

Manulife Asian Bond Absolute Return Fund

30 June 2021

Class W GBP (Hedged) Acc

THE FUND

This fund exploits fixed income market inefficiencies across Asia with the flexibility to implement long/short trade ideas in rates, credit and currencies.

We believe Asian bonds offer an attractive opportunity set to generate absolute returns given their breadth of uncorrelated returns and investor misperceptions of risk.

This fund offers diversification away from the peer group of global macro multi-asset funds in the absolute return sector.

Potential Benefits

- Positive return on a rolling twelve month basis¹
- Mitigation of drawdown risk and volatility
- Low correlation to other asset classes

Risks

All investments involve risk, including the possible loss of principal. There is no guarantee investment objectives will be met. Past performance is not indicative of future results.

The fund will invest in derivatives which involves risk greater than the risks associated with investing directly in securities and other traditional investments. In a down market these instruments could become harder to value and sell at a fair price. Derivatives transactions, including futures and options, are complex and carry a high degree of risk.

There is a risk of a loss when trading futures and options. They are intended for sophisticated investors and are not suitable for everyone.

The use of leverage magnifies both the favourable and unfavourable effects of price movements in the investments made by a fund. To the extent that a fund is leveraged in its investment operations, a fund will be subject to substantial risk of loss.

Portfolio characteristics including holdings, sector weightings and market capitalization are subject to change at any time. Current and future holdings are subject to risk. Ongoing market volatility can dramatically impact short term returns. All material is compiled from sources believed to be reliable and correct, but accuracy cannot be guaranteed.
