Fund objective

The Fund aims to achieve long term growth and income by investing worldwide in the equities of property-related companies. Each underlying investment strategy has a complementary investment style, with a focus on property-related companies and trusts. The Fund is actively managed with reference to the FTSE EPRA/NAREIT Developed Real Estate Index (USD) - Net Returns (the "Index") which it seeks to outperform by 1.75% over the medium to long term. Russell Investments has full discretion to select investments for the Fund.

Fund update

The global listed property market advanced higher during the month, trailing behind the broader equity market. In the US, technology, healthcare, and storage real estate investment trusts (REITs) led the way, while office and shopping center REITs underperformed. Meanwhile, real estate securities in Australia and Europe showed strong performance, whereas property stocks in Japan were the weakest performers of the month. In this market environment, the Fund outperformed the benchmark, driven by strong security selection. Stock selection within Hong Kong and Europe was a notable contributor to outperformance. Additionally, an underweight position in US office REITs, combined with favourable stock selection among US malls, further benefitted performance. However, an overweight position and unfavourable security selection among Japan Developers negatively impacted results.

Unless otherwise specified, Russell Investments is the source of all data. All information contained in this material is current at the time of issue and, to the best of our knowledge, accurate. Any opinion expressed is that of Russell Investments, is not a statement of fact, is subject to change and does not constitute investment advice.

The value of investments and the income from them can fall as well as rise and is not guaranteed. You may not get back the amount originally invested.

Past performance does not predict future returns.

Potential investors in Emerging Markets should be aware that investment in these markets can involve a higher degree of risk.

The value of a REIT depends on factors including the general economic climate and outlook, overall performance and outlook of the property market and related sectors, market value of and amount of rental income generated by its underlying properties, the levels of and any changes in interest rates, and the overall depth and liquidity of the real estate market and other assets in which the REIT is invested.

Any reference to returns linked to currencies may increase or decrease as a result of currency fluctuations. Tax treatments depend on the circumstances of the individual client and may be subject to change in the future.
