Fund objective

The Fund aims to achieve long term growth on your investment by investing at least 80% of its assets in the equities and investments similar to equities of companies worldwide. The Fund may invest up to 20% of its assets in emerging markets (developing countries). The Fund is actively managed with reference to the MSCI ACWI (USD) - Net Returns (the "Index") which it seeks to outperform by 2% over the medium to long term. Russell Investments/ Money Managers have full discretion to select investments for the Fund. This product is an Article 8 product, as defined under EU regulation - it promotes environmental or social characteristics and invests in companies that follow good governance practices. This product does not have sustainable investment as its objective.

Fund update

The Fund ended the month behind the benchmark. The Fund's value exposure and small cap tilt were unhelpful in the market environment. In sectors, stock selection within health care was unrewarded including holdings in Roche and Nippon Shinyaku, although an overweight to Cigna Group partly offset the negative impact. Stock selection within industrials (JGC Holdings, MISUMI Group, Nagoya Railroad) and consumer discretionary (underweight Amazon, Toyota) was also ineffective. In financials overweight exposure to BNP Paribas, ING and Moody's detracted from returns. In contrast, an overweight to Meta in communication services contributed positively. In information technology, an underweight to Apple and an overweight to TSMC and ARM Holdings was rewarded. However, this was offset by the negative impact of an underweight to Nvidia.
