in Apple.

Explaining the fund's performance

The fund underperformed the index returning -9.0% vs the S&P 500's total return of -1.7%¹.

In terms of sectors, the main detractor was our exposure in technology, followed by healthcare and industrials. Looking more closely at our technology exposure, software allocation was the main source of pain. On the positive side, insurance and household durables proved protective.

At a stock level, PG&E, Saia, Fidelity National and TransUnion were our main detractors. PG&E, a utility, was caught up in volatility caused by the Los Angeles wildfires. On the positive side, Progressive (insurance), NiSource (utility), PPL (utility) and Mastercard (payments) performed well.

The wider context

This was one of the most volatile periods since COVID or possibly the global financial crisis. Policy actions by President Trump, in particular sweeping tariffs, forced the markets to reassess the robust health of the US economy. Treasury yields reached uncomfortable levels, forcing Trump to pause the 'reciprocal' tariffs that were announced on 'Liberation Day' towards the end of the period. While 'soft' economic data (such as sentiment and surveys) deteriorated rapidly, 'hard' data remained robust, pointing towards an economy that remains in fine shape.

Looking ahead

The overall profile of the fund is relatively unchanged. At the end of the period, it had a net exposure of 95%. Given the inherent unpredictability of the current administration, we are focusing the long book on areas of conviction which are not dependent on one outcome or another in terms of trade. We continue to concentrate the majority of the portfolio on discounted compounders which are economically resilient.

On the cyclical side, where we do have exposure, it is to stocks with particularly attractive valuations or with the opportunity to 'self help'. On the short side we continue to find plenty of opportunities. In these environments, companies with weaker market positions come under more pressure. After the market's strong recovery, the onus of proof now shifts to the administration enacting some policy/trade deals rather than just talking about them.

Separately to trade, the Republicans are trying to make progress on tax cuts through the Reconciliation Bill. One challenge we expect to continue is the bond market clearly forced Trump to scale back on tariffs, so it seems unlikely he will get a free pass on a tax bill that further increases the budget deficit, as well as the likely pushback from fiscal conservatives in the Republican party.

ARTEMIS FUNDS (LUX) – US SELECT

INVESTMENT OBJECTIVE AND POLICY

To increase the value of Shareholders' investments primarily through capital growth.

The fund invests principally in equities of companies that are listed, headquartered or that exercise the predominant part of their economic activities in the USA.

Shares in the following types of companies (held either directly or indirectly via derivatives) are automatically excluded:

- Tobacco: companies which derive more than 5% revenue from tobacco production;
- Weapons: companies:
 - involved in the production of controversial weapons (including cluster munitions, landmines, biological and chemical weapons); or
 - which derive more than 10% revenue from conventional or nuclear weapons, related components and systems; or
 - which derive more than 10% revenue from manufacture or sale of civilian firearms or ammunition;
- Coal: companies which derive more than 5% revenue from mining or sale of thermal coal;
- Companies that the Investment Manager determines to be in breach of the United Nations Global Compact principles on human rights, labour rights, the environment and anticorruption.

The fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. The Investment Manager seeks to decrease the fund's exposure to climate risk and benefit from the opportunities associated with the transition to a net-zero emissions economy through investing in companies which are actively managing their carbon exposure and setting meaningful targets. Further information is contained in a methodology statement available on the Artemis website at www.artemisfunds.com/methodology-statement.

The evaluation of environmental, social and governance factors is determined by the Investment Manager using information provided by the companies (for example company sustainability reports) and third-party data, focusing on scores and metrics which that the Investment Manager considers to be relevant.

More information about the environmental or social characteristics for this fund is available in the pre-contractual disclosure for financial products referred to in Article 8 under SFDR which follow the fund's details and which form an integral part of the Prospectus.

It is expected that the portfolio of the fund will be invested in the equities of between 35 and 65 companies.

The fund may use derivatives and other techniques for hedging and for efficient portfolio management. The fund's derivatives may include, but are not limited to, futures and forward currency contracts.

Subject to the limits set out in the Investments Restrictions, the fund may also hold ancillary liquid assets for treasury purposes.

Subject to the limits set out in the Investment Restrictions, the fund may also invest in bank deposits, money market instruments and money market funds in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions.

INVESTMENT REVIEW

Main changes to the fund

We made a number of significant changes over the period. Because of the volatile macroeconomic backdrop, we wanted to make the portfolio more defensive. We also wanted to take advantage of the price dislocations that emerged in the volatility.

Our largest transaction over the period was in Coca-Cola, followed by Thermo Fisher, Mastercard, and NiSource. These purchases were made to increase the stability and quality of the portfolio. We also took the opportunity to add to stocks that we thought had been unduly punished in the market weakness.

These purchases were funded by reducing our holdings in Nvidia, Goldman Sachs and Amazon, and selling Vistra and Linde. Our exposure to 'the Magnificent 7' has decreased markedly since the beginning of the review period. This is primarily driven by the view that as the hyperscalers (Amazon, Google, Meta, Microsoft) undertake a huge increase in capital expenditure to build out AI infrastructure, returns will become more muted.

Explaining the fund's performance

The fund underperformed, returning -10.6%¹ (in US dollar terms) vs the S&P 500's net return of -1.9%.

The underperformance was largely concentrated in cyclical areas, as well as those that had performed well during 2024.

From a sector standpoint, it was our exposure to healthcare, industrials, and our underweight to technology that detracted most.

Past performance is not a guide to the future.

¹ Source: Artemis/Lipper Limited, class I USD Acc to 30 April 2025. All figures show total returns with dividends and/or income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if you invest in a different currency class.

ARTEMIS FUNDS (LUX) – US SELECT

In terms of stocks, industrial companies Saia, Builders FirstSource, and Herc detracted. The first two were punished because of fears of a slowdown in industrial activity and housing demand respectively. Herc made an ill-judged acquisition of a more indebted business. We sold out of the position over the period. Avantor and Nvidia also held back performance. We believe that while Nvidia's recent earnings have been in line with consensus estimates, as we move into 2026 the company is likely to exceed expectations.

In terms of contributors, Walmart, Allstate, Vistra, and Goldman Sachs were positive. We increased positions in Walmart and Allstate given their defensive characteristics.

The wider context

The period ushered in a new president who at first glance was believed to be positive for markets (as Donald Trump had been in his first term). What emerged was a president intent on re-writing the international trade rule book that had existed since the finish of WW2. Close allies as well as adversaries received punitive tariff rates, although Trump was somewhat checked by the weakness in the bond market after 'Liberation Day', resulting in a pause to the reciprocal tariffs for 90 days to allow for negotiations to take place.

Volatile policy impacted 'soft' economic data such as sentiment and surveys. Hard data however proved remarkably resilient, pointing towards an economy that was stubbornly continuing to be in rude health.

Looking ahead

While we are clearly in a point of heightened uncertainty in US markets, it seems we are beyond the point of maximum uncertainty which was 'Liberation Day'. Since then, it seems there is a 'Trump put' in place that was evident in his first term: that is, that if markets fall in response to his policy, he will reverse it. Trade deals are expected to be announced soon and plans for deregulation and tax cuts are part of the agenda. Despite animosity towards China, there is a recognition by both parties that the tariff rates in place at present are unsustainable. Some degree of resolution will be a priority here.

So, whilst still a murky environment, we believe our portfolio is well positioned to weather a more volatile period, capitalise on dislocations that seem unwarranted, and with the flexibility to increase position sizes in holdings that we fundamentally believe in at the appropriate time.

Cormac Weldon and Chris Kent

ARTEMIS FUNDS (LUX) – US SMALLER COMPANIES

INVESTMENT OBJECTIVE AND POLICY

To increase the value of shareholders' investments primarily through capital growth.

The fund invests principally in equities of smaller companies that are listed on a recognised stock exchange in the USA. Typically these are companies with a market capitalisation of less than \$10bn at the time of purchase.

At times the fund may invest in equities of companies of equivalent size that are headquartered or exercise the predominant part of their economic activity in the USA, but which are listed on a regulated stock exchange outside the USA.

Shares in the following types of companies (held either directly or indirectly via derivatives) are automatically excluded:

- Tobacco: companies which derive more than 5% revenue from tobacco production;
- Weapons: companies:
 - involved in the production of controversial weapons (including cluster munitions, landmines, biological and chemical weapons); or
 - which derive more than 10% revenue from conventional or nuclear weapons, related components and systems; or
 - which derive more than 10% revenue from manufacture or sale of civilian firearms or ammunition;
- Coal: companies which derive more than 5% revenue from mining or sale of thermal coal;
- Companies that the Investment Manager determines to be in breach of the United Nations Global Compact principles on human rights, labour rights, the environment and anticorruption.

The fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. The Investment Manager seeks to decrease the fund's exposure to climate risk and benefit from the opportunities associated with the transition to a net-zero emissions economy through investing in companies which are actively managing their carbon exposure and setting meaningful targets. Further information is contained in a methodology statement available on the Artemis website at www.artemisfunds.com/methodology-statement.

The evaluation of environmental, social and governance factors is determined by the Investment Manager using information provided by the companies (for example company sustainability reports) and third-party data, focusing on scores and metrics which that the Investment Manager considers to be relevant.

More information about the environmental or social characteristics for this fund is available in the pre-contractual disclosure for financial products referred to in Article 8 under SFDR which follow the fund's details and which form an integral part of the Prospectus.

The fund may use derivatives and other techniques for hedging and for efficient portfolio management. The fund's derivatives may include, but are not limited to, futures and forward currency contracts.

Subject to the limits set out in the Investment Restrictions, the fund may also hold ancillary liquid assets for treasury purposes.

Subject to the limits set out in the Investment Restrictions, the fund may also invest in bank deposits, money market instruments and money market funds in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions.

The fund may invest up to 10% of its Net Asset Value in other collective investment schemes.

INVESTMENT REVIEW

Main changes to the fund

Given significant events over the period, we made a number of changes to increase the defensive profile of the portfolio to combat a more uncertain macroeconomic and political environment. In addition, we also took advantage of weaker share prices where we had conviction in our analysis.

On the sales side, our largest transactions were in Vistra, Clean Harbors, Transunion and Saia. Both Vistra and Clean Harbors had been strong performers, and with the risk reward profile becoming more balanced, we took profits. For Transunion and Saia, we chose to reduce these positions to bring down the cyclicity of the portfolio.

We used the proceeds from these sales to buy Planet Fitness, Crane, First Industrial Realty and Construction Partners.

In terms of positioning, we continue to have a balanced exposure to the market, through a combination of Growth, Value, Recovery, and Cyclical names. That being said, the fund's aggregate holdings have a significantly higher return on equity than the market, an outcome of our preference for higher-quality companies with proven business models.

ARTEMIS FUNDS (LUX) – US SMALLER COMPANIES

Explaining the fund's performance

The fund marginally underperformed the index, returning -10.7% vs the Russel 2000's 10.2%¹.

At a sector level, our technology and consumer discretionary holdings were the two main detractors. These were largely offset by our lack of exposure to the energy sector, and underweight within healthcare.

Rotating into defensive areas of the market did help, with Palomar (insurance) our top contributor. Axon, Bellring Brands, Natera, and Affirm Holdings were also positive. On the negative side, Herc, Saia and Churchill Downs held back returns.

The wider context

A pivotal event during this period was President Trump's announcement on 2 April 2025, of sweeping tariffs, including a 10% baseline on most imports and higher rates on specific countries, such as 145% on China. This move, dubbed 'Liberation Day', initially rattled markets, leading to sharp declines across major indices. However, markets stabilised as investors anticipated potential delays or reversals in tariff implementation, a pattern previously observed with the administration's trade policies. Despite this, the tariffs introduced uncertainty, with concerns about their long-term impact on inflation, corporate earnings and global supply chains. While the market showed resilience, the evolving trade landscape remains a critical factor influencing investor sentiment and economic projections.

Looking ahead

While we are clearly at a point of heightened uncertainty in US markets, it seems we are beyond the point of maximum uncertainty which was 'Liberation Day'. A 'Trump put' (where a negative reaction from markets causes him to reverse policy) seems to be on the table like it was in his first term. Trade deals are expected to be announced soon, and plans for deregulation and tax cuts are part of their agenda. Despite animosity towards China, there is a recognition by both parties that the tariff rates in place at present are unsustainable. Some degree of resolution will be a priority here. So, while still a murky environment, we believe our portfolio is well positioned to weather a more volatile period, capitalise on dislocations that seem unwarranted, and has the flexibility to increase positions in stocks that we fundamentally believe in at the appropriate time.

Cormac Weldon and Olivia Micklem
Fund managers

Past performance is not a guide to the future.

¹ Source: Artemis/Lipper Limited, class I USD Acc to 30 April 2025. All figures show total returns with dividends and/or income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if you invest in a different currency class.

NOTES TO THE FINANCIAL STATEMENTS

1. General information

Artemis Funds (Lux) ("the Company") is an open-ended investment company organised as a *société anonyme* under the laws of the Grand Duchy of Luxembourg and qualifies as a *Société d'Investissement à Capital Variable* ("SICAV"). The Company qualifies as an Undertakings for Collective Investment in Transferable Securities ("UCITS") for the purposes of the UCITS Directive and the Company is registered pursuant to Part I of the Law of 17 December 2010 on UCITS, as amended and is subject to the supervision of the *Commission de Surveillance du Secteur Financier* ("CSSF"). The Company operates separate sub-funds ("funds"), each of which is represented by one or more share classes. The funds are distinguished by their specific investment policy or any other specific features.

The Company may issue multiple classes of shares in several funds. A separate pool of assets and liabilities is maintained for each fund and is invested in accordance with the investment objective applicable to the relevant fund. All liabilities attributable to a particular fund are binding solely upon that fund.

As at 30 April 2025, the Company was comprised of the following funds with the following classes in issue:

2. Summary of significant accounting policies

The following is a summary of the significant accounting policies followed by the funds:

a) Basis of preparation

The financial statements have been prepared in conformity with Luxembourg generally accepted accounting principles applicable to UCITS.

b) Financial statements

Financial statements are presented for each fund in the base currency of the fund. The combined Statement of Net Assets and combined Statement of Operations and Changes in Net Assets of the Company are presented in Euros (EUR or €), based on the exchange rate ruling at the date of these financial statements. The base currency for each fund is as follows:

Artemis Funds (Lux) – Global Focus is denominated in US Dollars (USD)

Artemis Funds (Lux) – Global High Yield Bond is denominated in USD

Artemis Funds (Lux) – Leading Consumer Brands is denominated in USD

Artemis Funds (Lux) – Short-Dated Global High Yield Bond is denominated in USD

Artemis Funds (Lux) – SmartGARP Global Emerging Markets Equity is denominated in USD

Artemis Funds (Lux) – UK Select is denominated in Pound Sterling (GBP)

Artemis Funds (Lux) – US Extended Alpha is denominated in USD

Artemis Funds (Lux) – US Select is denominated in USD

Artemis Funds (Lux) – US Smaller Companies is denominated in USD

c) Currency translation

Assets and liabilities denominated in currencies other than a fund's base currency are translated into that base currency at exchange rates ruling at the date of these financial statements. Transactions occurring during the period in currencies other than the base currency are translated at rates of exchange ruling on the transaction dates. Differences arising on translation are included in the Statement of Operations and Changes in Net Assets.

d) Valuation of investments

The value of securities and any financial assets listed on any official stock exchange or on a regulated market are generally valued at their latest available price in the relevant market at the time of closure of the market, or any other price deemed appropriate by the Directors.

If a security is not listed on any official stock exchange or any other regulated market, or in the case of securities so traded or admitted the last available price of which does not reflect their fair value, the Directors are required to proceed on the basis of their estimated fair value, which shall be determined with prudence and in good faith.

The last valuation day of the current period 30 April 2025 and the investments have been valued based on the relevant market or traded price attributable to that valuation day. As a result of time variations in certain markets the prices applied to certain investments do not necessarily reflect the closing market prices for the same calendar day as at the relevant valuation day.

e) Net realised gains and losses on sale of investments

The computation of net realised gains and losses on sales of investments is made on the basis of average cost and is included in the Statement of Operations and Changes in Net Assets.

f) Contracts for difference

Contracts for difference are valued using the local daily price of the underlying listed equity then converted into the currency of the relevant fund.

The unrealised gain/(loss) on contracts for difference is included in the Statement of Net Assets as 'Contracts for difference at fair value'.

Contracts for difference are reset at month end after the Valuation Point. Upon reset or the closing of the contract, the gain or loss is recorded in the Statement of Operations and Changes in Net Assets as 'Net realised gain/(loss) on contracts for difference'.

Dividends on contracts for difference are included in the Statement of Net Assets as 'Dividends receivable on contracts for difference' for long positions and as 'Dividends payable on contracts for difference' for short positions.

Interest calculated on contracts for difference is included in the Statement of Net Assets as 'Interest receivable on contracts for difference' for short positions and as 'Interest payable on contracts for difference' for long positions.

NOTES TO THE FINANCIAL STATEMENTS

2. Summary of significant accounting policies (continued)

g) Credit default swaps

A credit default swap allows the transfer of default risk. This allows a fund to effectively buy insurance on a reference obligation it holds (hedging the investment), or buy protection on a reference obligation it does not physically own in the expectation that the credit will decline in quality. Contracts are valued using external independent third party supplied prices. When a contract is closed, the realised gains or losses are recorded under 'Net realised gain/(loss) on swaps contracts in the Statement of Operations and Changes in Net Assets.

h) Forward currency exchange contracts

The Company may enter into forward currency exchange contracts to hedge against exposures to currency fluctuations. Forward currency exchange contracts are valued using an independent pricing source. The carrying value of these contracts is the gain or loss that would be realised if the position was closed out on the valuation date, and is included in the Statement of Net Assets as 'Unrealised gain/(loss) on forward currency exchange contracts'.

Upon the closing of the contract, the gain or loss is recorded in the Statement of Operations and Changes in Net Assets as 'Net realised gain/(loss) on forward currency exchange contracts'.

i) Exchange traded futures contracts on securities and indices

Exchange traded futures contracts are valued at the exchange quoted settlement price.

Initial margin deposits are made upon entering into the contracts and are in cash. During the period the contracts are open, changes in the value of the contracts are recognised as unrealised gains and losses by 'marking-to-market' on a daily basis to reflect the market value of the contracts at the end of each business day's trading. The unrealised gain/(loss) on financial futures contracts is included in the Statement of Net Assets as 'Unrealised gain/(loss) on financial futures contracts'.

Variation margin payments are made or received, depending upon whether losses or gains are incurred. When a contract is closed, the Company records a realised gain or loss equal to the difference between the proceeds from, or cost of, the closing transaction and the initial cost of the contract.

j) Options

Options are contractual agreements that convey the right, but not the obligation, for the purchaser either to buy or sell a specific amount of a financial instrument at a fixed price, either at a fixed future date or at any time before maturity. Options contracts are valued at the exchange quoted settlement price.

The Company may purchase and sell put and call options through regulated exchanges. Options purchased by the Company provide the Company with the opportunity to purchase (call options) or sell (put options) the underlying asset at an agreed-upon value either on or before the expiration of the option.

The Company is exposed to credit risk on purchased options only to the extent of their fair value.

k) Income

Dividends are recognised as income on the dates that securities are first quoted as "ex-dividend" to the extent information thereon is reasonably available to the fund. Interest is accrued on a daily basis. Dividend and interest income are disclosed net of irrecoverable withholding tax where applicable.

Bonds may be purchased at a discount or at a premium. Such discount or premium is amortised over the life of the bond.

Amortisation is recorded as part of interest income included in 'Interest income from investments, net of withholding taxes' in the Statement of Operations and Changes in Net Assets.

l) Expenses

All expenses (other than those relating to the purchase and sale of investments) are charged on an accrual basis.

m) Dividend distributions payable

Dividend distributions payable by the Company are recorded on the ex-date. Refer to Note 11 for details of dividends declared during the six months ended 30 April 2025.

n) Net asset value per share

The net asset value per share is calculated by dividing the net assets of the relevant class of shares in a fund included in the Statement of Net Assets by the number of shares of the relevant class in that fund in issue at the period end.

2. Summary of significant accounting policies (continued)

o) Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in Luxembourg requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

p) Exchange rates

The exchange rates used for the financial statements as at 30 April 2025 are as follows:

EUR per CHF: 0.9350

EUR per GBP: 0.8534

EUR per USD: 1.1369

3. Management and performance fees

The Management Company appointed Artemis Investment Management LLP as Investment Manager to provide certain administrative and management services. The Company pays a fee from the assets of each fund (the "Fund management fee").

The Fund management fee is calculated and accrued per fund on a daily basis at each valuation point and paid on a monthly basis in arrears to the Investment Manager. The fee rates per annum charged and applicable to each class of shares during the six months ended 30 April 2025 are as follows:

The Fund management fee is a fixed percentage of the net asset value of each share class as set out in the Prospectus, less a discount, which is calculated and applied as described below.

It includes (but is not limited to) the following:

- Remuneration of the services of the Directors (including insurance coverage and out of pocket expenses);
- Fees and expenses of the Management Company;
- Fees and expenses of the Investment Manager, inclusive of the costs of investment research provided by third party brokers and research firms;
- Fees and expenses of the Global Distributor;
- Fees and expenses of the Administration Agent, Registrar, Transfer Agent, Domiciliary Agent and Company Secretary;
- Fees and expenses of the independent auditor;
- Fees and expenses of the Depositary, including custody fees and custody related transaction costs;
- Shareholder registration fees and charges, including those related to anti-money laundering checks and controls and any activities carried out pursuant to Foreign Account Tax Compliance Act ("FATCA") and/or Common Reporting Standard ("CRS");
- Fees and expenses incurred in registering and maintaining the registration of the Company with any governmental agencies, regulatory or tax authority, whether in Luxembourg or any other country;
- Dividend / income distribution fees and charges;
- Costs incurred in connection with any listing of the shares on a stock exchange;
- Set up costs incurred in connection with the launch of the Company, a new fund or any new share class;
- Fees and expenses of any paying agent, authorised representative or other agents performing a similar function;
- Costs incurred in preparing, translating, producing, distributing and modifying the Articles, the Prospectus, the Key Investor Information Documents, financial statements, long form reports, shareholder statements, contract notes or any other documentation required under the Law or by a regulatory authority in any country or territory outside Luxembourg in which Shares are or may lawfully be marketed;
- Costs incurred in convening any general meeting of shareholders;
- Costs incurred in publishing the price of shares and any other fund information in any form of media;
- Fees and expenses of legal, tax and other professional advisers;
- Fees relating to the management and processing of collateral;
- Any VAT or other sales tax included on any of the fees and charges listed above.

NOTES TO THE FINANCIAL STATEMENTS

3. Management and performance fees (continued)

In order to pass on economies of scales achieved by those funds reaching certain levels of assets, a discount will be applied to the Base Fund Management Fee depending on the total Net Asset Value of the relevant Fund (the "Discount"), see the Prospectus for further details.

Artemis Funds (Lux) – US Extended Alpha - performance fees

The Investment Manager is entitled to a performance fee ("Performance fee") on each share classes of the fund if certain conditions are met. The Performance fee on each share class is calculated as 20% of any outperformance of the net asset value per share of the relevant class (with income reinvested) against the S&P 500 Index (with income reinvested). Further details are available in the Prospectus.

The performance fee is disclosed in the Statement of Operations and Changes in Net Assets on pages 10 to 13.

4. Remuneration of the services of the Directors

The Chairman and Independent Director Henry Kelly receives fees of €40,000 (including taxes) per annum.

View Ocean Ltd. of which Independent Director Hanna Duer is a director receives service fees of €30,000 per annum.

Jérôme Wigny is a partner of the Luxembourg law firm of Elvinger Hoss Prussen, *société anonyme*, which provides legal services to the Company and he receives no additional fee as a Director.

Sheenagh Dougall and Stewart Brown are employed by the Investment Manager and have waived their fees.

In addition, all Directors are entitled to reimbursement by the Company of any expenses directly incurred in the execution of their duties as Directors.

No Director holds any shares in the Company nor has any interest in any transaction which, during the period under review, has been affected by the Company and is unusual in its nature or conditions, or is significant to the business of the Company.

Remuneration of the services of the Directors, insurance coverage and reasonable expenses directly incurred in the execution of their duties as Directors are included under the Fund management fee. Refer to Note 3 for further details.

5. Taxe d'abonnement and other operational taxes

Under current law and practice, neither the Company nor any of its funds is subject to corporate income tax in Luxembourg. The only tax to which the Company in Luxembourg is subject is the subscription tax, ("taxe d'abonnement") up to a rate of 0.05% per annum based on the net asset value attributed to each share class at the end of the relevant quarter, calculated and paid quarterly. A reduced tax rate of 0.01% per annum of the net assets will be applicable to share classes offered to institutional investors. Pursuant to Article 175(a) of the Law of 17 December 2010 on UCITS, as amended, the 0.01% and 0.05% rates described above, as appropriate, are not applicable for the portion of the assets of the Company invested in other Luxembourg collective investment undertakings which are already subject to the taxe d'abonnement.

No stamp duty or other tax is generally payable in Luxembourg on the issue of shares for cash by the Company.

Dividends and interest income received by the Company may be subject to non-recoverable withholding taxes in the countries of origin.

6. Capital gains tax

Capital transactions may be subject to capital gains and other taxes in different countries where the fund invests. In particular, the fund may be subject to tax liability on Indian securities held by Leading Consumer Brands and SmartGARP Global Emerging Markets Equity.

7. Transactions with related parties

All transactions with related parties were carried out on an arm's length basis. The Investment Manager and its affiliates, the Directors, Management Company and other related agents of the Company are considered related parties.

8. Swing pricing

The funds are single priced and may suffer a reduction in value as a result of the transaction costs incurred in the purchase and sale of their underlying investments and the spread between the buying and selling prices of such investments caused by subscriptions, redemptions and/or switches in and out of the fund. This is known as “dilution”. In order to counter this and to protect shareholders’ interests, the Company will apply “swing pricing” as part of its daily valuation policy. This will mean that in certain circumstances the Company will make adjustments in the calculations of the net asset values per share, to counter the impact of dealing and other costs on occasions when these are deemed to be significant.

In the usual course of business the application of a dilution adjustment will be applied systematically and on a consistent basis.

The need to make a dilution adjustment will depend upon the net value of subscriptions, switches and redemptions received by a fund for each dealing day. The Company therefore reserves the right to make a dilution adjustment where a fund experiences a net cash movement which exceeds a threshold set by the Directors from time to time of the previous dealing day's total net asset value.

Because the dilution adjustment for each fund will be calculated by reference to the costs of dealing in the underlying investments of that fund, including both the estimated fiscal charges and dealing costs that may be incurred by the fund and the estimated bid/offer spreads of the assets in which the fund invests, which can vary with market conditions, this means that the amount of the dilution adjustment can vary over time but will not exceed 2% of the relevant net asset value. However, under unusual or exceptional market conditions (such as high market volatility, disruption of markets or slowdown of the economy caused by terrorist attack or war [or other hostilities], serious pandemic, or a natural disaster [such as a hurricane or a super typhoon]), the Board of Directors may decide, on a temporary basis, to adjust the net asset value of a fund beyond 2% when such decision is justified by the best interest of the shareholders. Such decision will be published on the following website www.artemisfunds.com.

If the net capital activity on a given valuation day leads to a net inflow (outflow) of assets in the relevant fund, the net asset value used to process all subscriptions, redemptions or switches in such a fund is adjusted upwards (downwards) by a swing factor that shall be determined from time to time by the Investment Manager, as delegated by the Board of Directors.

The dilution adjustment is recorded as the Net realised gain/(loss) on sale of investments in the Statement of Operations and Changes in Net Assets.

As at 30 April 2025, the Company's last valuation day of the period, no swing pricing was applied on the net asset value per share of the funds.

In the six months ended 30 April 2025, swing pricing adjustments were applied to the funds as per the number of instances detailed in the table below:

Fund	Swing price adjustments
Artemis Funds (Lux) – Global Focus	13
Artemis Funds (Lux) – Global High Yield Bond	–
Artemis Funds (Lux) – Leading Consumer Brands	2
Artemis Funds (Lux) – Short-Dated Global High Yield Bond	20
Artemis Funds (Lux) – SmartGARP Global Emerging Markets Equity	5
Artemis Funds (Lux) – UK Select	7
Artemis Funds (Lux) – US Extended Alpha	–
Artemis Funds (Lux) – US Select	17
Artemis Funds (Lux) – US Smaller Companies	13

9. Statement of changes in the portfolio

A listing of the statement of changes in the portfolio during the period is available upon request to any shareholder at the registered office of the Company and at the foreign representatives’ office free of charge.

NOTES TO THE FINANCIAL STATEMENTS

10. Transaction costs

For the six months ended 30 April 2025 the funds incurred transaction costs related to purchase or sale of transferable securities as follows:

Fund	Fund currency	Total transaction costs
Artemis Funds (Lux) – Global Focus	USD	8,607
Artemis Funds (Lux) – Global High Yield Bond	USD	–
Artemis Funds (Lux) – Leading Consumer Brands	USD	4,899
Artemis Funds (Lux) – Short-Dated Global High Yield Bond	USD	–
Artemis Funds (Lux) – SmartGARP Global Emerging Markets Equity	USD	164,802
Artemis Funds (Lux) – UK Select	GBP	135,285
Artemis Funds (Lux) – US Extended Alpha	USD	203,740
Artemis Funds (Lux) – US Select	USD	38,064
Artemis Funds (Lux) – US Smaller Companies	USD	120,419

The above transaction costs include brokers' fees, depositary's transaction specific fees, or security transaction taxes, where applicable. These costs are directly linked to the acquisition or sale of investments, to the extent that such costs are shown separately on transaction confirmations.

The transaction costs are included in the Statement of Net Assets as 'Investments in securities at cost' and in the Statement of Operations and Changes in Net Assets in 'Net Change in unrealised appreciation/(depreciation) on Investments for the purchase of securities. For the sale of securities, they are netted from the 'Due to brokers' amount and from the 'Net realised gain/(loss) on sale of investments' in the Statement of Operations and Changes in Net Assets.

11. Dividend distributions

The Company paid dividends as follows during the six months ended 30 April 2025:

Fund	Class currency	Ex date	Pay date	Dividend distribution per share in class currency
Artemis Funds (Lux) – Global High Yield Bond				
FIH GBP Inc	GBP	4 November 2024	31 December 2024	0.0178

I GBP Inc	GBP	4 November 2024	31 December 2024	0.0095
I USD Inc	USD	4 November 2024	31 December 2024	0.0068

11. Dividend distributions (continued)

Fund	Class currency	Ex date	Pay date	Dividend distribution per share in class currency
Artemis Funds (Lux) – US Smaller Companies				
FI GBP Inc	GBP	4 November 2024	31 December 2024	0.0076
FI USD Inc	USD	4 November 2024	31 December 2024	0.0072

12. Collateral

As at 30 April 2025, the collateral received or paid which is composed of cash collateral granted to or received from brokers and counterparties for the purpose of transactions in forward currency exchange contracts and contracts for difference is as follows:

Fund	Counterparty	Type of collateral	Currency	Collateral received	Collateral paid
Artemis Funds (Lux) – Global High Yield Bond	Northern Trust	Cash	USD	110,000	–
Artemis Funds (Lux) – Short-Dated Global High Yield Bond	Northern Trust	Cash	USD	5,020,000	–
Artemis Funds (Lux) – US Extended Alpha	Goldman Sachs	Cash	USD	–	450,000
Artemis Funds (Lux) – US Extended Alpha	J.P. Morgan	Cash	USD	210,000	–
Artemis Funds (Lux) – US Extended Alpha	Morgan Stanley	Cash	USD	1,550,000	–
Artemis Funds (Lux) – US Extended Alpha	Northern Trust	Cash	USD	2,920,000	–
Artemis Funds (Lux) – US Select	Northern Trust	Cash	USD	350,000	–

13. Soft commissions

No soft commission was received or paid by the Investment Manager during the period. All transactions carried out on behalf of the funds were conducted on an arm's length basis and were executed on the best terms available.

14. Significant events during the period

With effect from 1 January 2025, the address of the registered office of the Management Company, FundRock Management Company S.A., has changed from H20 Building 33, rue de Gasperich, L-5826 Hesperange, Grand Duchy of Luxembourg to Airport Center Building 5, Heienhaff, L-1736 Senningerberg, Grand Duchy of Luxembourg.

15. Subsequent events

The company paid dividends as follows following the period ended 30 April 2025:

Fund	Class currency	Ex date	Pay date	Dividend distribution per share in class currency
Artemis Funds (Lux) – Global High Yield Bond				
FIH GBP Inc	GBP	2 May 2025	30 June 2025	0.0170

IH GBP Inc	GBP	2 May 2025	30 June 2025	0.0159

APPENDIX 1 – SECURITIES FINANCING TRANSACTION REGULATION

As at 30 April 2025, the following funds may enter into contracts for difference ("CFD") presenting the same characteristics as total return swaps within the meaning of Regulation (EU/2015/2365) on transparency of securities financing transactions and of reuse (the "SFT Regulation"):

- Artemis Funds (Lux) – Global Focus
- Artemis Funds (Lux) – Leading Consumer Brands
- Artemis Funds (Lux) – SmartGARP Global Emerging Markets Equity
- Artemis Funds (Lux) – UK Select
- Artemis Funds (Lux) – US Extended Alpha

The following information is presented with regard to Regulation (EU/2015/2365) on transparency of security financing transactions ("SFT") and of reuse:

Global Data

Amounts of assets engaged in SFT as at 30 April 2025:

Fund	SFT Type	Currency	Absolute Amount	% of Net Assets
Artemis Funds (Lux) – UK Select	Contracts for difference	GBP	2,249	–
Artemis Funds (Lux) – US Extended Alpha	Contracts for difference	USD	307,867	0.08

Concentration Data

Fund	Counterparty	Country of incorporation	Currency	Market Value	% of Net Assets
Artemis Funds (Lux) – UK Select					
	UBS	Switzerland	GBP	(2,249)	–
Artemis Funds (Lux) – US Extended Alpha					
	Goldman Sachs	United States of America	USD	(157,373)	(0.04)
	J.P. Morgan	United States of America	USD	86,146	–
	Morgan Stanley	United States of America	USD	376,094	0.12

Aggregate Transaction Data

Fund	Currency	Maturity						Open maturity
		<1 day	1 day – 1 week	1 week – 1 month	1–3 months	3 months – 1 year	>1 year	
Artemis Funds (Lux) – UK Select								
Contracts for difference	GBP	–	–	–	–	–	(2,249)	–
Artemis Funds (Lux) – US Extended Alpha								
Contracts for difference	USD	–	–	–	–	–	307,867	–

Reuse of Collateral

There is no collateral received by the funds in relation to contracts for difference.

Safekeeping

There is no collateral received by the funds in relation to contracts for difference.

Return and Cost Analysis

Returns and costs for contracts for difference are received/borne by Artemis Funds (Lux) – UK Select and Artemis Funds (Lux) – US Extended Alpha. The monetary amounts are disclosed in the Statement of Operations and Changes in Net Assets as 'Net realised gain/(loss) on Contracts for difference' and 'Net change in unrealised appreciation/(depreciation) on Contracts for difference'.

APPENDIX 2 – INFORMATION FOR SWISS INVESTORS

Total expense ratios

The total expense ratios below have been calculated as at 30 April 2025 in accordance with the guidelines issued by the Asset Management Association Switzerland and are provided for each share class within the funds. The total expense ratio shows the current operating expenses (or Fund management fee) of each share class as a percentage of the net assets of that class and are annualised.

Fund	Launch date	Operating expenses (%)	Performance fees (%)	Total expense ratio (%)
Artemis Funds (Lux) – Global Focus
