For more information on this product, please call +352 2452 4071, visit www.alger.com or email Algerquerydesk@bnymellon.com.

This document was produced on 8 April 2024 and is based on key information as at 29 February 2024.

What is this product?

Type:

This product is a UCITS Fund.

Term:

Open Ended Fund.

Objectives:

Alger SICAV - Alger Small Cap Focus Fund (the "Fund") is actively managed and seeks long term capital appreciation.

The Fund generally invests at least two-thirds of its net assets in equity securities of companies that, at the time of purchase of the securities, have a total market capitalization range of the companies included in the Russell 2000 Growth Index (the "Index").

The Fund is not managed in reference to the Index. The Fund can

invest in financial derivative instruments for hedging purposes and for efficient portfolio management purposes.

Under normal market conditions, the Fund invests in technology companies focused in the fields of medicine and information.

The Fund intends to invest a substantial portion of its assets in a small number of issuers, and may concentrate its holdings in fewer business sectors or industries. The Fund will hold approximately 50 securities. The number of securities held by the Fund may occasionally exceed this range for a variety of reasons.

Intended retail investor:

This product is intended for investors who are prepared to take on a relatively high level of risk of loss to their original capital in order to get a higher potential return, and who plan to stay invested for at least 5 years. It is designed to form part of a portfolio of investments.

What are the risks and what could I get in return?

Risk Indicator

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level and poor market conditions will likely impact the value of your investment.

Small capitalization companies may be more sensitive to market changes and may be subject to more abrupt or erratic price movements than the securities of large companies. Growth stocks may be more sensitive to market, economic and political developments than other stocks, which makes their prices more volatile.

For other risks materially relevant to the product which are not taken

into account in the summary risk indicator, please read the product's Annual Report or Prospectus available at www.alger.com. This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended Holding Period: 5 years			
Investment: USD 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Minimum: There is no minimum guaranteed return if you exit before 5 years			
Stress	What you might get back after costs Average return each year	1,270 USD -87.29%	990 USD -37.07%
Unfavourable¹	What you might get back after costs Average return each year	4,800 USD -52.05%	5,300 USD -11.92%
Moderate²	What you might get back after costs Average return each year	10,440 USD 4.37%	17,350 USD 11.65%
Favourable³	What you might get back after costs Average return each year	15,240 USD 52.45%	33,080 USD 27.04%

¹ This type of scenario occurred for an investment between January 2021 and February 2024.

² This type of scenario occurred for an investment between February 2015 and February 2020.

³ This type of scenario occurred for an investment between January 2016 and January 2021.

What happens if Alger SICAV is unable to pay out?

You may face a financial loss should the Management Company or the depositary/custodian, The Bank of New York Mellon SA/NV, Luxembourg Branch, default on their obligations.

There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the

product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0% annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario.

Investment: USD 10,000	If you exit after 1 year	If you exit after 5 years
Total costs	869 USD	3,139 USD
Annual cost impact (*)	8.7%	4.4%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 16.0% before costs and 11.7% after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	6.0% sales load as further described in the Prospectus.	583 USD
Exit costs	This product does not have any exit costs.	0 USD
Ongoing costs taken each year		If you exit after 1 year
Management fees and other administrative or operating costs	2.3% of the value of your investment per year. This is an estimate based on actual costs incurred over the last year.	230 USD
Transaction costs	The costs associated with buying and selling underlying investments for the product.	57 USD
Incidental costs taken under specific conditions		If you exit after 1 year
Performance fees	This product does not have any performance fees.	0 USD

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

This product has no required minimum holding period but is designed for long term investment; you should be prepared to stay invested for at least 5 years.

You can request to take out some or all of your money at any time. You can typically request to buy or sell shares in the Fund on any day on which banking institutions in Luxembourg and the New York Stock Exchange in the United States are open for business (as further described in the Fund's prospectus).

How can I complain?

If you have any complaints about the product, the conduct of the manufacturer or the person advising on the product, complaints can be lodged via the following methods:

- I. Phone: +352 2452 4071
- II. E-mail: Algerquerydesk@bnymellon.com
- III. Mail: Alger SICAV, The Bank of New York Mellon SA/NV, 2-4 Rue Eugene Ruppert, L-2435 Luxembourg
